

CONTENTS AND SUBJECT INDEX

COAL CLEANING: AN INTRODUCTION AND OVERVIEW	1
Background	1
Geological Factors Which Affect the Nature of Coal	3
Properties of Coal	4
Specific Gravity	5
Size Stability and Uniformity	5
Grindability	6
Impurities in Coal	6
Coal Reserves	10
Objectives of Coal Preparation	13
Background	13
Current Practice	14
Metallurgical Coke	15
Steam Coal	16
Summary	17
The Preparation Process	18
Overview	18
Sulfur and Its Removal	22 ✓
Introduction	22
Resources of Low-Sulfur Coal	24
Sulfur Forms	24
Controlling Sulfur Oxide Emissions	26 ✓
Sulfur Forms and Coal Washability	26
Sulfur Reduction Potential of Coal Cleaning Devices	29
References	31
LOW TEMPERATURE PROCESSES FOR COAL DESULFURIZATION	33
Introduction	33
Occurrence and Forms of Sulfur	33
Chemistry of Organic Sulfur	37
Chemistry of Inorganic Sulfur	42
Coal Desulfurization Processes	43
Hydrogenation	43

Oxidation47
Sodium Hydroxide Treatment.48
Other Proposals.50
Conclusions.51
SULFUR CONTENT AND SULFUR REDUCTION POTENTIAL OF U.S. COALS52
Present and Potential Availability of Coal52
Coal Reserves in the Rocky Mountain States.53
Physical Coal Desulfurization57
Conclusions.59
References.60
Washability Studies60
Test Procedure62
Collection of Samples62
Sample Preparation.62
Experimental Results64
Washability Data64
Evaluation of Washability Data65
Computer Programs.67
Discussion of Results.67
Northern Appalachian Region Coals67
Southern Appalachian Region Coals70
Alabama Region Coals.72
Eastern Midwest Region Coals.74
Western Midwest Region Coals76
Western Region Coals78
Summary of All Coals80
Conclusions.82
References.83
EPA STUDIES OF COAL QUALITY AND CLEANABILITY84
Introduction84
History of Coal Cleaning84
Washability Studies.89
Experimental Procedure — Collection of Coal Mine Samples.89
Procedure for the Conduct of the Washability Studies89
Washability Computer Program.91
Program Results92
Laboratory and Pilot Studies Evaluating Pyrite Removal Processes.94
Wet Concentrating Table.94
Concentrating Spiral97
Water Cyclone.103
Air Classifier106
Electrokinetics106
Agglomeration-Separation (Oil)109
Froth Flotation.112
Summary and Conclusions115
Washability Studies.115
Summary of Pyrite Removal Studies.121
Prototype Coal Cleaning Plants122
Conclusions.123

Contents and Subject Index

PROCESSES FOR DESULFURIZING COAL127
Hydrogenation127-
Lime as a Getter for Hydrogen Sulfide127✓
Formation of Coal or Coke Pellets or Balls128
Treatment with Hydrogen plus Methane131
Treatment with Oxygen and Steam to Generate Hydrogen134
Treatment in a Closed, Pressurized Cyclic System135
Beneficiation of Low Rank Coals and Lignite137
Using Aqueous Inorganic Acid Following Hydrogenation138
Oxidation141
Reaction with Ferric Chloride Solution141
Treatment with Water and Air143
Treatment with NO ₂ and Other Gases146
Sulfurous Acid as Oxidizing Agent148
Removal of Sulfur as Sulfate150
Treatment with Aqueous Solutions of Metal Oxidants153
Solvent Refined Coal154
Use of Solvent Derived from the Coal Itself154
Formation of Indurated (Hardened) Pellets158
Dissolving Coal in Mixture of CO and Steam160
Pelletized Coal plus High Btu Gas for Steelmaking163
Solidifying Solvent Refined Coal (SRC)167✓
Conversion to Liquid and Solid Fuel170
Aqueous Alkali Treatment173
Treatment with Steam and an Alkali Metal Compound173
Followed by Acidification174
Addition of Oxygen175
Leaching Out Sulfur with Alkali plus Heat177
Other Processes179
Removal of Pyrites by Pretreatment179
Water plus Heat in a Nonoxidizing Atmosphere180
Treatment of Agglomerative Coal to Produce Char and Fuel Gas181
Cascade Reactor183
Two-Stage Froth Flotation185
Using Spent Iron Electroplating Solutions189
Production of Desulfurized Char189
Treatment with Metal Oxides and Metal Chlorides191
Treatment with Undecomposed Iron Carbonyl193
Washing with Certain Polar Compounds194
Use of Ferromagnetic Particles196
Reaction with Metal Sulfides or Polysulfides198
Treatment with Alcohol Having One to Four Carbons199
Autoclaving Treatment for Lignite200
Magnetic Separation of Pyrites202
Flotation with Surfactant203
Desulfurization by Microwave Energy208
COKE DESULFURIZATION PROCESSES212
Metallurgical Coke212
Manganese Oxide as Acceptor for Hydrogen Sulfide212
Hydrogenation of Coal Briquets216
Treatment with Fused Salt219
Simultaneous Coking and Sulfur Removal220

Contents and Subject Index

Calcination of Agglomerates	222
Treatment with Iron and/or Iron Oxide plus Metal Chloride.	223
Treatment with Phosgene or CO plus Cl ₂	226
Treatment with Sulfur Vapor	228
Anode Coke	231
Solution of Coal in Creosote-Type Coal Tar Fraction	231
Solvent Refining Process	233
Combination Coal Deashing and Coking Process	238
Reduction of Sulfur Content in USSR Coals.	241
OTHER DESULFURIZING PROCESSES.	246
Desulfurizing Char.	246
Slurrying with Phosphoric Acid.	246
Using Molten Cresylic Acid plus Caustic	248
With Carbon Dioxide and Water	249
Acid Washing plus Hydrogenation.	251
Solution Mining.	254
Desulfurizing Coal Slurries in a Pipeline	257
Beneficiation of Brown Coal	259
PHYSICAL DESULFURIZATION: A CASE STUDY	262
Introduction	262
Materials and Equipment Used	263
Oil Agglomeration.	265
Effect of Oil	265
Effects of Particle Size	268
Effect of Slurry Concentration	269
Effect of pH and Different Chemical Agents.	270
Froth Flotation.	274
Evaluation of Two-Stage Froth Flotation Process	275
Chemical Comminution.	278
Comparison of Different Beneficiation Methods.	279
Materials	279
Experimental Procedure	279
Conclusions.	281
References.	282
COAL CLEANING WITH SCRUBBING FOR SULFUR CONTROL	284
Introduction	284
Background.	286
Physical Cleaning.	286
Problems.	287
Physical Cleaning with Scrubbing	287
Economic Analyses.	289
Additional Benefits.	291
Summary of Case Results	293
ADDENDUM	299
BIBLIOGRAPHY	301
COMPANY INDEX.	303
INVENTOR INDEX.	304
U.S. PATENT NUMBER INDEX	306
