Preface

Failure types, investigation and occurrences

<i>1.1 Introduction</i>	
<i>1.2 System failure and component failure</i>	
<i>1.3 Failure decisions</i>	
<i>1.4 Failure classifications</i>	
<i>1.5 Types of failure</i>	3
<i>1.6 Failure investigations</i>	
<i>1.7 Failure case studies</i>	6
<i>1.8 Human factors in failure incidents</i>	13

2 Causes of failure 16

<i>2.1 Introduction</i>	16
<i>2.2 Service failures</i>	16
<i>2.3 Fatigue</i>	18
<i>2.4 Excessive deformation</i>	23
<i>2.5 Wear</i>	28
<i>2.6 Corrosion</i>	32
<i>2.7 Blockage, sludges</i>	35
<i>2.8 Blockage in cooling systems</i>	35
<i>2.9 Design, manufacturing and assembly causes of failure</i>	37

3 Fault detection sensors 41

<i>3.1 Introduction</i>	41
<i>3.2 Contaminant monitoring</i>	41
<i>3.3 Corrosion monitoring</i>	41
<i>3.4 Force monitoring</i>	43
<i>3.5 Gas leakage monitoring</i>	45
<i>3.6 Air pollution monitoring</i>	47
<i>3.7 Liquid contamination monitoring</i>	51
<i>3.8 Non-destructive testing techniques</i>	53
<i>3.9 Optical examination</i>	55
<i>3.10 Temperature sensing</i>	56
<i>3.11 Particle testing</i>	58
<i>3.12 Proximity monitors</i>	59
<i>3.13 Sound monitoring</i>	61
<i>3.14 Vibration transducers</i>	62
<i>3.15 Telemetry</i>	67

4	Data processing and analysis	76
4.1	<i>Introduction</i>	76
4.2	<i>Fourier analysis</i>	77
4.3	<i>Frequency analysis techniques</i>	87
4.4	<i>Derived functions</i>	88
5	Vibration analysis	100
5.1	<i>Introduction</i>	100
5.2	<i>Vibration-simple harmonic motion concept</i>	103
5.3	<i>Vibration signature of active systems</i>	105
5.4	<i>Vibration monitoring equipment</i>	107
5.5	<i>System monitors and vibration limit detectors</i>	113
5.6	<i>Vibration monitoring experience</i>	117
5.7	<i>Critical vibration levels</i>	132
6	Sound monitoring	142
6.1	<i>Introduction</i>	142
6.2	<i>Sound frequencies</i>	146
6.3	<i>Sound loudness measurement</i>	150
6.4	<i>Acoustic power</i>	151
6.5	<i>Sound measurement</i>	152
6.6	<i>Magnetic tape recorders</i>	153
6.7	<i>Sound level meters</i>	155
6.8	<i>Sound analysers</i>	156
6.9	<i>Sound signal data processing</i>	157
6.10	<i>Sound monitoring</i>	157
7	Discrete frequencies	179
7.1	<i>Introduction</i>	179
7.2	<i>Simple vibrations</i>	183
7.3	<i>Transverse vibrations of bars – approximate frequency calculations</i>	188
7.4	<i>More precise evaluations – overtones</i>	192
7.5	<i>Torsional oscillation of flywheel-bearing shafts</i>	195
7.6	<i>Belt drives</i>	204
7.7	<i>Whirling of marine line shafting</i>	206
7.8	<i>Gear excitation</i>	209
7.9	<i>Rolling element bearing</i>	216
7.10	<i>Blade vibration</i>	220
7.11	<i>Cam mechanism vibration</i>	221
8	Contaminant analysis	231
8.1	<i>Introduction</i>	231

8.2	<i>Contaminants in used lubricating oils</i>	231
8.3	<i>Carrier fluid degradation</i>	235
8.4	<i>Contaminant monitoring techniques (wear processes)</i>	237
8.5	<i>Oil degradation analysis</i>	238
8.6	<i>Abrasive particles in lubricating oil</i>	240
8.7	<i>Abrasive particles in bearings</i>	240
8.8	<i>Abrasive particles in hydraulic systems</i>	241
8.9	<i>Dissolved gas fault monitoring</i>	245
9	SOAP and other contaminant monitoring techniques	250
9.1	<i>Introduction</i>	250
9.2	<i>Spectrometric oil analysis procedure</i>	250
9.3	<i>Magnetic chip detectors</i>	260
9.4	<i>'Ferroglyph' particle precipitation</i>	270
9.5	<i>STM control kit</i>	274
9.6	<i>Used oil blotter test</i>	275
9.7	<i>Thin-layer chromatography</i>	276
9.8	<i>Capacitative oil debris monitor</i>	276
9.9	<i>X-ray fluorescence detection of contamination (XRF)</i>	277
9.10	<i>X-ray photoelectron spectrometry</i>	277
9.11	<i>Particle classification</i>	278
10	Performance trend monitoring	284
10.1	<i>Primary monitoring – performance</i>	284
10.2	<i>Primary and secondary performance parameters</i>	290
10.3	<i>Performance trend analysis</i>	298
10.4	<i>Turbine gas path performance monitoring thermodynamics</i>	301
10.5	<i>Steam turbine performance analysis</i>	310
10.6	<i>Case studies in performance monitoring</i>	313
10.7	<i>Performance monitoring systems</i>	323
11	Static testing	331
11.1	<i>Introduction</i>	331
11.2	<i>Visual testing</i>	331
11.3	<i>Liquid penetrant inspection</i>	337
11.4	<i>Thermal methods</i>	338
11.5	<i>X-ray photography</i>	338
11.6	<i>Sonics</i>	344
11.7	<i>Ultrasonics</i>	344
11.8	<i>Stress wave emission</i>	348
11.9	<i>Magnetic testing methods</i>	351
11.10	<i>Electrical NDT techniques</i>	356
11.11	<i>Eddy current testing</i>	357
11.12	<i>NDT selection</i>	357

12 Monitoring systems in operation	367
12.1 <i>Introduction</i>	367
12.2 <i>Marine monitoring systems</i>	367
12.3 <i>Marine condition monitoring requirements</i>	370
12.4 <i>Marine diesel engine monitoring</i>	372
12.5 <i>Marine turbine monitoring systems</i>	379
12.6 <i>Shipboard vibration monitoring</i>	382
12.7 <i>Spectrometric oil analysis programme – marine</i>	384
12.8 <i>Monitoring integrity verification</i>	384
12.9 <i>Aircraft condition monitoring</i>	386
12.10 <i>Condition monitoring – generating plant</i>	395
12.11 <i>Automotive diagnostic equipment</i>	395
12.12 <i>Systematic fault monitor selection</i>	399
13 Fault analysis planning and system availability	404
13.1 <i>Introduction</i>	404
13.2 <i>Availability</i>	423
13.3 <i>Failure prediction/reliability assessment</i>	428
13.4 <i>Hazard rate curve</i>	433
13.5 <i>Complex system reliability – Monte Carlo simulation</i>	438
13.6 <i>Hazardous chemical plants – high integrity protective systems (HIPS)</i>	439
14 Reliability/failure concepts	443
14.1 <i>Introduction</i>	443
14.2 <i>Probability of reliability and failure</i>	444
14.3 <i>Failure pattern-exponential distribution</i>	448
14.4 <i>Load and strength – statistical distribution</i>	454
14.5 <i>Reliability assurance – BS 9000 system</i>	457
15 Reliability data sources	459
15.1 <i>Introduction</i>	459
15.2 <i>Systems Reliability Service (SRS)</i>	461
15.3 <i>Failure data</i>	469
15.4 <i>Environmental influences on instrument failure rates</i>	475
15.5 <i>Failure data—confidence level</i>	476
Index	170
