

Contents

1 Semiconductors and Junction Diodes	
2 Basic Principles of Transistors	20
3 Common-base and Common-gate Amplifiers	41
4 Common-emitter and Common-source Amplifiers	53
5 Common-collector and Common-drain Amplifiers (Emitter and Source Followers)	65
6 Bias and D.C. Stabilisation	77
7 Small-signal A.F. Amplifiers	99
8 Large-signal A.F. Amplifiers	120
9 D.C. and Pulse Amplifiers	141
10 I.F. Amplifiers	162
11 Sinusoidal Oscillators	189
12 Detectors, Frequency Changers and Receivers	200
13 Pulse Generators	217
14 Sawtooth Generators	241
15 Digital Circuits	250
16 Further Applications of Transistors and other Semiconductor Devices	272
Appendix A The Manufacture of Transistors and Integrated Circuits	296
Appendix B Transistor Parameters	308
Appendix C The Stability of a Transistor Tuned Amplifier	314
Index	317
