

Contents

Foreword	.iii
Reviewers	.iv
 Interfacial Phenomena and Thermophysics in Microgravity - Part I Mohamed S. El-Genk, Chairman; Thomas R. Reinarts, Co-chairman	
The Two-Phase Extended Evaluation in Microgravity (TEEM) Flight Experiment: Overview and SINDA/FLUINT Modeling <i>Kambiz K. Andish and Kathryn Miller Hurlbert</i>	1
Two-Phase Heat Transport Loop of Central Thermal Control System of the International Space Station "Alpha" Russian Segment <i>Y.I. Grigoriev, E.I. Grigorov, V.M. Cykhotsky, Y.M. Prokhorov, G.A. Gorbenko, V.N. Blinkov, I.E. Teniakov and C.A. Malukhin</i>	9
The Russian Two-Phase Thermal Control System for the International Space Station: Description and Analysis <i>Eugene K. Ungar and Thang D. Mai</i>	19
Prediction of Parameters of the International Space Station Alpha Russian Segment Two-Phase Thermal Control System Under Various Orbit Environmental Conditions <i>Y.I. Grigoriev, V.M. Cykhotsky, Y.M. Prokhorov, O.V. Surguchev, G.A. Gorbenko, V.N. Blinkov, N.A. Brus and E.P. Ganja</i>	25
 Interfacial Phenomena and Thermophysics in Microgravity - Part II Thomas R. Reinarts, Chairman; Mohamed S. El-Genk, Co-chairman	
Flow Boiling in Low Gravity Environment <i>Basil N. Antar and Frank G. Collins</i>	32
Microgravity Heat Transfer and Pressure Drop in Gas-Liquid Mixtures: Slug and Annular Flow <i>L.B. Fore, L.C. Witte and J.B. McQuillen</i>	45
An Experimental Study of Pool Boiling Heat Transfer in Reduced Gravity <i>D.P. Shatto, K.I. Renzi, G.P. Peterson, T.K. Morris and J.W. Aaron</i>	52
Prediction of Annular Two-Phase Flow in Microgravity and Earth-Normal Gravity <i>Thomas R. Reinarts and Eugene K. Ungar</i>	60
Reduced Gravity Two-Phase Flow at a Tee Junction <i>Subash S. Jayawardena</i>	68

Interfacial Phenomena and Thermophysics in Microgravity - Part III
Mohamed S. El-Genk, Chairman; Thomas R. Reinarts, Co-chairman

Characterization of Earth-Gravity Two-Phase Flow in Straight Tubing and 180 ^o Tubing Bends for Microgravity Environment System Design <i>V.M. Sciascia and A.B. Duncan</i>73
Effect of Thermocapillary Convection on Change-of Phase in Reduced and Micro-Gravity <i>Jean-Michel Tournier and Mohamed S. El-Genk</i>	
Microgravity Gas/Liquid Flow Regime Maps: Can We Compute Them From First Principles? <i>Igor Carron and Frederick R. Best</i>	
Thermal Migration of Bubbles Toward a Fluid Interface <i>A. Esmaeeli, G. Tryggvason and V. Arpaci</i>100
Instabilities Around a Bubble Due to Combined Marangoni and Buoyancy Effects <i>Nasser Rashidnia</i>110
 Heat Transfer Issues in Chemical Reactor Design and Operation Anthony G. Dixon, Chairman; James R. Nelson, Co-chairman	
Microchannel Heat Exchangers for Chemical Reactors <i>Anna Lee Y. Tonkovich, Charles J. Call, Daniel M. Jimenez, Robert S. Wegeng, M. Kevin Drost</i>119
Comparison of Correlations for the Wall Heat Transfer Coefficients in a Fixed Bed Reactor <i>Olaf R. Derks and Anthony G. Dixon</i>126
Heat Transfer Measurement for Industrial Packed Bed Tubular Reactor Modeling and Design <i>Von G. Landon, Larry A. Hebert and C. Bryan Adams</i>134
Reactor Stability Analysis: Allowances for Process and/or Coolant Temperature Changes Across the Reactor Cooler <i>James R. Nelson</i>145
 Instrumentation for Particle Fluid Flow Gerald M. Colver, Chairman; John C. Chen, Co-chairman	
Measurement of Liquid Spray Evaporation in Fast Fluidized Beds (Extended Abstract) <i>W. Gu , K. Tuzla and J.C. Chen</i>153
An Application of Electrical Capacitance Tomography to Measure Gas-Solid Motion in a Fluidized Bed <i>S.J. Wang, T. Dyakowski and M.S. Beck</i>155
Analysis of Multiphase Systems Through Particle Image Velocimetry <i>J. Reese, R.F. Mudde, D.J. Lee and L.-S. Fan</i>161
Use of Powder Resistivity as a Diagnostic in Dense Phase Suspensions <i>G.M. Colver</i>168

Two-Phase Flow and Heat Transfer
M. Kawaji, Chairman; Albert M.C. Chan, Co-chairman

Flashing Oscillation in Pool Water <i>Tomoji Takamasa, Koichi Kondo and Tatsuya Hazuku</i>	
Gas Water Bubbly Flow Under Microgravity Conditions <i>Tomoji Takamasa, Masaaki Watarai and Koichi Kondo</i>	.180
Interface Dynamics of Capillary Flow in a Tube and Effects of Gravity-Jitter Under Low-Gravity Conditions Using a MU-300 Airplane <i>Naoki Ichikawa, Masaki Misawa, Kazunori Kawasaki, Shoji Muramatsu, Toshihiro Tada, Masato Koyama and Tomoji Morita</i>	
Direct Numerical Simulation of Turbulence Structure and Heat Transfer Across a Free Surface in Stably Stratified Open-Channel Flows <i>Ryuichi Nagaosa and Takayuki Saito</i>	
Turbulence Structure Under a Typical Shear Induced Wave at a Liquid/Gas Interface <i>M. Nasr-Esfahany and M. Kawaji</i>	
Slug Flow Experiments and Computer Simulation of Slug Length Distribution in Vertical Pipes <i>H.A. Hasanein, G.T. Tudose, S. Wong, M. Malik, S. Esaki and M. Kawaji</i>211

Solar Energy
Virendra K. Mathur, Chairman; James P. Pacheco, Co-chairman

Heat Transfer Performance of a Phase-Change Thermal Energy Storage Water Heater Using Cross-Linked High Density Polyethylene Pellets <i>C.K. Jotshi, J.F. Klausner, D.Y. Goswami, C.K. Hsieh, M.K. Santhosh and F. Colacino</i>220
Test of an Impedance Heating System for Solar Central Receiver Applications <i>James E. Pacheco and William J. Kolb</i>225
Solar Central Receiver Technology: The Solar Two Project <i>Michael R. Prairie, James E. Pacheco, Gregory J. Kolb and J. Paul Sutherland</i>	

Containment Heat Transfer
W. Choe, Chairman; Y.A. Hassan, Co-chairman

Experimental Results for Large-Scale Global Circulations in the HDR-Containment for DBA LOCAs at Different Axial Elevations Part I: Experiment T31.5 <i>L. Wolf and K. Mun</i>	
Experimental Results for Large-Scale Global Circulations in the HDR-Containment for DBA LOCAs at Different Axial Elevations Part II: Experiment E11.5 <i>L. Wolf and K. Mun</i>	
Ice Condenser Containment Analysis With the GOTHIC Code <i>Thomas P. Yadon</i>	

Transient Analysis of Containment Heat Removal at Prairie Island With Boiling in the Fan Coil Tubes
Tom Elicson, Bob Fraser, Don Anderson and Steve Thomas

Improving Containment Mass and Energy Releases for CONTEMPT-LT/028_TU With RELAP5/MOD3
Hugo C. DaSilva and Whee G. Choe

Effect of Closed Loop Cooling Water Transit Time on Containment Cooling
R.P. Smith, J.E. Vossahlik and E.F. Goodwin

Cooling of High Heat Flux Systems
Dae H. Cho, Chairman; Michael L. Corradini, Co-chairman

High Intensity Heat Transfer to a Stream of Monodispersed Water Droplets
M.L. Sawyer, S.M. Jeter and S.I. Abdel-Khalik

Enhancement of Nucleate Boiling Heat Flux on Macro/Micro-Structured Surfaces Cooled by Multiple Impinging Jets
S. Kugler and V.K. Dhir

Film Boiling on a Long Vertical Surface Under High Heat Flux and Water Subcooling Conditions
T. Okkonen, H. Wennerström, S. Hedberg, J. Blomstrand, B.R. Sehgal and W. Frid 294

Experiments and Theoretical Modelling for a Core Catcher Concept for Future Light Water Reactors
W. Tromm, H. Alsmeyer, M. Bürger, W. Widmann and M. Buck

Vapor Explosions in the System of a Water Droplet Impinging onto Melt Surface
Masahiro Furuya, Izumi Kinoshita and Yoshihisa Nishi

Fundamentals of Heat Pipes in Aerospace Applications
Scott Thomas, Chairman; Jay M. Ochterbeck, Co-chairman

Analytical and Experimental Investigations for the Critical Working Frequency of Reciprocating Heat Pipes With Piston Cooling Applications
Yiding Cao, Jian Ling and Qian Wang

An Analysis of the Startup of a Radiatively-Cooled Sodium Heat Pipe from a Frozen State
Jean-Michel Tournier and Mohamed S. El-Genk

Evaluation of a Sodium/Hastelloy-X Heat Pipe for Wing Leading Edge Cooling
Michael A. Merrigan, J.T. Sena and David E. Glass

Effect of Dynamic Shear Stress on Thermosyphon Flooding Limit
Mohamed S. El-Genk and Hamed H. Saber

Quasi-Steady State Thermal Resistance of a Flexible Copper-Water Heat Pipe Subjected to Transient Acceleration Loadings
Scott K. Thomas and Kirk I. Yerkes

Real Process of Heat Exchange: Optimum ΔT and ΔP
Steve Sanderson-Zimmer, Chairman

Turbulent Heat Exchanger ΔT and ΔP
Dan Steinmeyer

.357

Using Pinch Analysis to Save Energy
T.D. Ellis

Design of Exchangers for Integrated Plants
B. Pretty, I. Gibbard and G.T. Polley

Index
