

TABLE OF CONTENTS

	<u>Page</u>
FOREWORD	iii
I. INTRODUCTION	1
1. General Considerations on Cold Storage	1
2. Cold Stores	2
3. Considerations on Refrigeration Plants	2
II. CALCULATION AND DESIGN OF A COOLING PLANT FOR FRUIT AND VEGETABLES	5
1. General arrangement of the Project	5
2. Sample Calculation for Refrigeration Duty Plant	7
A) Space	7
B) Storage Condition	8
C) Rate of Intake	8
D) Head Flow through Insulated Surface	8
E) Infiltration of External Air	9
F) Heat Load from Electrical Motors for Fans and from Lights	9
G) Respiratory Activity of Fruit	9
H) Summary of Heat Load	9
I) Sensible and Latent Heat	10
J) Capacity of Air Cooling Units	10
K) Air Circulation Conditions	10
III. MAINTENANCE OF PLANT	11
IV. SUPERVISION OF A REFRIGERATION PLANT	13
1. Erection and Installation of the Plant	13
2. Testing and Commissioning of the Plant	13
3. Operation	14
4. Maintenance Programme	14
A) Compressors and Motors	14
B) Pumps	15
C) Condensers	15
D) Evaporators	15
E) Piping	15
F) Pressure Vessels	15
G) Insulation and Doors	15
V. ADDITIONAL EQUIPMENT FOR TRANSPORT AND FIELD TESTS	16
1. Measurements	16
2. List of Test Instruments	16
3. Estimated Costs	19

	<u>Page</u>
VI. DRAFT SPECIFICATIONS FOR A REFRIGERATED CARGO CONTAINER	20
Use of Containers	20
2. Dimensions	20
3. Functions	20
4. Motor Generator	21
5. Insulation and Construction	21
6. Miscellaneous	22
7. Cost	22
VII. TARIFF FOR COLD STORAGE	23
1. Average Costs	23
2. Tariff Calculation	23
Quotations for Plant	24
VIII. INSPECTION SERVICE FOR COLD STORES	25
1. Need for an Inspection Service	25
2. Organization and Duty of the Inspection Service	25
3. Information to be supplied to the Inspection	26
SELECTED REFERENCES	29
APPENDIX	
i. Specification for the Supply and Installation of an Automatic Refrigeration Plant	30
ii. Comments on the Specifications for the Supply of the Plant	36
iii. Measure Instruments and Test Equipment	40
iv. Charts	42
FIGURES
