

CONTENTS

(Paragraph Headings are given on the first page of each chapter)

Introductory page 1

Chapter

PART A. PRINCIPLES

- | | | |
|---|---|----|
| 1 | The centrifugal pump impeller: ideal conditions | 8 |
| 2 | Flow conditions in the impeller | 20 |
| 3 | Mixed-flow and axial-flow rotors | 35 |
| 4 | The recuperator: the complete pump | 47 |
| 5 | Standards of comparison for pumps | 57 |

PART B. DESIGN AND CONSTRUCTION

- | | | |
|----|---|-----|
| 6 | General problems of pump design | 71 |
| 7 | Construction of centrifugal pumps | 77 |
| 8 | Mixed-flow and axial-flow pumps | 118 |
| 9 | Pumps with multiple rotors
(<i>Multi-stage pumps, etc.</i>) | 139 |
| 10 | Pumps for special duties
(<i>Underground pumps, pumps for hot or impure liquids, self-priming pumps, etc.</i>) | 157 |

PART C. PERFORMANCE

- | | | |
|----|--|-----|
| 11 | Definitions and Terminology
(<i>Estimation of head, efficiency, etc.</i>) | |
| 12 | Testing of pumps | 211 |
| 13 | Performance under design conditions
(<i>Analysis of power losses, etc.</i>) | 235 |
| 14 | Performance under reduced-flow and increased-flow conditions
(<i>Characteristic curves, etc.</i>) | |
