<b>1 OVERLOAD PROTECTIVE AND RELAY DEVICES</b>	<b>1</b>
1-0 Introduction	1
1-1 General	2
1-2 Fuses	3
1-3 Coordination of Fuse and Overload Relay	6
1-4 Instantaneous Magnetic Overload Relay	6
1-5 Time-Delay Magnetic Overload Relay	7
1-6 Fusible-Alloy Thermal-Melting Overload Relay	8
1-7 Bimetallic Thermal Overload Relay	10
1-8 Inductive Fusible-Alloy Thermal-Melting Overload Relay	11
1-9 Inductive Bimetallic Thermal Overload Relay	12
1-10 Auxiliary Thermal Devices	12
1-11 Overvoltage and Undervoltage Protection	14
1-12 Reverse Polarity Protection	18
1-13 Phase-Reversal and Phase-Failure Protective Relays	19
1-14 Differential Relay	19
1-15 Frequency Control Relay	20
1-16 Overload Circuit Breaker	20
1-17 Arc Protection	22
<b>2 STANDARD CONTROL CIRCUIT SYMBOLS AND DIAGRAMS</b>	<b>27</b>
2-1 General	27
2-2 Standard Control Circuit Symbols	28
2-3 Abbreviations Used for Device Designation and Numbering	31
2-4 Special Device Abbreviation Designations	32
2-5 Distinctions between Power and Control Circuits	32
2-6 Typical Control circuit Schematics	33
<b>3 MANUAL DC AND AC STARTERS</b>	<b>40</b>
3-1 General	40
3-2 Starting and Accelerating dc Motors	41
3-3 Commercial 3-Point Starter	45
3-4 Commercial 4-Point Starter	47
3-5 Series Motor Manual Starters	50
3-6 Manual Drum Controller	52
3-7 Manual Starting of Squirrel-Cage Induction Motors (SCIMs)	54
3-8 Wound-Rotor Induction Motor (WRIM) Manual Starting	57
3-9 Polyphase Synchronous Motor Manual Starting	59
3-10 Manual Starting of Single-Phase Motors	60
3-11 Advantages and Disadvantages of Manual Starters	60
<b>4 AUTOMATIC DC STARTERS</b>	<b>64</b>
4-1 General	64
4-2 Definite-Time-Acceleration dc Motor Starter Using Time-Delay Contactors	65
4-3 Definite-Time-Acceleration dc Motor Starter Using Dashpot Relays	67
4-4 Definite-Time-Acceleration dc Motor Starter Using Motor-Driven Timer or Timing Mechanism	69
4-5 Definite-Time-Acceleration dc Motor Starter Using Inductive Time Constant of Holding-Coil Relays	71
4-6 Current-Limit-Acceleration dc Starter Using counter emf Relays (Speed Limit Method)	73

4-7	Current-Limit-Acceleration dc Starter Using Holding-coil Relays	75
4-8	Current-Limit-Acceleration dc Starter Using Series Relays	77
4-9	Current-Limit-Acceleration dc Starter Using Holding Coils (Voltage-Drop Acceleration)	78
4-10	Current-Limit-Acceleration dc Starter Using Holding coils and Magnetic Amplifier	80
<b>5</b>	<b>AUTOMATIC AC STARTERS</b>	<b>85</b>
5-1	Automatic ac Starters	85
5-2	Automatic Magnetic Across-the-Line Starter for Polyphase SCIMs	86
5-3	Automatic Reduced Voltage Definite-Time-Acceleration ac Starters	89
5-4	“Neotimer” Circuit and Starter	93
5-5	Wound-Rotor Induction Motor (WRIM) Starting	95
5-6	Closed-Loop WRIM Starters	98
5-7	Automatic Synchronous Motor Starters	101
5-8	Multiple Starting	103
<b>6</b>	<b>MANUAL AND AUTOMATIC SPEED CONTROL OF DC MOTORS</b>	<b>109</b>
6-1	General	109
6-2	Field Control	110
6-3	Armature Resistance Control	112
6-4	Series and Shunt Armature Resistance Control	113
6-5	Armature voltage Control	114
6-6	Reversing dc Motors	116
6-7	Plugging Braking	121
6-8	Dynamic Braking	124
6-9	Regenerative Braking	128
6-10	Mechanical Braking	130
6-11	Jogging	133
6-12	Electronic dc Motor Control	135
6-13	Performance of dc Motors with Electronic Rectification	146
6-14	Brushless dc Motor	148
<b>7</b>	<b>MANUAL AND AUTOMATIC SPEED CONTROL OF AC POLYPHASE MOTORS</b>	<b>154</b>
7-1	General	154
7-2	Change in Frequency and of the Voltage Applied to a Polyphase Stator	155
7-3	Change in Number of Poles of the Stator Winding of a Polyphase Motor	163
7-4	Secondary Resistance control of Wound-Rotor Induction Motors (WRIMs)	168
7-5	Concatenation	169
7-6	The Leblanc System	172
7-7	Kramer control System	174
7-8	Scherbius System	177
7-9	Schrage Brush-Shifting (BTA) Motor	179
7-10	Electronic Slip Power Control	180
7-11	Line Voltage Control	182
7-12	The Rossman Drive	183
7-13	Speed Control by Mechanical means	184
7-14	Reversing of Polyphase Stator Sequence	185
7-15	Plugging	185
7-16	Dynamic Braking	188
7-17	Regenerative Braking	192
7-18	Jogging and Mechanical Braking	192
7-19	Polyphase Synchronous Motor Reversing and Braking	194
<b>8</b>	<b>SPEED CONTROL OF SINGLE-PHASE MOTORS</b>	<b>201</b>
8-1	Definitions	201
8-2	Reversal of ac Single-Phase Motors	203
8-3	Speed Control of ac Single-Phase Motors	204
8-4	Saturable Reactor and Magnetic Amplifier Control	209

8-5	Electronic Control of Single-Phase Motors	214
8-6	Plugging of Single-Phase Motors	219
8-7	Dynamic Braking of Single-Phase Motors	219
8-8	Series ac and Universal Motor Speed Control Using SCRs	224
<b>9</b>	<b>STATIC CONTROL</b>	<b>235</b>
9-1	General	235
9-2	OR Function	236
9-3	AND Function	238
9-4	NOT Function	239
9-5	MEMORY Function	241
9-6	DELAY Function	242
9-7	NOR and NAND Functions	243
9-8	Summary of Basic Functions	245
9-9	Converting Relay Logic to Static Logic	248
9-10	Auxiliary Devices for Static Logic System	252
9-11	Complete Static Logic Control System	261
9-12	Designing Static Logic Systems	265
<b>10</b>	<b>AUTOMATIC FEEDBACK CONTROL SYSTEMS</b>	<b>274</b>
10-1	General	274
10-2	The Generalized Servomechanism	275
10-3	Servomechanism Elements	278
10-4	Servomechanism Accuracy	280
10-5	Servomechanism Instability	282
10-6	The Damped Servomechanism	283
10-7	Types of Damping	285
10-8	Transducers	290
10-9	Modulators	293
10-10	Modulator Amplifiers	294
10-11	DC Amplifiers	296
10-12	Examples of Automatic Process Control	297
10-13	Transfer Functions	299
10-14	Predictions from Open-Loop Transfer Functions Regarding Closed-Loop Stability	311
10-15	Cascade Compensation	314
10-16	Gain-factor compensation	321
10-17	Feedback Compensation	325
<b>11</b>	<b>RATINGS, SELECTION, AND MAINTENANCE OF ELECTRIC MACHINERY</b>	<b>334</b>
	<b>OF ELECTRIC MACHINERY</b>	<b>334</b>
11-1	Factors Affecting Ratings of Machines	334
11-2	Temperature Rise	335
11-3	Voltage Rating	337
11-4	Effect of Duty Cycle and Ambient Temperature on Rating	338
11-5	Types of Enclosures	338
11-6	Speed Rating: Classifications of Speed and Reversibility	339
11-7	Factors Affecting Generator and Motor Selection	341
11-8	Maintanance	343
11-9	Future Trends Governing the Selection of Motors and Drives	345
	Appendices	351
	Index	371
