PREFACE TO THE SECOND EDITION	
PREFACE TO THE FIRST EDITION	vi
CHAPTER 1	
GEARS AND GEAR CUTTING PRACTICE	
Gears and Gear Cutting—Steel and Other Materials—Tooth Curves and Pressure Angles—Shapes of Gear Teeth—Names of Parts—Profiles of Gear Teeth—Terms Commonly Used—Pitch Diameter—Measuring Tooth Depth—How Gear Teeth are Laid Out—Gear Cutting Methods—How Gears Are Measured—Proportions of Gear Teeth—Diameter Increments—Proportions of Stub Teeth—Proportions of Metric Gear Teeth—Tables of Tooth Parts—Corrected Addendum and Thickness of Teeth—Chordal Thickness and Addenda—Standard Backlash Practice—Measuring Backlash—Gear Blanks—How Design Affects Production—Cutting Oils and Compounds—Automobile and Other Gears—Steel and Other Materials—Nonmetallic Gears and Pinions—Standard Keyways—Recommended Practice for Hobs.	
CHAPTER 2	
SPUR GEARS AND CIRCULAR CUTTERS	55
Cutting Spur Gears—Formed Cutters—Gear Cutting in the Milling Machine—The Principles of Hobbing—Hobbing vs. Milling—Cutting Gears by the Hobbing Process—Setting up Hobbing Machines—Estimating Production—Feeds and Speeds—Division of Operating Time—Estimating Cutter Approach—Stabilizer for Hobbing Machines—Gould & Eberhardt Gear Hobber—Gearing Hobber for Cutting Gears—Lees-Bradner Gear Hobber—Semi-automatic Gear Hobbers—Standard Hob Sizes for Spline-shaft Hobs—Hobbing Spline Shafts—Spline-shaft Hob Limits—Hobbing Taper Splines—Standardized Hobbing.	
CHAPTER 3	
THE SHAPING METHOD OF CUTTING GEARS.	103
Fellows Gear Shaper—Action of the Cutter—Cutting Speeds—Details of the Fellows Machine—Setting up the Machine—Holding Gears for Cutting—Examples of Gear Shaper Work—The Sykes Gear Generator—Examples of Large and Small Work.	

	PAGE
CHAPTER 4	
HELICAL AND HERRINGBONE GEARS.	118
Advantages of Helical Gears—Hobbing Machines for Helical Gears—Real Pitches of Helical Gears—Spur-gear Cutters for Helical Gears—Helical-gear Tables—Helical-hobbing-machine—Calculations—Arrangement of Gears on Gould & Eberhardt Machine—Formulas and Tables for Helical Gears—Accuracy of Helical Gears—American Gear Manufacturers Association Standards for Herringbone Gears.	
CHAPTER 5	
HOBBS AND CUTTERS.	142
Hobs, Terms Used by Hob Makers—Hobs for Gear Cutting—Straight and Taper Hobs—Taking One or Two Cuts—Tolerances of Ground Hobs—Positioning of Hobs—Sharpening and Maintenance—Hob Data Chart—Worm-gear Hobs—Sharpening Gear Shaper Cutters.	
CHAPTER 6	
BEVEL GEARS	164
Names of Parts of Teeth—Cutting Bevel Gears in the Milling Machine—Cutters for Right-angle Gears and Pinions—Roughing Out Bevel Gears—Gleason Bevel-gear Generator—Cutting Spiral-bevel Gears—Spiral-bevel-gear Generator—Finishing Spiral-bevel Gears—Bearing of Teeth—Bevel-gear Assembly—Chucks and Mandrels for Bevel Gears.	
CHAPTER 7	
WORMS AND WORM GEARS.	192
Cutting Worm Wheels in the Milling Machine—Cutting Small Worm Wheels—Cone Worm Gears—Rules and Formulas for Worm Gears—Cutting Worm Wheels on Hobbing Machine—Worm Threads—Lead Gears for Diametral Pitch Worms—Proportion of Worm Threads—Worm-thread Measurement—Cutting Hourglass Worms.	
CHAPTER 8	
INTERNAL GEARS.	210
Methods of Cutting Internal Gears—Clearance Grooves in Internal Gears—Calculating Elements of Internal Gears—Internal Clutch Gears—Smallest Number of Teeth Cut.	
CHAPTER 9	
BURNISHING, SHAVING, LAPPING AND GRINDING GEAR TEETH.	230
Gear-tooth Burnishing—Gear-tooth Shaving—Rotary Crossed-axis Shaving—Fellows Process—Lapping Spur and Helical Gears—Gear-lapping Practice—Modern Gear-lapping Methods—Lapping	

CONTENTS

Spiral Bevel Gears—Lapping Compounds—Grinding Helical Gears—Stock Control on Spiral Bevel Gears—Formed Wheels for Gear-tooth Grinding—Gears for Automobile Transmissions—Grinding Bores at Gears—Gear-holding Chucks.

CHAPTER 10

HEAT TREATMENT OF GEARS. 255
Continuous Cyaniding—Wearing Qualities of the Case—How Buick Handles Gear Steels—Controlled-atmosphere Hardening Furnaces—Ring-gear Quenching Machine and How It Operates—Heat Treatments for S.A.E. Gear Steels.

CHAPTER 11

INSPECTION METHODS. 271
Gear-inspection Equipment—Involute Profile Measuring Machine—Finding Base Circle and Transverse Pitch of Helical Gears—Inspecting Worms—Inspecting Bevel Gears—Helical-lead Checking Machine—Helical Gear-tooth Measuring—Pin Measurements for Gear-tooth Inspection—Red Liner Inspection Machine—Charts from Different Gears—Inspecting Gears with Theoretically Correct Rack—Accuracy in Gear Gaging—Standard A. G. M. A. Nomenclature.

GEARING USED IN INDEXING 325

INDEX 335

WARTIME DATA SUPPLEMENT. 345
Bevel-gear Developments—The Formate Gear Tooth—Grinding Hypoid Gear Teeth—Angle of Worm Threads—Gear Shaper for Small Pinions—Fine-tooth Gears—Flame Hardening of Gear Teeth—The Gleason Methods.

INDEX TO THE WARTIME DATA SUPPLEMENT 369
