

CONTENTS

Preface	v
Basic Concepts and Laws of Thermal Radiation Y. Yener and H. Yüncü	
Radiative Heat Transfer at a Surface Y. Yener and H. Yüncü	
Radiative Heat Exchange Between Surfaces Y. Yener and H. Yüncü	
Availability of Solar Energy Y. Bayazıtoglu	
Optical Properties of Selective Layers C.J. Hoogendoorn	
Solar Radiation Transfer in Semitransparent Materials R. Viskanta	107
Analysis of Ceramic Material Behaviour Under Highly Concentrated Solar Radiation M. Macias	136
Second Law Aspects of Solar Energy Conversion A. Bejan	145
Analysis of Flat Plate Collectors E. Özil and K. Yaşar	188
Slightly Concentrating Solar Collectors T. Çakaloz	214
Predicting Long Term Average Performance of Solar Collectors M. Arıkol and E. Özil	
Second Law Optimization Procedure for Concentrating Collectors M. Zarea and E. Mayer	
Convection Suppression Devices for Solar Thermal Applications C.J. Hoogendoorn and S.J.M. Linthorst	
Laminar and Turbulent Natural Convection in Solar Energy Applications J.P. Coulter and S.I. Guceri	303
Direct Absorption Solar Radiation Collection Systems R. Viskanta	334
Direct Absorption Receiver System for High Temperature R.E. West	361
Design of Liquid Desiccant Dehumidification and Cooling Systems J.R. Howell	374
Active Hybrid Solar Cooling Systems J.R. Howell	388
Solar-Assisted Lithium-Bromide Absorption Cooling Systems W.J. Yang and K.H. Guo	409

VIII

Solar Adsorption Heat Pumps S. Ülku	424
Performance Simulation of a Solar Absorption Air Conditioning System Using Latent Heat Storage E.P. Beyeler and S.I. Guceri	
Solar Thermal Energy Storage E. Paykoç and S. Kakaç	
High Temperature Sensible Heat Storage R.E. West	
Large Scale Energy Storage F. Çomez, R. Oskay and A.Ş. Üçer	
Solar Ponds for Power Generation A. Duyar and S. Peana	507
Design of the C.S.I.C. Research Salt Gradient Solar Pond D. Tinaut and A. Calera	518
Optimal Efficiency of a Solar Pond and A Rankine Cycle System M.H. Cobble and A.R. Shouman	524
Review of Thermosyphon Solar Water Heaters A. Mertol and R. Greif	536
An Investigation of Hydraulic and Thermal Characteristics of a Double-Loop Thermosyphonic Solar Water Heater M. Ünsal and İ. Erdoğan	
An Interpretation Method for Solar Energy Systems Monitored in the System Test Facility A.C. de Geus	
Massive Buildings in the Mediterranean Area—A Shortcut to Passive Solar Applications E.O. Fernandes and E.A.B. Maldonado	
Convective Thermal Rectification in an Air-Filled Parallelogramic Cavity A. Reis and I. Smith	
Integral Transform Solution of a One Dimensional Transient Non-Homogeneous Heat Conduction Problem in the Trombe Wall M. Toksoy and O. Devres	
Solar Drying A.S. Mujumdar	
Low Temperature Drying Systems - Insights on the Evaluation of Their Performance E.O. Fernandes, A.C. Oliveira and A.S. Santos	
Solar Energy Assisted Fluidized-Bed Dryer B. Kilkış	
Solar Thermo Electric Power Systems L. Crespo	
Solar Industrial Process Heat Production E. Özil	707

Economic Analyses of Solar Systems
E. Özil and G. İzmir
