

CONTENTS

Part 1 — BASICS OF AIR CONDITIONING

Basic Principles of Refrigeration.....	1
States of Matter	2
Heat and Matter	2
Heat Movement	3
Pressure and Heat	3
Refrigerants.....	4
Basic Refrigeration Cycle	5
Summary.....	6

Part 2 REFRIGERANTS AND OIL

Introduction.....	9
Pressure-Temperature Relationship	9
Handling Refrigerants	10
Refrigerant-II For Flushing The System...	10
Safety Rules.....	10
Moisture in System.....	11
Refrigeration Oil	13

Part 3 — BASIC SYSTEM — How it Works

Introduction.....	15
Compressor.....	16
Condenser	19
Expansion Valve.....	20
Evaporator.....	23
Receiver-Drier (Dehydrator)	25
Thermostat and Magnetic Clutch Systems	27
Bypass Systems.....	29
Suction Throttling Regulators	30
Lines and Connections	31

Part 4 SERVICE EQUIPMENT

Introduction.....	35
Gauge and Manifold Set	35
Service Valves	38
Leak Detectors	39
Vacuum Pump.....	41

Part 5 — INSPECTING THE SYSTEM

Introduction.....	43
Visual Inspection	44
Operating Inspection	44

Part 6 DIAGNOSING THE SYSTEM

Introduction.....	47
Troubleshooting Customer Complaints.....	48
Flow Charts For Diagnosing The System	54

Part 7 — TESTING AND ADJUSTING THE SYSTEM

Diagnostic Chart	64
Installing Gauge Set To Check System	65
Adding Refrigerant To System	67
Volumetric Test Of Compressor.....	69
Adding Oil To Reciprocating Piston Compressor	71
Adding Oil To Axial Piston Compressor	72
Bench Testing Expansion Valve	74
Adjusting Thermostat	77
Checking Clutch Coil.....	79
Leak Testing System	81

Part 8 — PREPARING SYSTEM FOR SERVICE

Bleeding or Discharging The System.....	83
Flushing The System.....	84
Purging The System	85
Evacuating System Using Vacuum Pump	86
Evacuating System Using Charging Station.....	87
Charging System Using 15-Ounce Containers	88
Charging System Using Charging Station	90
Isolating Compressor From System	91

DEFINITIONS OF TERMS AND SYMBOLS.....	93
ANSWERS TO TEST YOURSELF QUESTIONS.....	97
