**FOREWORD /xi**

**PREFACE /xv**

**INTRODUCTION /xxi**

**1 FUNDAMENTALS OF HEAT  
TRANSFER / 1**

Basic Terms and Laws

Units of Measurement

Equation for Heat Transfer for Two or More Thick-  
nesses of Flat Insulation

Insulation

Equation for Heat Transfer Through Two of More  
Thicknesses of Cylindrical Insulation

Equation for Heat Transfer Through One Flat  
Insulation and One Surface Resistance

Equation for Heat Transfer Through Two Different  
Types of Insulations and One Surface Resistance

Heat Transfer through One Flat Insulation with  
Surface Resistances on Each Side

Heat Transfer Through Two Different Types of Flat  
Insulations with Surface Resistance on Both  
Hotter and Colder Sides

Equation for Heat Transfer through One Cylindrical  
Insulation and One Surface Resistance

Equation for Heat Transfer through Two Different  
Types of Cylindrical Insulations and One Surface  
Resistance

Heat Transfer through One Cylindrical Insulation  
with Surface Resistances on Each Side

Heat Transfer through Two (or more) Different  
Materials and Surface Resistances on Innermost  
and Outermost Surfaces

Special Considerations

When Maximum Heat Transfer is Given

Theory of Heat Flow, from or to a Surface

Solution of Heat Transfer Insulation Problems  
Which Have an Unknown Film Conductance

When Insulation Surface Temperature is Given, to  
Find Insulation Thickness

Additional Equations for Free Convection from a  
Surface

Determination of Insulation Thickness Required to  
Prevent Condensation

Solution by Use of Tables and Work Sheet

Film Resistance

Externally Heating or Cooling of Piping or Vessels

Determination of Maximum Distance Between  
Traps for Steam-Heated Tracers

Trapping Distances

Heat Tracing of Vessels

Vessel Tracing-Trapping Distances for Steam  
Tracers Bonded to Vessel with Heat Transfer  
Cement

Electric Tracing Bonded to Pipe or Vessel with  
Heat Transfer Cement

List of Symbols

**2 ECONOMICS OF THERMAL INSULATION/89**

- Frozen Food Industry
- Transportation Industry
- Building
- Process Industries
- Economic Considerations When Insulation is Used to Conserve Energy
- Economic Consideration of Insulating Flanges and Valves
- Economic Thickness of Thermal Insulation Installed on Hot Surfaces
- Insulation Economics in Buildings
- Economic Thickness of Thermal Insulation on Cold Surfaces

**3 FUNCTIONS OF THERMAL INSULATION/127**

- Use by Early Man
- Mechanism of Thermal Insulation
- Types of Insulation
- Insulation Applied to Hot Surfaces
- Insulation on Heat Traced Piping
- Insulations Used to Conserve Heat of Stored Materials
- Insulation Used to Control Surface Temperature
- Insulations on Low-Temperature Surfaces
- Effect of Moisture on Insulations
- Insulation on Cyclic Pipes and Equipment
- Insulation on Low Temperature Spaces
- Insulation Applied in Buildings
- Insulation Used as Fire Protection
- General

**4 PROPERTIES OF THERMAL INSULATION/147**

- Basic Types of Thermal Insulation
- Forms of Mass Insulation
- Properties of Mass Insulations
- Properties (and their Significance) of Rigid and Semi-Rigid Insulations
- Properties of Insulating Cements, Foams, and Insulating Mastics
- Properties of Blanket and Batt Insulation
- Properties of Fill Insulations
- Measurement of Properties of Thermal Insulation
- Reflective Insulation
- Cryogenic Insulation
- Underground Insulation Systems
- Property Tables—Not Including Conductivity
- Property Tables—Conductivity

**5 INSTALLATION REQUIREMENTS/193**

- Evaluation of the Requirements
- Phases
- Mechanical Requirements
- Insulation on Equipment and Pipes
- Miscellaneous

**6 WEATHER-BARRIERS, VAPOR-BARRIERS, INDOOR COVERINGS, AND FINISHES/209**

- Service Requirements
- Types of Weather-Barriers
- Vapor-Barriers
- Reinforcement for Weather-Vapor-Barriers
- Types of Indoor Coverings
- Sealers, Anti-Abrasive Coatings, Caulkings, Adhesives
- Service Requirements Affecting the Selection of Weather-Barriers, Jackets, and Mastic Weather-Barriers
- Application Requirements
- Tests of the Properties of Weather-Vapor-Barriers
- Glossary of Terms Related to Weather-Vapor-Barriers and Coverings

**7 ACCESSORIES/247**

- Insulation Supports
- Securements for Insulation
- Attachment Adhesives
- Insulation Fasteners
- Insulation Reinforcements
- Flashings for Insulation
- Insulation Cradles, Pipe Supports, and Hangers

**8 RELATION OF SYSTEM REQUIREMENTS TO THE DESIGN OF INSULATION SYSTEMS AND TO THE PROPERTIES OF THE MATERIALS USED/267**

- Setting of the Criteria and Establishing the Functions that the Insulation must Perform
- Determination of the Required Properties
- Rigid Materials
- Selection of the Insulation and Accessories which will Fulfill the Requirements of the System
- Determination of the Thickness of Insulation Required

**9 THE PHYSICAL DESIGN OF INDUSTRIAL INSULATION SYSTEMS/305**

Poured-in-place Insulation Systems  
 Blanket Insulation  
 Spray Insulations  
 Rigid Insulations

**10 INSTALLATION SYSTEMS DETAILS/335**

Voids in Insulation  
 Voids and Projections—Cold and Refrigeration Storage Rooms  
 Voids and Projections through Insulation Enclosing Hot Temperature Spaces  
 Internal Insulation of Air Conditioning and Heating Ducts  
 External Insulation on Air Conditioning and Heating Ducts  
 Summary  
 Weather-Vapor-Barrier Details  
 Vapor-Barriers  
 Weather-Barriers  
 Summary

**11 SPECIFICATIONS/355**

Specification Outline  
 Insulation Specification  
 Thermal Insulation Material and Application Specification

**12 CONTRACTS/37**

General Considerations  
 Summary  
 Outline and Check List

**13 INSPECTION AND MAINTENANCE OF INSULATION/391**

Inspection  
 Maintenance

**APPENDIX A GLOSSARY AND DEFINITIONS/405**

**APPENDIX B TABLES/421**

**ADDITIONAL REFERENCES/434**

**INDEX/535**
