## 1

### Introduction

Energy Sources	1
Nuclear Fuels	3
Fission	4
Reactor Use and Classification	6
Reactor Design Problems	13
Environmental Considerations	16
History	20
The Nuclear Industry	25
References	26

## 2

### Atomic Structure 28

The Atom	28
Binding Energies	31
Relativistic Velocities	34
Energy Levels in an Atom	35
X-Rays and Bremsstrahlung	40
Atomic Bonding	41
Nuclear Structure and Binding Forces	42
Problems	44
References	45

## 3

### The Decay of Radioactive Nuclei 46

Natural Radioactivity	46
Radioactive Decay Processes	48
Complex Decay Schemes	54
Decay Rates and Half-Lives	55

*iv Contents*

Compound Decay	58
Problems	64
References	66

**4**

**Nuclear Reactions 67**

The Compound Nucleus	67
Fission	74
Tritium as a Ternary Fission Product in Power Reactors	76
Conversion of Fertile Nuclei	77
Fusion	78
Inertial Confinement Fusion	87
Transuranium Elements	89
High-Energy Reactions	92
Bubble Chambers	92
Particle–Antiparticle Pairs	94
Classes of Particles	96
Production and Decay of Strange Particles	99
Problems	107
References	108

**5**

**Radiation Detection 110**

Heavy Charged Particles	110
Light Charged Particles ( $\beta$ )	114
Gamma ( $\gamma$ ) and X-Rays	118
Neutrons	120
Electrostatic Charge Accumulating Instrument (Dosimeter)	121
Simplest Ionization-Type Detector	121
Ion Chambers	123
Proportional Counters	124
Geiger–Müller Counters	126
Scintillation Counters	128
Neutron Detectors	131
Fission Chambers	132
Fast-Neutron Detectors	133
Solid-State Detectors	133
Thermoluminescent Dosimetry	137

Statistics 139  
Problems 142  
References 143

## 6

### Health Physics and Biological Radiation Effects 145

Units and Measurements 146  
Exposure and Biological Damage 150  
External Effects, Internal Effects, and Treatment 153  
Low-Level Effects 155  
Exposure Protection Guides 158  
Shielding 159  
Problems 165  
References 166

### Radioisotope Application 169

Categories of Radioisotopes 169  
Industrial Applications 170  
Power Generators 174  
Thermoelectric Converters 176  
Thermionic Converters 181  
Isotope Fuels 183  
<sup>14</sup>C Carbon Dating 186  
Food Processing 187  
Agriculture 189  
Medicine 190  
Problems 192  
References 193

## 8

### Neutron Interactions 195

Cross Sections 195  
Neutron Interactions 195  
Attenuation of a Neutron Beam 197  
Mean Free Path 198

Neutron Cross Sections	200
Thermal Neutron Velocity (Energy) Distribution	202
Corrected Absorption Cross Sections	207
Neutron Flux	208
Neutron Activation	209
Neutron Activation Analysis	213
Flux Determination by Foil Irradiation	215
Neutron-Capture Gamma Analysis	218
Polonium Production	220
Tritium Activation in Borated Water	225
Slowing Down of Neutrons	226
Scatter in the COM System	231
Logarithmic Energy Decrement	232
Macroscopic Slowing-Down Power	235
Moderating Ratio	235
Average Value of the Cosine of the Scattering Angle	237
Transport Mean Free Path	238
Problems	239
References	241

## **9**

### **The Steady-State Reactor Core 243**

Infinite Multiplication Factor	243
Four-Factor Equation	244
Calculation of Response Escape Probability	247
Heterogeneous Cores	252
Neutron Current Density	253
Development of Diffusion Equation	257
Infinite Slab Reactor	261
Flux Distribution in a Rectangular Parallelepiped	265
Spherical Reactor Core	268
Power Developed by a Spherical Core	271
Cylindrical Core	272
Reflected or Blanketed Reactor Cores	273
Spherical Core with Finite Blanket (or Reflector)	274
Two-Group Theory	282
Comparison of One-Group, Modified One-Group, and Two-Group Theory for a Molten Salt Core	287
Subcritical Blanket for Molten Salt Core	290
Fast Reactors	291

One-Group Theory for Fast Cores 291  
 Fast Core Blanket 293  
 Multigroup Calculations 295  
 Problems 295  
 References 298

## 10

### Transient Reactor Behavior and Control 299

Neutron Lifetime 299  
 Reactivity 301  
 Delayed Neutrons 303  
 Average Neutron Lifetime 304  
 Effect of Delayed Neutrons 305  
 Diffusion Equation for a Transient Reactor 306  
 Units of Reactivity 309  
 Limiting Cases of  $\Delta\kappa_{\text{eff}}$  311  
 Natural Reactivity Changes 312  
 Temperature Effects on Reactivity 313  
 Fission Product Accumulation 318  
 Fission Product Poisoning After Shutdown 322  
 Chemical Shim and Volume Control 325  
 Fuel Depletion 325  
 Reactivity Change in a Uranium Reactor 326  
 Control of Power Distribution 328  
 Reactivity Changes in Fast Reactors 330  
 Doppler Effect 331  
 Sodium Void Coefficient 334  
 Fuel Rod Expansion 336  
 Problems 337  
 References 338

## 11

### Radiation Damage and Reactor Materials Problems 340

Radiation Damage to Crystalline Solids 340  
 Amorphous Materials 343  
 Number of Atom Displacements per Neutron  
 Scattering Collision 344  
 Temperature and Mobility Effects 347  
 Increase in Transition Temperature for  
 BCC Metals 348

*viii Contents*

Stainless Steels in Fast Reactors	351
Comparison Between Thermal and Fast-Neutron Damage	356
Graphite	360
Nuclear Fuels	365
Fuel Densification	382
Other Major Causes of Fuel Defects	384
Dispersion-Type Alloys	384
Metallic Fuels for Fast Breeders	395
Problems	396
References	397

## 12

### **Nuclear Heat Transfer 400**

Heat Transfer from Fuel Elements	400
Temperature Distribution Along a Fuel Rod in a Cooling Channel	408
Burnout in Water-Cooled Reactors	411
Boiling	411
Use of DNB-1 Data in Design	417
Nuclear Superheat	420
Liquid Metals	424
PWR Superheat	425
LMFBR Steam Generators	428
Problems	437
References	439

## 13

### **Nuclear Reactors 441**

Fuel Burnup	442
Nuclear Power Costs	444
Pressurized Water Reactors	453
Boiling Water Reactors	464
Dual-Cycle BWR	472
Comparison of Dual- and Single-Cycle BWRs	474
Gas-Cooled Reactors	484
Direct-Cycle Gas Turbine Cycles	480
Pressurized Heavy Water Reactors	487
MSBR: A Thermal Breeder Reactor	495
Fast Reactors	500

Pumped Storage for Peaking Power 523  
Fusion Reactors 523  
Inertial Confinement Fusion Reactor 527  
Fusion-Fission Symbiosis 529  
Problems 529  
References 532

## **14**

### **Selected Topics in Reactor and Fuel Cycle Technology 536**

Thermal Discharges 536  
The Accident at TMI-2 545  
Loss of Coolant Accidents 550  
Reactor Accident Risks 555  
Diversion-Resistant Fuel Cycles 558  
Radioactive Waste Disposal Management 565  
Problems 573  
References 574

### **Appendix A**

### **Appendix B**

### **Appendix C**

### **Appendix D**

### **Appendix E**

### **Appendix F**

### **Appendix G**

### **Answers to Selected Problems 593**

### **Index 598**
