

**CONTENTS**

	Page
Significance of Minimum Property Values of Electrical Insulating Materials	1
Extremal Nature of Dielectric Breakdown-Effect of Sample Size	5
Discussion	11
Variability of Dielectric Breakdown in Sheet Insulation	12
The Establishment of Minimum Quality Levels of Sheet Insulation	17
Low-Temperature Resistance Test Methods for Non-Rigid Insulation	33
Discussion	38
Statistical Treatment of Heat-Aging Studies on Varnished Glass Cloth	39
Discussion	42
Quality Level Cannot Be Determined By “Go”—“No-Go”	43
Discussion	47
