

Contents

Foreword	vii
Introduction	1
Part I: General Review	11
The Photovoltaic Effect and Its Utilization, <i>P. Rappaport (RCA Review, September 1959)</i>	13
Historical Development of Solar Cells, <i>M. Wolf (Proceedings of the 25th Power Sources Symposium, May 1972)</i>	38
The History, Design, Fabrication and Performance of CdS Thin Film Solar Cells, <i>F. A. Shirland (Advanced Energy Conversion, October–December 1966)</i>	43
Report and Recommendations of the Ad Hoc Panel on Solar Cell Efficiency, <i>Space Science Board, National Academy of Sciences, National Research Council (Solar Cells: Outlook for Improved Efficiency, 1972)</i>	67
Part II: Solar Cell Theory	87
A New Silicon <i>p-n</i> Junction Photocell for Converting Solar Radiation into Electrical Power, <i>D. M. Chapin, C. S. Fuller, and G. L. Pearson (Journal of Applied Physics, May 1954)</i>	88
Silicon Solar Energy Converters, <i>M. B. Prince (Journal of Applied Physics, May 1955)</i>	89
Theoretical Considerations Governing the Choice of the Optimum Semiconductor for Photovoltaic Solar Energy Conversion, <i>J. J. Loferski (Journal of Applied Physics, July 1956)</i>	96
Thermal Generation of Recombination Centers in Silicon, <i>B. Ross and J. R. Madigan (Physical Review, December 15, 1957)</i>	104
Effect of Temperature on Photovoltaic Solar Energy Conversion, <i>J. J. Wysocki and P. Rappaport (Journal of Applied Physics, March 1960)</i>	110
Limitations and Possibilities for Improvement of Photovoltaic Solar Energy Converters, Part I: Considerations for Earth's Surface Operation, <i>M. Wolf (Proceedings of the IRE, July 1960)</i>	118
Detailed Balance Limit of Efficiency of <i>p-n</i> Junction Solar Cells, <i>W. Shockley and H. J. Queisser (Journal of Applied Physics, March 1961)</i>	136
Series Resistance Effects on Solar Cell Measurements, <i>M. Wolf and H. Rauschenbach (Advanced Energy Conversion, April–June 1963)</i>	146
Drift Fields in Photovoltaic Solar Energy Converter Cells, <i>M. Wolf (Proceedings of the IEEE, May 1963)</i>	171
A New Look at Silicon Solar Cell Performance, <i>M. Wolf (Energy Conversion, June 1971)</i>	191
Photovoltaic Effects in Graded Bandgap Structures, <i>Y. Marfaing and J. Chevallier (IEEE Transactions on Electron Devices, August 1971)</i>	202
The Violet Cell: An Improved Silicon Solar Cell, <i>J. Lindmayer and J. F. Allison (COMSAT Technical Review, Spring 1973)</i>	209
Photovoltaic Effect in Cadmium Sulfide, <i>D. C. Reynolds, G. Leies, L. L. Antes, and R. E. Marburger (Physical Review, October 15, 1954)</i>	230
The Mechanism of the Photovoltaic Effect in High Efficiency CdS Thin-Film Solar Cells, <i>L. R. Shiozawa, G. A. Sullivan, and F. Augustine (Conference Record of the Seventh IEEE Photovoltaic Specialists Conference, November 1968)</i>	231
The Photovoltaic Effect in the Cu-Cd-S System, <i>A. E. vanAerschot, J. J. Capart, K. H. David, M. Fabbriotti, K. H. Heffels, J. J. Loferski, and K. K. Reinhartz (Conference Record of the Seventh IEEE Photovoltaic Specialists Conference, November 1968)</i>	239
Efficiency Calculations of Heterojunction Solar Energy Converters, <i>A. K. Sreedhar, B. L. Sharma, and R. K. Purohit (IEEE Transactions on Electron Devices, March 1969)</i>	250
Photovoltaic Properties of Cu ₂ S–CdS Heterojunctions, <i>W. D. Gill and R. H. Bube (Journal of Applied Physics, August 1970)</i>	254
Review of CdS Solar Cell Activities, <i>W. Palz, J. Besson, T. N. Duy, and J. Vedel (Conference Record of the Tenth IEEE Photovoltaic Specialists Conference, November 1973)</i>	262
CdTe Solar Cells and Photovoltaic Heterojunctions in II–VI Compounds, <i>D. A. Cusano (Solid-State Electronics, May–June 1963)</i>	270
Photovoltaic Effect in GaAs <i>p-n</i> Junctions and Solar Energy Conversion, <i>D. A. Jenny, J. J. Loferski, and P. Rappaport (Physical Review, February 1, 1956)</i>	286
Theoretical and Experimental Evaluations of Ga _{1-x} Al _x As–GaAs Solar Cells, <i>H. J. Hovel and J. M. Woodall (Conference Record of the Tenth IEEE Photovoltaic Specialists Conference, November 1973)</i>	288

Part III: Cell Fabrication	
Evolution of Silicon Solar Cell Design, <i>P. A. Iles (Conference Record of the Ninth IEEE Photovoltaic Specialists Conference, May 1972)</i>	
Contribution to Silicon Solar Cell Technology, <i>R. Gereth, H. Fischer, E. Link, S. Mattes, and W. Pschunder (Energy Conversion, September 1972)</i>	
Design, Fabrication and Characteristics of New Types of Back Surface Field Cells, <i>J. Mandelkorn, J. H. Lamneck, and L. R. Scudder (Conference Record of the Tenth IEEE Photovoltaic Specialists Conference, November 1973)</i>	
The Multiple Junction Edge Illuminated Solar Cell, <i>B. L. Slater, H. W. Brandhorst, Jr., T. J. Riley, and R. E. Hart, Jr. (Conference Record of the Tenth IEEE Photovoltaic Specialists Conference, November 1973)</i>	
Part IV: Space Systems	
Lithium-Doped, Radiation-Resistant Silicon Solar Cells, <i>J. J. Wysocki, P. Rappaport, E. Davison, R. Hand, and J. J. Loferski (Applied Physics Letters, July 1, 1966)</i>	
Silicon Solar Cell Degradation in the Space Environment, <i>R. L. Statler and D. J. Curtin (The Photovoltaic Power and Its Applications in Space and on Earth, International Congress on the Sun in the Service of Mankind, July 1973)</i>	
The Flight of the FRUSA, <i>G. Wolff (Conference Record of the Ninth IEEE Photovoltaic Specialists Conference, May 1972)</i>	
Part V: Terrestrial Applications	
A Plan to Utilize Solar Energy as an Electric Power Source, <i>E. L. Ralph (Conference Record of the Eighth IEEE Photovoltaic Specialists Conference, August 1970)</i>	
Feasibility of Low Cost Silicon Solar Cells, <i>C. G. Currin, K. S. Ling, E. L. Ralph, W. A. Smith, and R. J. Stirn (Conference Record of the Ninth IEEE Photovoltaic Specialists Conference, May 1972)</i>	
Cost Goals for Silicon Solar Arrays for Large Scale Terrestrial Applications, <i>M. Wolf (Conference Record of the Ninth IEEE Photovoltaic Specialists Conference, May 1972)</i>	
Direct Solar Energy Conversion for Terrestrial Use, <i>K. W. Böer (Conference Record of the Ninth IEEE Photovoltaic Specialists Conference, May 1972)</i>	
Design Analysis and Specification of Photovoltaic Solar Terrestrial Power Systems, <i>F. T. C. Bartels and D. W. Moffett (Conference Record of the Tenth IEEE Photovoltaic Specialists Conference, November 1973)</i>	
Appendix A	
Single-Crystal Silicon, <i>P. Rappaport (Proceedings of the Workshop on Photovoltaic Conversion of Solar Energy for Terrestrial Applications, volume I, Working Group and Panel Reports, October 1973)</i>	
Polycrystalline Silicon, <i>T. L. Chu (Proceedings of the Workshop on Photovoltaic Conversion of Solar Energy for Terrestrial Applications, volume I, Working Group and Panel Reports, October 1973)</i>	
CdS/Cu ₂ S Thin Film Cells, <i>K. W. Böer (Proceedings of the Workshop on Photovoltaic Conversion of Solar Energy for Terrestrial Applications, volume I, Working Group and Panel Reports, October 1973)</i>	
Other Materials and Devices, <i>J. J. Loferski (Proceedings of the Workshop on Photovoltaic Conversion of Solar Energy for Terrestrial Applications, volume I, Working Group and Panel Reports, October 1973)</i>	
Systems, <i>C. E. Backus (Proceedings of the Workshop on Photovoltaic Conversion of Solar Energy for Terrestrial Applications, volume I, Working Group and Panel Reports, October 1973)</i>	
Appendix B: Photovoltaic Bibliography
