

Contents

A review of developments in oilfield drilling <i>R.C. Minton</i>	
Mechanisms and solutions for chemical inhibition of shale swelling and failure <i>L. Bailey, P.I. Reid and J.D. Sherwood</i>	13
Pseudo oil based muds - the outlook <i>C.A. Sawdon and M.H. Hodder</i>	28
Shale inhibition with water based muds: The influence of polymers on water transport through shales <i>T.J. Ballard, S.P. Beare and T.A. Lawless</i>	38
Developments and application of cationic polymer drilling fluids for shale stabilization <i>J. Dormán and É. Banka</i>	56
Chemistry and function of chromium in lignosulfonate and lignite thinners. Development of environmentally-friendly aqueous drilling fluids <i>F. Miano, S. Carminati, T.P. Lockhart and G. Burrafato</i>	71
Mixed metal hydroxide (MMH) - A novel and unique inorganic viscosifier for drilling fluids <i>J. Felixberger</i>	84
The use of Fourier transform infrared spectroscopy to characterise cement powders, cement hydration and the role of additives <i>T.L. Hughes, C.M. Methven, T.G.J. Jones, S.E. Pelham and P. Franklin</i>	99
The controls on barium concentrations in North Sea formation waters <i>E.A. Warren and P.C. Smalley</i>	116

Phosphonate scale inhibitor adsorption on outcrop and reservoir rock substrates - The "static" and "dynamic" adsorption isotherms
M.D. Yuan, K.S. Sorbie, P. Jiang, P. Chen, M.M. Jordan, A.C. Todd, K.E. Hourston and K. Ramstad

A New Assay for polymeric phosphinocarboxylate scale inhibitors at the 5 ppm level
C.T. Bedford, P. Burns, Asad Fallah, W.J. Barbour and P.J. Garnham

Using statistical experimental design to optimise the performance and secondary properties of scale inhibitors for downhole application
G.E. Jackson, G. Salters, P.R. Stead, B. Dahwan and J. Przybylinski

Oilfield reservoir souring - model building and pitfalls
R.D. Eden, P.J. Lavcock and G. Wilson

The role of sulphur and its organic as well as inorganic compounds at thermal recovery of oil
G.G. Hoffman, I. Steinfatt and A. Strohschein

The development, chemistry and applications of a chelated iron, hydrogen sulphide removal process
D. McManus and A.E. Martell

A comprehensive approach for the evaluation of chemicals for asphaltene deposit removal
L. Barberis Canonico, A. Del Bianco, G. Piro, F. Stroppa, C. Carniani and E.I. Mazzolini

Coprecipitation routes to absorbents for low-temperature gas desulphurisation
T. Baird, K.C. Campbell, P.J. Holliman, R. Hoyle, D. Stirling and B.P. Williams

A novel technique to measure *in situ* wettability alterations using radioactive tracers
R.N. Smith and T.A. Lawless

Oil and gas production: future trends of relevance to the oilfield chemical supply industry
R.W. Johnson

Low tension polymer flood. The influence of surfactant-polymer interaction
K. Taubøl, He-Hua Zhou and T. Austad

Chemical gel systems for improved oil recovery
H. Frampton

**New water clarifiers for treating produced water on North Sea
production platforms** 311

D. K. Durham

**Subsurface disposal of a wide variety of mutually incompatible
gas-field waters** 317

G. Fowler

Subject Index 370
