

CONTENTS

| | Page |
|------------------|---|
| PART I | MATTER AND ENERGY |
| Chapter 1 | Elements of Quantum Mechanics 1 |
| | 1.1 The Dual Nature of Light 4 |
| | 1.2 The Dual Nature of Atomic Particles 5 |
| Chapter 2 | Elements of Thermodynamics 26 |
| | 2.1 Introduction 26 |
| | 2.2 The Thermodynamics of Open Systems 26 |
| | 2.3 Jaynes' Formalism 30 |
| | 2.4 Significance of the Lagrangian Multipliers 40 |
| | 2.5 Reversibility 59 |
| | 2.6 Inherently Irreversible Processes 62 |
| | 2.7 Linearized Treatment of Couple Flows 78 |
| PART II | THERMOELECTRICITY AND PHOTOVOLTAIC POWER |
| Chapter 3 | Thermoelectricity 87 |
| | 3.1 Phenomenology 87 |
| | 3.2 Thermodynamics 88 |
| | 3.3 Physics of Materials 92 |
| Chapter 4 | Photovoltaic Energy Conversion 240 |
| | 4.1 Phenomenology 240 |
| | 4.2 The p-n Junction 241 |
| | 4.3 Detailed Physical Phenomenon 247 |
| | 4.4 The Curve and Voltage Factors 249 |
| | 4.5 Effects of Physical Properties 252 |
| | 4.6 Radiation Effects 258 |
| | 4.7 Review of Principles 259 |
| | Closure on Photovoltaics 262 |
| Index | 283 |
