

C O N T E N T S

PREFACE	ix
CHAPTER 1 ■ An Introduction to Numerical Control Machinery	1
The History of NC / 2	
CNC Machines / 5	
Input Media / 5	
Binary Numbers / 7	
Tape Formats / 8	
Objectives of Numerical Control / 11	
Applications in Industry / 14	
CHAPTER 2 ■ Numerical Control Systems	18
Components / 18	
Types of Control Systems / 18	
Servomechanisms / 22	
Loop Systems / 22	
The Cartesian Coordinate System / 25	
Positive and Negative Movement / 25	
Positioning Systems / 28	
Dimensioning / 30	
CHAPTER 3 ■ Tooling for Numerical Control	37
Drills / 37	
Reamers / 40	
Boring Tools / 42	
Taps / 43	
Countersinks and Counterbores / 44	
Milling Cutters / 46	
Special Tools / 49	
Cutting Speeds / 49	
Feedrates / 50	
CHAPTER 4 ■ Tool Changing and Tool Registers	53
Tool Changes / 53	
Automatic Tool Changers / 59	
Tool Storage / 70	
Tool Length and Offset / 73	

- CHAPTER 5 ■ Programming Coordinates**
Hole Operations / 77
Milling Operations / 79
Mixing Absolute and Incremental Positioning / 83
Metric Coordinates / 83
- CHAPTER 6 ■ Two-Axis Programming**
Machinist Shop Language / 89
Drilling in Machinist Shop Language / 91
Word Address Format / 98
Drilling in Word Address Format / 99
Milling in Machinist Shop Language / 104
Milling in Word Address Format / 114
- CHAPTER 7 ■ Three-Axis Programming**
A Three-Axis Programming Task / 124
Machinist Shop Language / 129
Word Address Format / 141
Other G Codes Used in CNC Programming / 152
- CHAPTER 8 ■ Math for Numerical Control Programming**
Basic Trigonometry / 159
Using Trigonometry for Cutter Offsets / 163
- CHAPTER 9 ■ Linear and Circular Interpolation**
Linear Interpolation / 177
Circular Interpolation / 183
- CHAPTER 10 ■ Cutter Diameter Compensation**
Definitions and Codes / 193
Machinist Shop Language / 196
Word Address Format / 202
Special Considerations / 206
- CHAPTER 11 ■ Do Loops and Subroutines**
Do Loops / 214
Subroutines / 222
Nested Loops / 231
- CHAPTER 12 ■ Advanced CNC Features**
Mirror Imaging / 245
Polar Rotation / 254
Helical Interpolation / 262

- CHAPTER 13 ■ The Numerical Control Lathe**
Lathe Bed Design / 274
Axis Movement / 277
Toolholders and Tool Changing / 278
Spindle Speeds / 285
Feedrates / 286
Machine Origin and Work Coordinate Systems / 286
- CHAPTER 14 ■ Programming CNC Turning Machines 288**
Machine Reference Point / 288
Diameter vs. Radius Programming / 289
Turning and Facing / 289
Taper Turning / 295
Circular Interpolation / 300
Threading / 303
- CHAPTER 15 ■ Use of Computers in Numerical Control Programming**
Offline Programming Terminals / 316
Computer-Aided Programming / 317
Computer Graphics Programming / 336
- CHAPTER 16 ■ The Future of Numerical Control 339**
NC in Prototype and Job Shops / 339
CNC in Manufacturing / 340
Employment Opportunities in NC / 343
- APPENDIX 1 ■ EIA Codes**
Preparatory Functions / 346
Miscellaneous Functions / 347
Other Addresses / 348
- APPENDIX 2 ■ Machinist Shop Language Commands**
Commands / 349
Preparatory Functions (G Codes) / 350
Variable (V) Codes / 351
Auxiliary (AUX) Codes / 351

APPENDIX 3	Word Address Codes Used in Text Examples	353
	Preparatory Functions (G Codes) Used in Milling / 353	
	Miscellaneous (M) Functions Used in Milling and Turning / 354	
	Preparatory Functions (G Codes) Used in Turning / 355	
APPENDIX 4	Codes in Common Use with Tape Machinery	357
	Preparatory Functions (G Codes) / 357	
	Miscellaneous (M) Functions / 357	
APPENDIX 5	Safety Rules for Numerical Control	
	Safety Rules for Operating Machines / 359	
	Safety Rules for Programmers / 360	
APPENDIX 6	Useful Machining Formulas and Data	
	Machining Formulas / 361	
	Cutting Speed Data / 362	
	Feedrate Data / 363	

SAMPLE PART PROGRAMS

GLOSSARY

INDEX
