

CONTENTS

Preface V

MODULE 1 MODULATION 1

- Topic 1: Amplitude Modulation 3
- Topic 2: Frequency Modulation 16
- Topic 3: Single-Sideband AM 30
- Topic 4: Phase-Shift Keying 36
- Summary 42
- Review Questions 42
- Problems 45
- Optional Project 1: The Function Generator 47
- Optional Project 2: The Wien Bridge Oscillator 50
- Optional Project 3: Amplitude Modulation 52

MODULE 2 TELECOMMUNICATIONS 55

- Topic 1: The Basic Telephone System 57
- Topic 2: Telephone Circuits 73
- Topic 3: Long-Distance Transmission Systems 87
- Topic 4: Advanced Telephone Equipment 90
- Topic 5: Miscellaneous Telephone Equipment and Accessories 97
- Summary 102
- Review Questions 103
- Problems 106
- Optional Problems 107
- Optional Project 1: Locating the Junction Box 109
- Optional Project 2: Phone Line Voltages 111
- Optional Project 3: The Hold Circuit 113
- Optional Project 4: Transistor Ring Circuits 115
- Optional Project 5: IC Ring Circuit 117
- Back-Up: Telephone Circuit Troubleshooting 119

MODULE 3 DATA COMMUNICATIONS 121

- Topic 1: Introduction to Data Communications 123
- Topic 2: Transmission Conventions 128
- Topic 3: Networks 144
- Topic 4: Communications Hardware 151
- Topic 5: Data Integrity 162
- Topic 6: Special Applications 167
- Summary 170
- Review Questions 171
- Problems 175

Optional Problems	175
Optional Project 1: Parallel and Serial Data	177
Optional Project 2: The Operation of the UART	180
Optional Project 3: The Receiver Section of the UART	185
Optional Project 4: The Data Communications Link	191
Optional Project 5: Data Transmission with Light	194

MODULE 4 FIBER OPTICS 199

Topic 1: How Optical Fibers Work	201
Topic 2: The Step-Index Fiber	206
Topic 3: Variations on the Step-Index Fiber	210
Topic 4: Practical Considerations in Fiber-Optic Communications Systems	213
Topic 5: Applications for Fiber Optics	220
Summary	223
Review Questions	223
Problems	225
Optional Problems	225
Optional Project 1: Optical Fibers	227
Optional Project 2: Data Signals through Optical Fibers	232
Optional Project 3: The IRED	239

MODULE 5 LASERS 241

Topic 1: Introduction to the Laser	243
Topic 2: Basic Concepts of Laser Theory	245
Topic 3: How Lasers Work	258
Topic 4: Laser Applications	270
Summary	281
Review Questions	282
Problems	285
Optional Problems	286
Preparation for the Optional Projects	287
Optional Project 1: Laser Fundamentals	28
Optional Project 2: Diffraction	290
Optional Project 3: Laser Light Show	291
Optional Project 4: Stereo Laser Light Show	292

MODULE 6 SATELLITE COMMUNICATIONS 293

Topic 1: Introduction to Satellite Communications	295
Topic 2: A Brief History of Satellites	302
Topic 3: Satellite Orbits	306
Topic 4: Satellite Systems	320
Topic 5: The Satellite Business	328
Topic 6: Satellite Applications	332
Summary	335
Review Questions	336
Problems	339
Optional Problems	339
Back-Up: Satellite Program Information	341
