Section 1	PREVENTIVE MAINTENANCE ON HAND TOOLS	1
	1. The marking gage 2; 2. Squaring a square 3; 3. Preventive maintenance on planes 5; 4. Preventive maintenance on hand saws 6; 5. Preventive maintenance on bar clamps 8; 6. Care and repair of hand screws 9; 7. Preventive maintenance of selected hand tools 10.	
Section 2	SHARPENING HAND TOOLS AND HOUSEHOLD EQUIPMENT	13
	8. Care of and sharpening auger bits 14; 9. Sharpening wood chisels 17; 10. Reconditioning cold chisels 18; 11. Sharpening hatchets and axes 20; 12. Sharpening lathe tools 22; 13. The pocket knife 25; 14. Sharpening kitchen knives 26; 15. Repairing and sharpening scissors and garden shears 29; 16. Tinnern's snips 32; 17. Hand and cabinet scrapers 33; 18. Conditioning screwdrivers for slotted screws 35; 19. Conditioning screwdrivers for recessed-head screws 38; 20. Sharpening the plane iron 39; 21. The spoke shave 42; 22. Sharpening drills 42.	
Section 3	TOOL HANDLES	47
	23. Purchased file handles 48; 24. Home-built file handles 49; 25. Handles for wood turning tools 51; 26. Re-handling hammers and other percussion-type tools 53.	
Section 4	SHARPENING HAND SAWS	57
	27. Files used in saw filing 58; 28. Jointing hand saws 60; 29. Setting the teeth on hand saws 63; 30. Saw filing guides 65; 31. Filing the hand rip saw 67; 32. Filing the cross-cut hand saw 70; 33. Filing back saws 72; 34. Machine filing hand saws 74.	
Section 5	MARKING TOOLS FOR IDENTIFICATION	77
	35. Marking tools with steel letters and figures 78; 36. Marking tools for identification with electric writing pencils 79; 37. Marking tools by etching 81; 38. Painting tools for identification 82.	
Section 6	SELECTION, USE AND MAINTENANCE OF ABRASIVE EQUIPMENT	85
	39. Selection and care of oilstones 86; 40. Selecting a grinder for the school or home shop 88; 41. Selecting and ordering abrasive wheels 90; 42. Truing and sharpening grinding wheels 92; 43. The use of diamonds in truing and shaping grinding wheels 94; 44. Grinding wheel safety 95.	
Section 7	PROBLEMS OF ELECTRICAL MAINTENANCE	99
	45. Kinds of fuses 100; 46. Testing and changing fuses 102; 47. Extension cords in the shop 104; 48. Care of brushes and commutators in small motors 106; 49. The grounding of portable electrical tools 109; 50. Grounding machinery for electrical safety 111.	

vi | CONTENTS

Section 8	GENERAL MACHINE MAINTENANCE	113
	51. Cleaning tools and machinery 114; 52. Cleaning equipment by dismantling and reassembling 115; 53. The use of V-belts 116; 54. Kinds of bearings 118; 55. Replacing sleeve bearings 120; 56. Replacing ball bearings 122.	
Section 9	LUBRICATION AS A FACTOR IN MAINTENANCE	125
	57. Preventive maintenance on machinery 126; 58. Lubricating oils 127; 59. Industrial greases 128; 60. Kinds of oiling equipment 129; 61. Greasing systems in the shop 131; 62. Lubricating ball bearings 133; 63. Lubrication schedule for the shop 135; 64. Lubricating home equipment 137; 65. Lubricating motor bearings 139.	
Section 10	BAND SAW MAINTENANCE	141
	66. Band saw maintenance 142; 67. Setting band saws 144; 68. Hand filing band saws 146; 69. Machine filing band saws 149; 70. Brazing band saws 151.	
Section 11	CIRCULAR SAW MAINTENANCE	155
	71. Kinds of circular saws 156; 72. Technical information about circular saws 158; 73. Problems basic to laying out and filing circular saws 162; 74. Jointing circular saws 165; 75. Laying out the circular saw for gumming 168; 76. Gumming circular saws 170; 77. Setting the teeth on circular saws 172; 78. Sharpening the circular rip saw 175; 79. Swaging the circular rip saw 177; 80. Filing the circular cross-cut saw 179; 81. Sharpening rough-cut combination saws 183; 82. Sharpening combination saws 185; 83. Sharpening dado saws 187; 84. Fitting blades for portable saws 191; 85. Care of carbide tipped saws 192; 86. General maintenance of the table saw 194.	
Section 12	CARE AND UPKEEP OF JOINTERS	197
	87. Replacing jointer knives 198; 88. Whetting jointer blades in place and readjusting height of outfeed table 201; 89. Jointing and whetting jointer knives in place 203; 90. Grinding and whetting jointer knives in place 205; 91. General maintenance of jointers 207.	
Section 13	SURFACERS AND SHAPERS	211
	92. General maintenance of surfacers 212; 93. Jointing and whetting surfacer knives in place 214; 94. Grinding surfacer knives in place 216; 95. Removing and replacing surfacer knives 217; 96. General maintenance of shapers 218; 97. Grinding and whetting solid and wing-type shaper cutters 219; 98. Shaping and sharpening loose knives for the shaper 221.	
Section 14	MISCELLANEOUS MAINTENANCE TASKS	225
	99. Repainting shop rooms and equipment with modern color treatment 226; 100. Preventive maintenance on shop lighting 227; 101. Selection and maintenance of woodworkers' vises 228; 102. Care of machinists' vises 231; 103. Reconditioning the cross-cut wood saw 232; 104. Removing and replacing mortiser bits 234; 105. Sharpening the mortiser bit and chisel 235; 106. Care of sheet metal squaring shears 237; 107. Fastening equipment to concrete floors 238; 108. Tool cases and tool racks 240.
