
CONTENTS

PREFACE **xiii**

1 **INTRODUCTORY TOPICS** **1**

- 1-1. Introduction *1*
- 1-2. Noise *5*
- 1-3. Noise Calculations *11*
- 1-4. Semiconductor Noise Comparisons *17*
- 1-5. Information and Bandwidth *18*
- 1-6. Nonsinusoidal Waveforms and Bandwidth *19*
- 1-7. Fourier Analysis *21*
 - Questions and Problems *23*

2 **AMPLITUDE MODULATION— TRANSMISSION** **25**

- 2-1. Amplitude Modulation Analysis *26*
- 2-2. AM Mathematical Analysis *30*
- 2-3. AM Power Relationships *33*
- 2-4. Circuits for AM Generation *36*
- 2-5. AM Transmitter Systems *42*
- 2-6. Monolithic IC Transmitters *49*
- 2-7. AM Standard Broadcast Band Transmitter *49*
- 2-8. Transmitter Measurements *50*
 - Questions and Problems *58*

3 AMPLITUDE MODULATION— RECEPTION 60

3-1. Receiver Characteristics	60
3-2. AM Detection	68
3-3. Superheterodyne Receivers	75
3-4. Superheterodyne Tuning	78
3-5. Superheterodyne Analysis	80
3-6. Automatic Gain Control	90
3-7. AM Receiver Systems	93
Questions and Problems	97

4 SINGLE-SIDE-BAND COMMUNICATIONS

4-1. Single-Side-Band Characteristics	100
4-2. Side-Band Generation—The Balanced Modulator	103
4-3. Single Side-Band Filters	111
4-4. SSB Transmitters—Filter Method	118
4-5. SSB Transmitters—The Phase Method	123
4-6. SSB Demodulation	124
4-7. SSB Receivers	128
4-8. Frequency Synthesis	131
Questions and Problems	136

5 FREQUENCY MODULATION— TRANSMISSION 139

5-1. Angle Modulation	139
5-2. A Simple FM Generator	140
5-3. FM Analysis	143
5-4. Noise Suppression	149
5-5. Direct FM Generation	156
5-6. Indirect FM	165
5-7. Stereo FM	167
5-8. FM Transmissions	169
Questions and Problems	

6 FREQUENCY MODULATION— RECEPTION 173

6-1. Block Diagram	173
6-2. RF Amplifiers	174

6-3. Limiters	177
6-4. Discriminators	181
6-5. The Phase-Locked Loop	186
6-6. Stereo Demodulation	188
6-7. FM Receivers	198
Questions and Problems	

7 TELEVISION 204

7-1. Introduction	204
7-2. Transmitter Principles	205
7-3. Transmitter/Receiver Synchronization	208
7-4. Resolution	212
7-5. The Television Signal	214
7-6. Television Receivers	215
7-7. The Front End	217
7-8. IF Amplifiers	222
7-9. The Video Section	228
7-10. Sync and Vertical Deflection	230
7-11. Horizontal Deflection and High Voltage	232
7-12. Principles of Color Television	235
7-13. Troubleshooting	242
Questions and Problems	251

8 COMMUNICATIONS TECHNIQUES 256

8-1. Frequency Conversion	256
8-2. Special Features	260
8-3. CB Transceivers	266
8-4. Facsimile	269
8-5. Mobile Telephone	270
8-6. Communications Transceivers	279
Questions and Problems	284

9 DIGITAL COMMUNICATIONS 286

9-1. Coding	286
9-2. Code Transmission	292
9-3. Pulse Modulation	299
9-4. Pulse-Code Modulation	307
9-5. Transmission of Digital Data	312
9-6. Radio Telemetry	317
Questions and Problems	320

10	TRANSMISSION LINES	322
10-1.	Types of Transmission Lines	322
10-2.	Electrical Characteristics of Transmission Lines	325
10-3.	Propagation of dc Voltage Down a Line	331
10-4.	Nonresonant Line	335
10-5.	Resonant Transmission Line	338
10-6.	Standing Wave Ratio	349
10-7.	The Smith Chart	353
10-8.	Losses in Transmission Lines	363
10-9.	Transmission Line Applications	365
	Questions and Problems	369
11	WAVE PROPAGATION	373
11-1.	Electrical to Electromagnetic Conversion	
11-2.	Electromagnetic Waves	374
11-3.	Waves Not in Free Space	376
11-4.	Space- and Ground-Wave Propagation	379
11-5.	Sky Wave Propagation	383
11-6.	Satellite Communications	395
	Questions and Problems	396
12	ANTENNAS	399
12-1.	Basic Antenna Theory	399
12-2.	The Hertz Antenna	400
12-3.	Radiation Resistance	404
12-4.	Antenna Feed Lines	407
12-5.	The Marconi Antenna	411
12-6.	Antenna Arrays	415
12-7.	Special Purpose Antennas	419
	Questions and Problems	422
13	WAVEGUIDES	427
13-1.	Comparison of Transmission Systems	427
13-2.	Types of Waveguides	429
13-3.	Physical Picture of Waveguide Propagation	432
13-4.	Other Types of Waveguides	434
13-5.	Other Waveguide Considerations	437
13-6.	Termination and Attenuation	440
13-7.	Directional Coupler	443

13-8. Coupling Waveguide Energy	444
13-9. Cavity Resonators	446
13-10. Radar	452
13-11. Microintegrated Circuit Waveguiding—Microstrip and Strip Line	460
13-12. Optical Waveguides—Fiber-Optic Light Pipes	462
Questions and Problems	464

14 MICROWAVES 468

14-1. Microwave Antennas	468
14-2. Microwave Tubes	473
14-3. Solid State Microwave Devices	482
14-4. Ferrites	490
14-5. Low-Noise Amplification	497
Questions and Problems	500

INDEX 502
