

CONTENTS

	Page
Part I INDIRECT SYSTEMS	
Some Engineering Aspects of the Hydrogen – Oxygen Fuel Cell	1
Hydrocarbon – Air Fuel Cell Systems	9
Carbon – Air Electrodes for Low Temperature Fuel Cells	17
Performance of a Reformed Natural Gas – Acid Fuel Cell System - I	
Part I – Hydrogen Generator Design	25
Performance of a Reformed Natural Gas – Acid Fuel Cell System - III	
Part II – Fuel Cell Battery	37
The Performance of Solid – Electrolyte Cells and Batteries on CO-H ₂ Mixtures ; A 100 Watt Solid – electrolyte Power Supply	51
Part II METHANOL FUEL CELLS	
Alcohol – Air Fuel Cells – Development and Applications	79
The Anodic Oxidation of Methanol on Raney – Type Catalysts of Platinum Metals	91
The Anodic Oxidation of Methanol on Platinum in Alkaline Solution	103
Formate Ion – Oxygen Fuel Cells	121
An Alkaline Methanol – Air Primary Battery System	131
Some Aspects of the Design and Operation of Dissolved Methanol Fuel Cells	143
A Comparison between External and Internal Reforming Methanol Fuel Cells Systems	151
Studies on the Fuel Electrodes of Liquid Fuel Cells	169
Part III MOLTEN CARBONATE FUEL CELLS	
Some Aspects of Molten Carbonate Fuel Cells	187
The Double – Duty Anode for Molten Carbonate Fuel Cells	213
Long – Run Experiments on High – Temperature Molten Carbonate Fuel Cells	225
Hydrocarbon – Air Fuel Cells Employing Slurried Molten Carbonate Electrolytes	251
The Semi – Industrial Fuel Cell Element of Gaz de France	267
A Molten Carbonate Fuel Cell with Water Injection	285
Operational Characteristics of High – Temperature Fuel Cells	293
Part IV EXPERIMENTAL TECHNIQUES	
Testing of Electrodes for High – Temperature, Solid – Electrolyte Fuel Cells	311
Using Radiotracers to Study Hydrocarbon Adsorption Directly at Electrodes	335
The Study of Hydrocarbon Surface Processes by the Multipulse Potentiodynamic (MPP) Method	349
Multipulse Potentiodynamic Studies of Low Molecular Weight Hydrocarbons on Semi-Micro Fuel Cell Electrodes	377
Study of Hydrocarbon Oxidation by Experimental Separation of Reaction Steps	395
The Adsorption and Oxidation of Hydrocarbons on Noble Metal Electrodes; Propane Adsorption on Smooth Pt at Elevated Temperatures	409
Relative Reactivities in the Direct Oxidation of Binary Hydrocarbon Fuels on Practical Electrodes	429
Anodic Oxidation of Hydrocarbons	443
Part V DIRECT HYDROCARBON FUEL CELLS	
Catalytic Electrodes for the Anodic Oxidation of Propane	455
Fluoride Electrolytes for Saturated Hydrocarbon Fuel Cells	465
The Application of Inorganic Membranes in Hydrocarbon Fuel Cells	485
Operating Characteristics of Palladium-Silver Anodes on Impure Hydrogen Streams	495
Feasibility Studies on a Hydrocarbon Fuel Cell	509

Electrochemical Oxidation of Hydrocarbons; Nature and Activity of Electrodeposited Platinum Blacks Containing Varying Amounts of Lead	525
Limiting Processes at Hydrocarbon Electrodes	539
Subject Index	557
