
CONTENTS

Preface X

1. Introduction: Terminology and Motivation 1
2. Discrete-Time Signals and Systems 3
 - 2.0 Introduction 3
 - 2.1 Discrete-Time Signals, or Sequences 3
 - 2.2 Discrete-Time Systems and Filters 5
 - 2.3 Stability and Causality 10
 - Problems 11
3. The z Transform 13
 - 3.0 Introduction 13
 - 3.1 Definition of the z Transform* 13
 - 3.2 Inverse z Transform 16
 - 3.3 Inverse z Transform for Causal Sequences 18
 - 3.4 Properties of the z Transform 19
 - Problems 22
4. Input/Output Relationships 25
 - 4.0 Introduction 25
 - 4.1 System Function and Frequency Response
 - 4.2 Difference Equations 28
 - 4.3 Geometric Evaluation of $H(z)$ and $H'(w)$ 31
 - 4.4 State Variables 36
 - Problems 42
5. Discrete-Time Networks 45
 - 5.0 Introduction 45

5.1	Flow Graph Properties	45
5.2	Network Structures	47
5.3	Properties of Network Coefficients	54
5.4	Special Discrete-Time Networks	60
	Problems	64
6.	Sampling Continuous-Time Signals	67
6.0	Introduction	67
6.1	Fourier Transform Relationships	68
6.2	Laplace Transform Relationships	70
6.3	Prefilters, Postfilters and D/A Converters	74
	Problems	77
7.	Discrete Fourier Transform	79
7.0	Introduction	79
7.1	Derivation and Properties of the DFT	79
7.2	Zero Padding	81
7.3	Windows in Spectrum Analysis	85
7.4	FFT Algorithm	92
7.5	Periodogram	95
	Problems	99
8.	IIR Filter Design by Transformation	103
8.0	Introduction	103
8.1	Classical Filter Designs	104
8.2	Impulse-Invariant Transformation	110
8.3	Bilinear Transformation	113
8.4	Spectral Transformations	120
	Problems	125
9.	FIR Filter Design Techniques	127
9.0	Introduction	127
9.1	Window-Function Technique	128
9.2	Frequency-Sampling Technique	134
9.3	Equiripple Designs	139
	Problems	142
10.	Filter Design by Modeling	145
10.0	Introduction	145
10.1	Autoregressive (all-pole) Filters	145
10.2	Moving-Average (all-zero) Filters	158
10.3	ARMA (pole/zero) Filters	161
10.4	Lattice Structures	168
10.5	Spectrum Analysis by Modeling	173
	Problems	178
11.	Quantization Effects	181
11.0	Introduction	181
11.1	Coefficient Quantization	182
11.2	Signal Quantization	187
11.3	Dynamic Range and Scaling	191
11.4	Parallel and Cascade Forms	195
11.5	Limit-Cycle Oscillations	204
11.6	State-Space Structures	208
	Problems	214

- 12. Digital Filter Implementation 217
 - 12.0 Introduction 217
 - 12.1 Bit-Serial Arithmetic and VLSI 217
 - 12.2 Distributed Arithmetic 224
 - 12.3 FIR Implementation via the DFT 227
 - 12.4 Block IIR Implementations 229
 - Problems 234
- 13. Filter and System Examples 237
 - 13.0 Introduction 237
 - 13.1 Interpolation and Decimation 237
 - 13.2 Hilbert Transformation 243
 - 13.3 Digital Oscillators and Synthesizers 245
 - 13.4 Speech Synthesis 248
 - Problems 252
- References 253
- Index 257
