Introduction

Chapter 1 The Properties of Ceramic Tools

- A. Comparison between Ceramic and Other Tools
- B. Comparison between Ceramic Tools .. 11

Chapter 2 Tool Manufacture

- A. Sintering .. 29
- B. Hot Pressing 48

Chapter 3 / Strength of the Ceramic and Tool Usage

- A. Strength and Tool Surface Finish 60
- B. Strength and Tool Microstructure 66
- C. Strength and Temperature 73
- D. Strength and Pressure 76
- E. Strength and Composition 82
- F. Strength Distribution 85
- G. Strength and Initial Tool Wear . 90

Chapter 4 / Properties of the Ceramic and Tool Usage

- A. Hardness 93
- B. Chemical Reactivity . 99
- C. Friction 104
- D. Thermal Shock 105
- E. Effects of Temperature Microstructure 107

**Chapter 5 / Tool Life and the Mechanism
of Tool Failure**

A. Wear	115
B. Fatigue	153

Chapter 6 / Tool Design

A. Tool Geometry	169
B. Machining Conditions	185
C. Equipment	195
D. The Fixtures	203

Chapter 7 Tool Evaluation

A. Requirements for a Test	209
B. Test Materials	216
C. Test Methods	220

Chapter 8 Industrial Experience

A. Economics	232
B. Materials	248
C. Type of Operation	260

Chapter 9 The Future

A. Consequences of Improved Ceramic Materials ...	276
B. The Consequences of Improved Machine Tools on the Application of Existing Ceramics	286
References	292
Subject Index	301
