

CONTENTS

Section 1: Cleaning Agents	
Chapter 1.1 Overview of Cleaning Agents	3
Chapter 1.2 Solvents and Solubility	21
Chapter 1.3 Aqueous Cleaning Essentials	37
Chapter 1.4 Review of Solvents for Precision Cleaning	59
Chapter 1.5 Hydrofluoroethers	75
Chapter 1.6 Hydrofluorocarbons	89
Chapter 1.7 Normal-Propyl Bromide	111
Chapter 1.8 Vapor Degreasing with Traditional Chlorinated Solvents	133
Chapter 1.9 Volatile Methylsiloxanes: Unexpected New Solvent Technology	147
Chapter 1.10 Benzotrifluorides	157
Chapter 1.11 HCFC-225: Alternative Precision and Electronics Cleaning Technology	167
Chapter 1.12 d-Limonene: A Safe and Versatile Naturally Occurring Alternative Solvent	175
Section 2: Cleaning Systems	
Chapter 2.1 Cleaning Equipment Overview	185
Chapter 2.2 The Fundamental Theory and Application of Ultrasonics for Cleaning	201
Chapter 2.3 Ultrasonic Cleaning Mechanism	217
Chapter 2.4 Higher-Frequency and Multiple-Frequency Ultrasonic Systems	227
Chapter 2.5 Megasonic Cleaning Action	233
Chapter 2.6 Equipment Design	245
Chapter 2.7 Cold and Heated Batch Solvent Cleaning Systems	265
Chapter 2.8 Flushing Systems	273
Chapter 2.9 Solvent Vapor Degreasing – Minimizing Waste Streams	279
Chapter 2.10 Vapor Degreaser Retrofitting	291
Chapter 2.11 Enclosed cleaning Systems	297
Chapter 2.12 Precision Cleaning and Drying Utilizing Low-Flash-Point Solvents	309
Chapter 2.13 Dense-Phase CO ₂ as a Cleaning Solvent: Liquid CO ₂ and Supercritical CO ₂	315
Chapter 2.14 Carbon Dioxide Dry Ice Snow Cleaning	329
Chapter 2.15 Gas Plasma: A Dry Process for Cleaning and Surface Treatment	337
Chapter 2.16 Super-Heated, High-Pressure Steam Vapor Cleaning	343
Chapter 2.17 Making Decisions about Water and Wastewater for Aqueous Operations	349
Chapter 2.18 Overview of Drying: Drying after Solvent Cleaning and Fixturing	377
Chapter 2.19 Aqueous Parts Drying	383
Chapter 2.20 Liquid Displacement Drying Techniques	397
Section 3: Contamination Control; Analytical Techniques, Compatibility	
Chapter 3.1 How Clean is Clean? Measuring Surface Cleanliness and Defining Acceptable Level –	

Of Cleanliness	415
Chapter 3.2 Contamination Control and Analytical Techniques	431
Chapter 3.3 Material Compatibility	449
Section 4: Process Selection and Maintenance	
Chapter 4.1 Evaluating, Choosing, and Implementing the Process: How to Get Vendors to Work- With You	463
Chapter 4.2 Optimizing and Maintaining the Process	475
Section 5: Specific Areas of Cleaning	
Chapter 5.1 Surface Cleaning, Particle Removal	491
Chapter 5.2 Cleaning Metals: Strategies for the New Millennium	505
Chapter 5.3 Very High Performance, Complex Applications	519
Chapter 5.4 Cleaning Solutions in the Semiconductor Wafer Manufacturing Process	541
Chapter 5.5 Biomedical Application: Analytical Characterization for Biocompatibility	563
Section 6: Regulation / Safety Considerations	
Chapter 6.1 Safety and the Environment – Some Editorial Thoughts	577
Chapter 6.2 Critical cleaning – Working with Regulators – From a Regulator’ s Viewpoint	585
Chapter 6.3 Lessons Learned from the Phaseout of Ozone-Depleting Solvents	591
Chapter 6.4 Screening Techniques for Environmental Impact of cleaning agents	599
Chapter 6.5 Health and Safety	615
Section 7	
Glossary of Common Terms and Acronyms	627
Contributors: Background and Contact Information	631
Index	641
