

Contents

C418/035	Strength criteria for steel silo structures J M Rotter	1
C418/048	Silo-quaking – a pulsating load problem during discharge in bins and silos À W Roberts, O J Scott and S J Wiche	
C418/016	Techniques to assist in the in-plant handling of slurries, pastes and cakes N I Heywood	13
C418/017	Ash handling on large power stations in South Africa – the material, the equipment, the changes A G Lorenzato	25
C418/025	The transmission of vibration through wet particulate solids H P Van Kuik, A J Matchett, J M Coulthard and J Peace	35
C418/011	Techniques for assessing the flowability of sodium carbonate (soda ash) D Geldart, R Gautier and N Rolfe	41
C418/026	Friction and adhesion at bulk solids/wall interfaces A R Mason, A J Matchett and J M Coulthard	49
C418/028	Electrostatic problems in powder handling D K Davies and V Ebedat	55
C418/061	The relative economics of bulk transport by alternative modes J M Manning	59
C418/021	Transportation of solids using vibratory troughs G A Green and N Hall	81
C418/058	The study of the relationship between belt speed, pulling force and the motor power of the belt conveyor G-B Li	91
C418/055	Fine powder flow phenomena in bins, hoppers and processing vessels T A Royal and J W Carson	95
C418/038	Design of large underground ore bins O J Scott and P R Choules	103
C418/046	Determining screw feeder geometry for specified hopper draw-down performance A W Roberts	111
C418/044	Pneumatic conveying technology improving Australian bulk handling operations O C Kennedy, P W Wypych and P C Arnold	117
C418/053	Latest techniques for the design of reliable and energy efficient pneumatic conveyors M S A Bradley and A R Reed	125
C418/019	Evaluation of a flow control system for granular materials using the electromechanical valve for solids C M Martin and M Ghadiri	131
C418/024	Bulk weighing – value for money J P Kelly	139

- C418/051 **The automated measurement of the volumetric contents of stockpiles contained in large 'A' frame facilities**
R N Barnes
- C418/012 **Conveyor transfer chute performance and design**
P C Arnold and G L Hill
- C418/057 **Techniques to improve the efficiency of bulk solids conveyors**
R P Stahura
- C418/004 **The conveying technique of the 1990s. An enclosed belt conveyor which can run round sharp corners**
R Johansson
- C418/036 **Mechanical behaviour of wheat under storage stress histories**
J Y Ooi and J M Rotter
- C418/039 **Confidence intervals in mass flow hopper design**
O I Scott
- C418/037 **Measured pressures in full-scale silos: a new understanding**
J Y Ooi and J M Rotter
- C418/023 **A field study on the dust emission from a coal storage and handling site**
E I. M Vrins
- C418/064 **Microfoam – innovative dust control**
H C Cole and F W Parrett
- C418/006 **Blending and train loading of bulk iron ore: a case study**
R Attwood
- C418/018 **Computer simulation of ballistic separation**
C Hogue and D E Newland
- C418/059 **Dust, mess and spillage – an intractable or solvable problem?**
H N Wilkinson
- C418/040 **Preliminary results of a new dust deposition monitor**
E J Van Zuylen, L A M Ramaekers and T C J Van der Weiden
- C418/003 **Dust controlled loading and stockpiling of dry bulk materials**
S W Downing
- C418/056 **Techniques of in-bin blending**
J W Carson and T A Royal
- C418/049 **Design of bins and feeders for anti-segregation and blending**
A W Roberts
- C418/015 **Microstructural effects on stress and flow fields of equal density granules in hoppers**
U Tüzün and P Arteaga
- C418/054 **Stepped pipelines – a new lease of life for lean phase pneumatic conveyors**
M S A Bradley and A R Reed
- C418/063 **Towards improved design for bulk solids handling plant**
L Bates
- C418/013 **Handling plant for bulk solids – improved productivity through a systems approach to design**
P C Arnold
- C418/005 **Pneumatic conveying: system types and components**
R Velan
