

# CONTENTS

## Chapter 1

### INTRODUCTION TO INSTRUMENT

### CHARACTERISTICS

2

*Introduction / Accuracy / Sensitivity / Resolution or Discrimination /  
Noise and Repeatability / Instrument Efficiency / Instrument Range  
and Scales / Linearity / Dynamic Systems / Dynamic Response /  
Overshoot / Dead Time / Problems*

## Chapter 2

### ERRORS

14

*Limiting Errors / Known Errors / Error in Instruments / Probable  
Error / Summary / Problems*

## Chapter 3

### DIRECT-CURRENT AND BALLISTIC GALVANOMETERS

32

Introduction / Torque and Deflection of a Current Galvanometer / Dynamic Analysis of a Galvanometer / The Underdamped Motion of a Galvanometer / The Undamped Motion of a Galvanometer / Critical Damped Motion of a Galvanometer / Relative Damping / Logarithmic Decrement / Overdamped Motion of a Galvanometer / Nondimensional Curves of a Galvanometer Motion / Galvanometer Sensitivity / Measuring the Galvanometer Current / Measuring the Resistance of the Galvanometer / Measuring the Current Sensitivity of a Galvanometer / Measurements of the Voltage Sensitivity of a Galvanometer / Measurement of the Megohm Sensitivity of a Galvanometer / Measurement of the Ballistic Sensitivity of a Galvanometer / Measuring the Logarithmic Decrement of a Galvanometer / Computing Relative Damping / Critical Damping Resistance External / Galvanometer Protection / The Ayrton Shunt / The Ballistic Galvanometer / Measurements of the Quantity of Electricity / Measurement of the Time Integral of the EMF / Measuring the EMF-time or Flux-linkage Sensitivity of a Galvanometer / Problems

## CONTENTS

### Chapter 4

#### DIRECT-CURRENT INDICATING INSTRUMENTS

70

Construction of a d'Arsonval Movement / Current Measurements / Ammeter Shunts and Multirange Ammeters / Voltmeters / Voltmeter-Ammeter Measurements / Series-type Ohmmeter / Shunt-type Ohmmeter / Cross-coil Ohmmeters / Megger / Volt-Ohm-milliammeter / Direct-current Watthour Meter / Direct-current Recording Instruments / Problems -

### Chapter 5

#### ALTERNATING-CURRENT INDICATOR INSTRUMENTS

102

Introduction / Rectifier-type A-C Instruments / Thermocouple Instruments / Electrodynamic Instruments / Iron-vane Instruments / Electrostatic Instruments / Power Measurements / Watthour Meters / Phase-sequence Measurements / Power-factor Measurements and Phasemeters / Synchrosopes / Frequency Measurements / Alternating-current Recording Meters / Problems

### Chapter 6

#### INSTRUMENT TRANSFORMERS

132

The Ideal Transformer / Losses in a Transformer / Impedance Transformation / Potential Transformers / The Current Transformer / Problems

### Chapter 7

#### OSCILLOGRAPHS, TAPE RECORDERS, AND CATHODE-RAY OSCILLOSCOPES

148

Introduction / The Galvanometer-type Oscillograph / Magnetic Tape Recorders / The Cathode-ray Oscilloscope / Problems

## Chapter 8

## DIRECT-CURRENT BRIDGES

Introduction / Wheatstone Bridge / Kelvin Bridge / Application of Bridge Circuits / Problems

## Chapter 9

## ALTERNATING-CURRENT BRIDGES

Introduction / The Inductance-comparison Bridge / The Capacitance Bridge with a Wagner Ground / The Bridge-T Network / The Parallel-T Circuit / The Storage-factor and the Dissipation-factor Measurements / Residuals of A-C Bridge Components / Shielding / Problems

## Chapter 10

## POTENTIOMETERS

The Potentiometer and Its Operation / Duo-range Potentiometer / Multiple-range Potentiometers / Zero-suppression Potentiometers / Leeds and Northrup Type K-2 Potentiometer / Leeds and Northrup Type K-3 Universal Potentiometer / Multirange Portable Potentiometers / Volt Box / Current Measurement with a Potentiometer / Ammeter and Voltmeter Calibration / Potentiometer Sensitivity / Protection of the Standard Cell and Galvanometer in a Potentiometer Circuit / Self-balancing Potentiometers / Problems

## Chapter 11

## NONELECTRICAL QUANTITIES

230

Introduction / Bonded-resistance Strain Gages / Unbonded-resistance Strain Gages / Differential Transformer / Variable-capacity Displacement Instruments / Reluctance-type Displacement Instruments / Dynamic Displacement Measurements / Load Cells and Load Rings / Piezoelectric Devices / Velocity Measurements / Acceleration Measurements / Vibration Measurements / Pressure Measurements / Thermocouples / Resistance Thermometers / Thermistors and Their Characteristics / Radiant-energy Measurements / Nuclear Instrumentation / Magnetic Flux and Hysteresis Measurements / pH Measurements / Time Measurements / Problems

## CONTENTS

### Chapter 12

#### ELECTRICAL ANALOG COMPUTERS

284

Introduction / Averaging Circuits / Summing Circuit / Integrating Circuits / Differentiating Circuits / Solution of Linear Differential Equations / Representation of Physical Forces / Amplitude and Time Factors / Division with a Servo Circuit / Multiplication with a Servo Circuit / Electrodynamometer-type Multiplier and Divider Circuit / Feedback Dividing and Multiplying Circuits / Nonlinear-potentiometer-function Generator / An Electronic Function Generator / Resolvers and Transformation for the Polar to the Rectangular Form / The Transformation of Rectangular Cartesian Coordinates to the Polar Form / Solution of Simultaneous Equations / Commercial Analog Computers / Problems

### Chapter 13

#### DIGITAL NUMBER SYSTEMS

Digital Versus Analog Systems / Basic Theory of Digital Numbers / The Decimal-number System / The Binary System / The Conversion from Binary to Decimal and Decimal to Binary Numbers / The Ternary-number System / The Octonary-number System / The Duodecimal-number System / The Binary-coded Decimal System / The Reflected Binary-number System / The Cyclic-decimal-number System / The Biquinary Code / Fractions / Summary / Problems

### Chapter 14

#### ANALOG-TO-DIGITAL CONVERSION

Introduction / Number-indicator Switching Systems / Diode Matrix / Number Indicators / Time-base Encoders / Feedback or Voltage-comparison Encoder / Spatial Encoders / Commercial Encoders / Positive- and Negative-reading Encoders / Summary / Problems

### Chapter 15

#### THE DIGITAL COMPUTER AND DIGITAL-COMPUTER PROBLEMS

372

Introduction to Digital Computers / Typical Digital-computer Operation and Programming / Boolean Algebra / Arithmetic Processes / Summary / Problems

## Chapter 16

DATA-ACQUISITION AND REDUCTION SYSTEMS	420
---	-----

Introduction / Sensing Elements / Conditioning Equipment / Calibrating Equipment / Integrating Equipment / Analog Computers / Analog Recorders / Multiplexing Equipment / Analog-to-digital Converters / Telemetry Equipment / Digital Recorders / Digital Plotters / High-speed Cameras and TV Equipment / Progress Monitor / Central-clock Control / Requirements of a Complete Data-acquisition and Reduction System / Checking the Performance of a Data-acquisition System / Problems

INDEX	450
