

## CONTENTS

	Page
<b>Preface</b>	<b>ix</b>
<b>Overview: Problems and Opportunities in Tribology</b>	<b>xi</b>
APPLICATIONS OF SURFACE DIAGNOSTIC TECHNIQUES	
1. <b>Surface Diagnostic Techniques Commonly Used in Tribological Studies</b>	<b>2</b>
2. <b>Chemical and Tribological Behavior of Thin Organic Lubricant Films on Surfa</b>	<b>15</b>
3. <b>The Influence of Steel Surface Chemistry on the Bonding of Lubricant Films</b>	<b>43</b>
4. <b>Tribological Evaluation and Analysis of Coating Materials</b>	<b>58</b>
5. <b>Counterface Material and Ambient Atmosphere: Role in the Tribological Performance of Diamond Films</b>	<b>72</b>
6. <b>The Role of Sulfur in Modifying the Friction and Lubricity of Metal Surfaces</b>	<b>103</b>
7. <b>Tribology of Ceramic and Metallic Surfaces in Environments of Carbonaceous Gases: Application of Raman and Infrared Spectroscopies</b>	<b>112</b>
LUBRICANT – SURFACE INTERACTIONS	
8. <b>Highly Chlorinated Methanes and Ethanes on Ferrous Surfaces: Surface Decomposition and Extreme-Pressure Tribological Properties</b>	<b>144</b>
9. <b>Ultrathin Perfluoropolyether Films</b>	<b>156</b>
10. <b>The Decomposition Mechanism of Perfluoropolyether Lubricants during Wear</b>	<b>169</b>
11. <b>The Influence of Fluorination on Boundary-Layer Surface Chemistry</b>	<b>181</b>
12. <b>Tribochemical Reactions of Stearic Acid on Copper Surface: Infrared Microspectroscopy and Surface-Enhanced Raman Scattering</b>	<b>195</b>
13. <b>Surface Lubricity of Organic Films for Rigid Containers and Ends</b>	<b>217</b>
14. <b>Kinetics of Damage Generation on Single-Crystal Silicon Surfaces: The Influence of Lubricant Adsorption</b>	<b>231</b>
<b>INDEX</b>	<b>243</b>
