

## CONTENTS

	Page
<b>PART 1 :        RESOURCE POTENTIAL FOR SMALL SCALE                          HYDROELECTRIC POWER</b>	<b>1</b>
Acknowledgements	2
Introduction	3
Purpose and scope	4
Methods of Study	5
Resource Assessment	8
Summary	9
<b>PART 2 :        FEASIBILITY OF SMALL SCALE HYDROELECTRIC                          POWER GENERATION</b>	<b>25</b>
Acknowledgements	26
Technical Guide	27
Feasibility Studies	45
References	55
Exhibit I – Great Falls Hydroelectric Project Case Study	56
Exhibit II – Rollins Power Project Case Study, Small Hydropower Additions	81
Economic and Financial Analysis	98
Market Analysis	104
Economic Analysis	124
Project Implementation	134
Financial Feasibility	138
Summary and Cost Guidelines	149
References	152
Exhibit I – Federal Energy Regulatory commission (FERC) Electric Reports	153
Exhibit II – Extracts from the Uniform Systems of Accounts April 1973, Federal Energy Regulatory Commission	157
Hydrologic Studies	161
Spillway Adequacy	180
Time and Manpower Requirements	198
References	199
Exhibit I – Net Lake Evaporation Estimates	200
Exhibit II – Computer Program Abstracts	206
Exhibit I – Turbine Manufacturers	310
Exhibit II – Generator Manufacturers	312
Civil Features	313
Introduction and Overview	313
Site Preparation Design and Cost Guidelines	313
Hydraulic Facilities Design and Cost Guidelines	319
Powerhouse and Appurtenant Facilities Selection and Cost Guidelines	322
Special Need for Power Additions to Dams	329
Summary and Feasibility Study Cost Guidelines	343
References	347
Glossary	350
<b>PART 3 :        EQUIPMENT FOR SMALL SCALE HYDROELECTRIC                          POWER PLANTS</b>	<b>353</b>
Introduction	354
Small Low Head Francis and propeller Turbines in Traditional Arrangements	354
Packaged Units	355
Bulb Units	358

Ossberger Cross-Flow Turbines	361
Straflo Turbines with Rim Type Generators	363
Tube turbines	365
Costs of Turbogenerators and Accessories for Low Head Hydro Development	366
Total Power Costs for Low Head hydro Plants at Existing Dams	367
Acknowledgement	367
<b>PART 4 :        MICRO HYDROPOWER</b>	<b>396</b>
Acknowledgements	397
Introduction	398
Decision Tree	399
Determining the Hydro Potential of Your Site	405
Equipment	421
Economics	437
Sources for Financial Assistance	442
Regulatory Conflicts	443
Cautions and Suggestions for the Do-It-Yourselfer and the Self-Installer	447
