

Contents

Preface/v

- 1 Radio Frequency Measurements/1**
 - Introduction/1
 - Fundamental Relationships: System Noise Factor/2
- 2 The Radio Frequency Environment/8**
 - Introduction/8
 - Surface Electromagnetic Ambients/8
 - Airborne Electromagnetic Ambients/30
 - Satellite Electromagnetic Ambients/41
 - References/46
- 3 Radio Propagation Fundamentals/49**
 - Introduction/49
 - Propagation Processes Encountered in Radio Frequency Surveys/50
 - Expressions for and Representation of Radio Propagation Processes/56
 - References/94
- 4 Survey Planning/97**
 - Introduction/97
 - Measurement Objectives and Procedures/97
 - Site Evaluation and Selection/99
 - Data Set Dimensions/132
 - Test Duration Planning/138
 - Measurement Risk Assessment in Power Density Surveying/142
 - References/146
- 5 Characterization of Specialized Test Sites/148**
 - Introduction/148
 - Electromagnetic Measuring Sites/148
 - Measurements/162
 - References/185
- 6 Antennas/186**
 - Antenna Parameters/187

CONTENTS

Relationships between Antenna Parameters/194
Types of Receiving Antennas/204
Antenna Calibration/213
References/231

Receiving Equipment/233

Introduction/233
Receiving System/233
Detector Functions/255
Calibration of the Receiving System Predetection Circuit/265
Detector Calibration/272
Computer Support/274
References/275

8 Survey Execution/276

Introduction/276
Documentation/276
General Procedures of Surveying/289
Power Distribution System Surveys/304
References/311

9 Data Analysis Techniques/312

Introduction/312
Statistical Data Functions/312
Sampling Quantization Error/320
Least Squares Curve Fitting to Measured Data/325
Correlation/333
Signal Signature Correlation Measure/336
References/351

Glossary of Symbols/353

Index/365
