PREFACE

vii

Chapter 1 PRINCIPLES OF OPTICS

1

- 1-1 Nature of Electromagnetic Radiation
- 1-2 Reflection and Refraction 6
- 1-3 Mirrors and Lenses 8
- 1-4 Beam Expanders 13
- 1-5 Interference and Diffraction 14
- 1-6 Coherence 19
- 1-7 Polarization 21
- 1-8 Fiber Optics 25
- 1-9 Acousto-Optic Modulators 27
- Problems 29
- References 30
- Bibliography 30

Chapter 2 SOLID-STATE CONCEPTS

32

- 2-1 Atomic Structure 32
- 2-2 Energy Bands 35
- 2-3 *pn* Junctions 38
- 2-4 Transistors and Simple Circuits 42
- Problems 48
- Bibliography 48

| | | |
|------------------|--|-----------|
| Chapter 3 | RADIOMETRY, PHOTOMETRY, OPTICAL DEVICE PARAMETERS, AND SPECIFICATIONS | 49 |
| 3-1 | Radiometry and Photometry | 49 |
| 3-2 | Properties of Light Emitters | 51 |
| 3-3 | Quality Factors for Photodetectors | 53 |
| 3-4 | Spectral Response | 54 |
| 3-5 | Frequency Response | 54 |
| | Problems | 55 |
| | Reference | 55 |
| | Bibliography | 55 |
| | | |
| Chapter 4 | LIGHT DETECTION DEVICES | 56 |
| 4-1 | Classification of Detectors | 56 |
| 4-2 | Thermal Detectors | 57 |
| 4-3 | Quantum Detectors | 61 |
| 4-4 | Detector Arrays | 70 |
| 4-5 | Photodetector Circuits | 73 |
| | Problems | 76 |
| | Bibliography | 77 |
| | | |
| Chapter 5 | INTRODUCTION TO THE LASER | 78 |
| 5-1 | Unique Properties of Laser Light | 79 |
| 5-2 | Requirements for Laser Action | 79 |
| 5-3 | How the Laser Works | 81 |
| 5-4 | Types of Lasers | 81 |
| | Problems | 83 |
| | Bibliography | 83 |
| | | |
| Chapter 6 | LASER THEORY | 84 |
| 6-1 | Population Inversion | 84 |
| 6-2 | Stimulated Emission | 85 |
| 6-3 | Einstein Probability Coefficients | 86 |
| 6-4 | Amplification | 88 |
| 6-5 | Power Output for CW Operation | 90 |
| 6-6 | Pulsed Operation | 91 |
| 6-7 | Three- and Four-Level Systems | 92 |
| 6-8 | Rate Equations | 94 |
| 6-9 | Optical Resonators | 96 |

- 6-10 Line Broadening 98
- 6-11 *Q*-switching, Cavity Dumping, and Mode Locking 101
 - Problems 103
 - Reference 104
 - Bibliography 105

Chapter 7 LASER OPTICS 106

- 7-1 Nature of the Laser Output 106
- 7-2 Beam Propagation for Stable Laser Resonators 108
- 7-3 Resonator Stability and Beam Parameters 116
 - Problems 121
 - References 122
 - Bibliography 122

Chapter 8 TYPES OF LASERS 124

- 8-1 HeNe Lasers 124
- 8-2 Ion Lasers 127
- 8-3 Metal Vapor Lasers 128
- 8-4 Dye Lasers 128
- 8-5 Ruby Laser 129
- 8-6 Neodymium-YAG Lasers 131
- 8-7 Nd-Glass Laser 131
- 8-8 Diode Lasers 133
- 8-9 CO₂ Lasers 136
 - Problems 144
 - Bibliography 144

Chapter 9 LOW-POWER LASER APPLICATIONS I: ALIGNMENT, GAUGING, AND INSPECTION 145

- 9-1 Scanning Techniques 145
- 9-2 Alignment 152
- 9-3 Triangulation Technique 154
- 9-4 Diode-Array Camera System 157
 - Problems 160
 - Bibliography 162

**Chapter 10 LOW-POWER LASER APPLICATIONS II:
INTERFEROMETRY AND HOLOGRAPHY**

- 10- Mathematical Descriptions of Laser Light 163
- 10-2 Laser Velocimetry 167
- 10-3 Laser Interferometry 169
- 10-4 Holographic Interferometry 178
 - Problems 195
 - References 198
 - Bibliography 199

**Chapter 11 INTERACTION OF HIGH-POWER LASER
BEAMS WITH MATERIALS**

- 11-1 Material and Laser Parameters 200
- 11-2 Basic Heat Transfer Equations 202
- 11-3 Energy Balance Approximation 203
- 11-4 Uniform, Constant Irradiance Model 205
- 11-5 Gaussian, Circular, and Rectangular Beam Models 206
- 11-6 Heating with Melting 208
- 11-7 Heating with Vaporization 211
- 11-8 Distributed Sources 214
- 11-9 CW Welding (Keyholing) 214
- 11-10 General Approach to Laser Heating 216
 - Problems 219
 - References 221
 - Bibliography 221

Chapter 12 HIGHER-POWER LASER APPLICATIONS

222

- 12-1 Surface Hardening 222
- 12-2 Welding 229
- 12-3 Cutting 233
- 12-4 Laser Marking 238
- 12-5 Hole Piercing 239
- 12-6 Alloying and Cladding 242
- 12-7 Miscellaneous Applications 243
 - Problems 243
 - Reference 243
 - Bibliography 243
