

## CONTENTS

	Page
<b>1 HISTORICAL INTRODUCTION</b>	<b>1</b>
The Pre-Volta Period (1678-1800)	1
The Simple Volta Battery (1800-1830)	3
Rise of the Commercial Battery (1830-1880)	13
Primary Batteries in the Electrical Age (1880-1920)	41
Primary Batteries in the Electronic Age (1920-)	47
References	51
<b>2 FUNDAMENTAL ASPECTS</b>	<b>59</b>
Thermodynamics	62
The Electrical Double Layer	81
Losses in Batteries	88
The Measurement of Overpotential	120
References	144
Appendices	147
<b>3 PRIMARY CELLS WITH CAUSTIC ALKALI ELECTROLYTE</b>	<b>169</b>
Anodes	171
Cathodes	175
Electrolytes	178
Capacity Factors	186
References	188
<b>4 THE ALKALINE COPPER OXIDE : ZINC CELL</b>	<b>191</b>
Commercial Cells	192
Granular Copper Oxide	195
Discharge Characteristics	196
Cell Reactions	198
Electrolyte	199
Anode	200
Cathode	200
References	205
<b>5 THE MERCURIC OXIDE : ZINC CELL</b>	<b>207</b>
The Cell System	207
Description of Cells	208
Service Characteristics	213
The R-M Rechargeable Unit	217
General Considerations	220
References	222
Bibliography	222
<b>6 THE SILVER OXIDE : ZINC SYSTEM</b>	<b>225</b>
Theoretical Considerations	226
Structural Details	229
General Considerations	233
Acknowledgments	236
References	236
<b>7 THE ALKALINE MANGANESE DIOXIDE : ZINC SYSTEM</b>	<b>239</b>
General Considerations	239
Anode	240

	Electrolyte	240
	Cathode	241
	Commercial Batteries	253
	Performance	258
	References	262
<b>8</b>	<b>ZINC : OXYGEN CELLS WITH ALKALINE ELECTROLYTE</b>	<b>265</b>
	Wet Cells	265
	Dry Cells	277
	Cell Components	280
	The Zinc: Oxygen Cell as a Heavy Drain Unit	289
	References	290
<b>9</b>	<b>FUEL AND CONTINUOUS-FEED CELLS</b>	<b>293</b>
	History	293
	Thermodynamic Considerations	294
	Efficiency	297
	Electrodes for Fuel Cells	300
	Low-Temperature Cells	303
	High-Temperature Cells	318
	Redox Systems	322
	Closed-Cycle and Other Regenerative Systems	325
	Biological Fuel Cells	328
	Status and Prospectus	329
	References	336
<b>10</b>	<b>LOW-TEMPERATURE NONAQUEOUS CELLS</b>	<b>341</b>
	Liquid Ammonia	343
	Sulfur Dioxide	354
	Acetonitrile	356
	Other Solvents	358
	Reserve Batteries	359
	Future Prospects	364
	References	369
<b>11</b>	<b>SEMIDRY AND SOLID-ELECTROLYTE BATTERIES</b>	<b>373</b>
	Miniaturization Trends: Commercially Available Batteries	373
	Basic Problems Associated with Battery Miniaturization	374
	Batteries with Trace Electrolyte	376
	Batteries with Strongly Immobilized Electrolyte	380
	Batteries with Lattice-Immobilized Ions	382
	Solid-Electrolyte Sensors: A New Horizon	427
	References	429
<b>12</b>	<b>STANDARD CELLS</b>	<b>433</b>
	Electrical Units	434
	Development of Standard Cells	438
	Criteria for Standard Cells	446
	Thermodynamics	448
	Practical Considerations	451
	Cell characteristics	461
	The Hulett Cell	469
	Zener Diodes	472
	Summary	472
	References	474
