

CONTENTS

Organizing Committee	
Programme	x:
Moda de los tiempos A. R. Martínez	
Algo nuevo bajo el sol L. E. Alcalá	
Ministro de energia y minas H. C. Berti	
Minister of energy and mines H. C. Berti	
Feasibility of solar-powered refrigeration I. Borde, I. Yaron and M. Jelinek	
Solar cooling by use of desiccants H. I. Robinson and S. H. Houston	25
An opportunity for producing ethanol from municipal cellulose wastes A. J. Parker, Jr. and T. J. Timbario	27
Instalacion de aire acondicionado operado con energia solar para un edificio del litoral central E. Mayer	39
A three and a half ton solar absorption air conditioner's performance in Riyadh, Saudi Arabia A. A. M. Sayigh and B. H. Khoshaim	49
An improved solar cooling system G. D. Mehta	51
Ground solar collector system P. I. Chen	53

Application of solar cooling for a school building in subtropics A. J. Parker, Jr., D. E. Cassel and R. E. Hedden	55
Disminucion de la temperatura de un refrigerante con el calor radiante J. Silveira	77
Use of concentrators in solar power plants G. Guastini	79
Design limitations of solar refrigeration systems of ammonia-water absorption type for very low temperature applications B. J. Huang	81
Net energy analysis of solar energy systems and heat pumps D. Orth and H.-J. Wagner	83
The construction cost of thermal storage for solar systems T. King, J. Carlock and J. Shingleton	95
Basic heat and mass transfer research in solar energy W. Aung	109
Options for cooling using solar energy from flat plate collectors T. E. Alt	111
Earth coupled heat pump J. A. Edwards	13
Solar powered Rankine cycle, dual stage chiller/regenerator improves combined cycle efficiency M. Meckler	115
Overview of energy resources	149
Desarrollo de fuentes alternativas de energia solar en Puerto Rico J. A. Bonnet, Jr.	151
On a prototype solid desiccant air-conditioner and its performance data Matsuki, M. Tatsuoka and T. Tonomura	
Solar absorbent for solar regenerative air drying cooling systems J. A. Theisen	
Optimization of double hollow slab for maximum thermal load levelling A. S. Sodha, A. Kumar, A. Srivastava and G. N. Aiwari	
Thermodynamic humidity control through architecture A. Bowen	
Passive energy systems in Persian and Islamic architecture D. B. Elmer	
Principles for the non-mechanical cooling of buildings A. Bowen	

sive systems for rural areas in developing countries D. B. Elmer	191
Solar driers V. P. T. Chacko	193
Modelling of solar drying R. Kumar and K. V. Mallan	195
Estudio de factibilidad de un secador-almacenador de cereales en Venezuela J. D. Sauzade and F. Allard	197
A finite-difference technique for the analysis of a solar drier G. Kamaraj	215
An analysis of the performance of a silica gel rotary air dryer F. E. Pla Barby	
Perspectivas de las aplicaciones de la energia solar en la industria de los alimentos E. Arias, E. Castro and J. Sevilla	230
Desarrollo de un prototipo para desalacion de aguas Salobres por medio de energia solar R. F. Soto	247
Solar energy for cooling - application in India K. S. Murty	249
Round table discussion P. Obregón, U. Ramírez, F. Pla, K. Matsuki, A. Parker, Jr., R. Martínez and R. Villegas	257
Author Index	267
