

CONTENTS

CHAP.	PAGE
<i>Preface to the Seventh Edition</i>	v
<i>Preface to the First Edition</i>	vi
1. The Cost of an Electricity Supply	1
2. Measurement of Electrical Energy	8
3. Measurement of Maximum Demand and Power Factor	99
4. Methods of Metering which Involve Time	130
5. Methods of Charging to Compensate for Capital Outlay	141
6. Instrument Transformers	149
7. Special Meters	160
8. General Requirements of Meter Testing	195
9. Testing Equipments for D.C. Meters	218
10. Testing D.C. Meters	226
11. Testing Equipments for A.C. Meters	239
12. Testing A.C. Watt-hour Meters	271
13. Testing Special Meters	296
14. Testing of Shunts, Current Transformers and Voltage Transformers	309
15. Standardization of Bench Instruments	320
16. Typical Meter Faults and their Treatment	332
17. Installation and Maintenance of Meters	337
18. Administrative Work Associated with Meters	367

CONTENTS

	PAGE
<i>Appendix 1. Integration</i>	379
<i>Appendix 2. Vectors</i>	
<i>Appendix 3. Useful Trigonometrical Identities</i>	384
<i>Appendix 4. The Slide Rule</i>
