

● CONTENTS

1	Classification of Anti-Friction Bearings	1
2.	Bearing Selection and Application	
3.	Design and Characteristics of Ball and Roller Bearings	
4.	Bearing Materials	9
5.	Bearing Loads	10
	Radial and thrust loads	10
	Bearing loads due to transmission of power	10
	Belt factors	11
	Gear factors	11
	Impact factors	11
	Distribution of radial loads	12
	Equivalent load	13
	Equivalent thrust load	17
	Pressure center	17
	Contact angle and induced thrust	18
6.	Load Capacity and Fatigue Life of Anti-Friction Bearings	19
	Life under changing load and speed	20
	Bearing life for typical machines	21
	Bearings for high temperatures	21
	Static load ratings	22
	Life calculation examples	25
7.	Boundary Dimensions and Tolerances of Ball and Roller Bearings	28
	Boundary dimensions	29
	Special bearings	29
	Measurement of ball and roller bearings	31
	Bore diameter of inner ring	31
	Outside diameter of outer ring	32
	Width of individual rings	32
	Radial run-out of inner ring	33
	Radial run-out of outer ring	33
	Reference side run-out with bore	33
	Groove run-out with reference side of inner ring	34
	Groove run-out with reference side of outer ring	34
	Radial run-out for precision grade deep groove ball bearings, Angular contact ball bearings and Tapered roller bearings	34
	Measurement of internal bearing clearance	35
	Tolerances of ball and roller bearings (JIS)	37
	Tolerances of tapered roller bearings (JIS)	41
	Radial bearing boundary dimensions (ISO)	44

8. Shaft and Housing Fits and Internal Clearance52
Importance of shaft and housing fits52
Influence of load on shaft and housing fits52
Influence of temperature on fits53
Selection of shaft and housing fits53
Force required for mounting and dismounting bearing rings	.60
Internal bearing clearance60
9. Performance Characteristics of Ball and Roller Bearings68
Friction torque .	.68
Temperature rise	.69
Bearing rigidity .	.72
10. Shaft and Housing Design .	76
Design of shaft	76
Design of bearing housing .	84
Fixed and floating bearings	85
. Lubrication Requirements and Design	.89
Grease vs. oil89
Limiting speed of rotation89
Design for grease lubrication91
Design for oil lubrication93
Lubricants98
Greases98
Oils99
12. Seal Design	101
Contact seals ...	101
Non-contact seals	102
13. Handling of Bearings	106
General	106
Mounting of bearings	107
Running test	110
Dismounting of bearings ..	112
Cleaning of bearings	113
Inspection of used bearings	114
