

CONTENTS AND SUBJECT INDEX

FLUE GAS DESULFURIZATION	1
Principles of Control	1
Controls for Coal-Fired Boilers	4
Lime/Limestone Wet Scrubbing	4
Double Alkali Process	44
Wellman-Lord Sulfite Scrubbing Process	65
Magnesia Slurry Absorption Process	77
Sodium Scrubbing	87
Processes Under Development	97
Controls for Oil-Fired Boilers	125
References	126
NO_x FLUE GAS TREATMENT	134
Principles of Control	134
Controls for Coal-Fired Boilers	137
Selective Catalytic Reduction—Fixed Packed Bed Reactors	137
Selective Catalytic Reduction—Moving Bed Reactors	137
Selective Catalytic Reduction—Parallel Flow Reactor	137
Absorption-Oxidation	143
Selective Catalytic Reduction—NO _x /SO ₂ Removal	147
Adsorption	158
Electron Beam Radiation	160
Absorption-Reduction	162
Oxidation-Absorption-Reduction	170
Oxidation-Absorption	175
Controls for Oil-Fired Boilers	178
Selective Catalytic Reduction—Fixed Packed Bed Reactors	178
Selective Catalytic Reduction—Moving Bed Reactor	186
Selective Catalytic Reduction—Parallel Flow Reactor	195
Absorption-Oxidation	203
Selective Catalytic Reduction—NO _x /SO ₂ Removal	206
Adsorption	210
Electron Beam Radiation	211

Absorption-Reduction	211
Oxidation-Absorption-Reduction	212
Oxidation-Absorption	213
Controls for Natural Gas-Fired Boilers	214
Selective Catalytic Reduction—Fixed Packed Bed Reactor	214
Absorption-Oxidation	218
References	219
NO_x COMBUSTION MODIFICATION	222
NO _x Formation Mechanism and Principles of Control	223
Thermal NO _x	223
Fuel NO _x	224
Principles of Control	228
Coal-Fired Boilers	229
Applicable Control Techniques for Pulverized Coal-Fired Boilers	232
Applicable Control Techniques for Stokers	241
Oil-Fired Boilers	245
Low Excess Air (LEA)	249
Staged Combustion	249
Flue Gas Recirculation (FGR)	254
Combined Flue Gas Recirculation and Staged Combustion	257
Reduced Air Preheat (RAP)	257
Load Reduction	258
Low NO _x Burners (LNB)	259
Ammonia Injection	266
Gas Fired Boilers	269
Low Excess Air (LEA)	269
Staged Combustion Air (SCA)	272
Flue Gas Recirculation (FGR)	273
Combined Flue Gas Recirculation and Staged Combustion	275
Load Reduction	275
Reduced Air Preheat (RAP)	275
Low NO _x Burners (LNB)	275
Ammonia Injection	276
References	276
PARTICULATE COLLECTION	280
Principles of Control	280
Controls for Coal-Fired Boilers	282
Electrostatic Precipitation	282
Fabric Filtration	302
Wet Scrubbers	313
Mechanical Collectors—Multitube Cyclones	324
Controls for Oil-Fired Boilers	329
Electrostatic Precipitation	329
Fabric Filtration	331
Wet Scrubbing	332
Mechanical Collection	332
Controls for Gas-Fired Boilers	332
References	333
FLUIDIZED-BED COMBUSTION	336
Introduction	336

System Description—Coal-Fired Fluidized-Bed Boiler	337
Mechanisms for SO ₂ Control	338
Mechanisms for NO _x Control	339
Mechanisms for Particulate Control	339
Differences in Possible AFBC Industrial Boiler Designs	341
Impact of Key Design Features	342
Status of Development	345
U.S. Department of Energy Development Programs	345
State of Ohio's Development Program	347
Commercial Availability of Fluidized-Bed Boilers	348
Summary of Existing Fluidized-Bed Units	352
Applicability of Fluidized-Bed Combustion to Industrial Uses	352
Projections of Potential Market for Fluidized-Bed Combustion	355
Recent Improvements and Ongoing Research and Development	355
System Performance—SO ₂ Control	358
Primary Design/Operating Factors Affecting SO ₂ Emission Reduction	358
Secondary Factors Affecting SO ₂ Reduction	367
Other Factors	369
Factors Affecting Boiler Performance	370
System Performance—NO _x Control	371
Factors Affecting NO _x Formation and Emission Reduction	371
Temperature	371
Excess Air	372
Gas Phase Residence Time	373
Fuel Nitrogen	373
Factors Affecting Local Reducing Conditions	374
Coal Particle Size	376
NO _x Emission Data Summary	376
Potential Methods of Enhancing NO _x Control in AFBC Boilers	378
System Performance—Particulate Control	380
FBC Boiler Design Parameters Affecting Particulate Emissions	380
FBC Boiler Operating Factors Affecting Particulate Control Device Performance	383
Particulate Emission Data from AFBC Units	388
Summary of Particulate Emission Data	397
Impacts of Particle Control on Boiler Operation	398
Documentation	398
Pressurized FBC	398
References	398
