

Introduction	9
--------------	---

**CHAPTER ONE. FUNDAMENTALS OF LINEAR MEASUREMENTS**

1.1. Basic Metrological Concepts . . . . .	13
1.2. Classification of Measuring Methods and Means . . . . .	15
1.3. Basic Metrological Characteristics of Measuring Instruments . . . . .	17
1.4. Errors of Measurement . . . . .	20
1.5. Measurement Data Processing . . . . .	28

**CHAPTER TWO. FIXED GAUGES**

2.1. Classification of Fixed Gauges . . . . .	31
2.2. Limit Gauges for Checking Plain Shafts and Holes . . . . .	33
2.3. Fixed Gauges for Checking Machine Tapers . . . . .	38
2.4. Limit Screw Gauges . . . . .	42
2.5. Limit Gauges for Checking Splines . . . . .	46
2.6. Fixed Gauges for Length, Depth, Height, and Clearance Checking . . . . .	49
2.7. Fixed Contour Gauges . . . . .	52
2.8. Fixed Gauges for Hole Location Checking . . . . .	53

**CHAPTER THREE. GAUGE BLOCKS**

3.1. Types of Gauge Blocks and Their Purpose . . . . .	56
3.2. Verification of Gauge Blocks . . . . .	62

**CHAPTER FOUR. RULES AND VERNIER MEASURING TOOLS**

4.1. Rules . . . . .	68
4.2. Vernier Measuring Tools . . . . .	68

**CHAPTER FIVE. MEASURING INSTRUMENTS WITH MECHANICAL MOVEMENT**

5.1. Classification of Measuring Instruments with Mechanical Movement	75
5.2. Errors in Lever-Type Movement . . . . .	76
5.3. Gauge Stands and Holders . . . . .	84

**THREE MEASUREMENTS**

11.5. Optical Dividing Heads . . . . .	238
11.6. Levels . . . . .	241
11.7. Measurement of Angles by the Trigonometric Method . . . . .	249

#### CHAPTER TW .VE. FORM AND POSITION MEASURING INSTRUMENTS

12.1. Surface Form and Position Deviations . . . . .	253
12.2. Straightedges . . . . .	254
12.3. Autocollimators . . . . .	257
12.4. Surface Plates . . . . .	261
12.5. Roundness Measuring Instruments . . . . .	263
12.6. Checking Relative Positions of Surfaces . . . . .	267

#### CHAPTER THIRTEEN. GEAR-TOOTH MEASURING INSTRUMENTS

13.1. Gear Testing . . . . .	270
13.2. Gear-Tooth Testers . . . . .	275
13.3. Pitch Testers . . . . .	279
13.4. Run-Out Testers . . . . .	285
13.5. Tangent Testers . . . . .	286
13.6. Involute Testers . . . . .	289
13.7. Instruments for Composite Gear Testing . . . . .	292

#### CHAPTER FOURTEEN SURFACE-ROUGHNESS MEASURING INSTRUMENTS

14.1. Parameters and Specifications for Surface Roughness . . . . .	297
14.2. Standard Surface-Roughness Specimens . . . . .	301
14.3. Instruments for Non-Contact Measurement of Surface Roughness . . . . .	303
14.4. Contact-Type Instruments for Surface-Roughness Measurement . . . . .	310

#### CHAPTER FIFTEEN. ELECTRIC MEASURING INSTRUMENTS

15.1. Electric Switch Gauge Heads . . . . .	316
15.2. Inductive Transducers and Instrument . . . . .	322
15.3. Photoelectric Transducers . . . . .	323

#### CHAPTER SIXTEEN. MECHANIZED AND AUTOMATIC GAUGES

16.1. Measuring Fixtures . . . . .	326
16.2. Automatic Gauging and Sorting Machines . . . . .	328
16.3. Basic Units of Automatic Gauging Machines . . . . .	333
16.4. Control Gauging Devices . . . . .	343

**CHAPTER SEVENTEEN. SELECTION OF MEASURING MEANS**

- 17.1. Effects of Measuring Errors on the Results of Measurement . . .
- 17.2. Selection of Measuring Means . . . . .

**CHAPTER EIGHTEEN. VERIFICATION OF MEASURING MEANS**

- 18.1. Verification of Measuring Instruments . .
  - 18.2. Manufacturing Plant's Metrological Service
  - 18.3. Verification Scheme . . . . .
  - 18.4. Storage of Measuring Means . . . . .
- Index . . . . .
