

## CONTENTS

### *Preface*

### *Chapter 1*

#### METHODS OF MHD AND MHS SEPARATION AND THEIR PLACE IN MINERAL DRESSING

1. Trends in the Development of Dressing Technology for Useful Minerals
2. Classification of Dressing Methods according to the Physical Principles of the Separation Process 4
3. Survey of MHD and MHS Separation Processes
4. Earlier Technical Solutions for MHD Separation of Granular Mixtures 4

### *Chapter 2*

#### PROBLEMS OF THEORY OF MHD SEPARATION 18

- Aims of Theory of MHD Separation 18
- Possibilities of Using the Ponderomotive Forces of Electromagnetic Fields for Separation of Mineral Particles 19
- Use of Solenoidal Lorentz Force for Separation of Mineral Particles 28
- Instability in MHD Separators --

### *Chapter 3*

#### INVESTIGATIONS OF ELECTROMAGNETIC EXPULSION OF PARTICLES AND FLOW OF ELECTROLYTE IN CROSSED ELECTRIC AND MAGNETIC FIELDS 41

- Magnetohydrodynamic Flow near Solid Particles 41

2. Influence of Electric Conduction, Shape and Orientation of Particles in Electromagnetic Field on Magnitude of Expulsive Force	44
3. Hindered Expulsion of Solid Nonconducting Particles in Crossed Fields	53
4. Fluidized Bed of Nonconducting Particles in Crossed Fields	60
5. Flow of an Electrolyte with Solid Nonconducting Admixtures in Crossed Fields	66
6. Fall of Particles under Variable Expulsive Force	76
7. Stratification of a Granular Layer under Periodic Action of an Electromagnetic Expulsive Force	83
8. Dissolution of Mineral Particles in an Electrolyte in Crossed Fields	87
9. Electrolytes Used in MHD Separation as Separating Medium	89
<i>Chapter 4</i>	
<b>MAGNETOHYDROSTATIC SEPARATION</b>	92
1. Magnetic Solutions	92
2. Magnetic Suspensions	95
3. Parameters of MHS Separation and Choice of Magnetic Fields	109
4. Expulsion of Solid Particles in a Magnetic Liquid in a Wedge-Shaped Air Gap	14
<i>Chapter 5</i>	
<b>MAGNETIC SUSCEPTIBILITY OF MINERALS</b>	130
1. Values of Magnetic Susceptibility of Minerals	130
2. Electromagnetic Parameters of a Substance and the Magnetic Susceptibility	133
3. Magnetic Properties of Minerals	134
4. Magnetic Susceptibilities of Minerals	139
5. Magnetic Susceptibilities of Dark-Colored Rock-Forming Minerals, Wolframites and Columbite-Tantalites	
<i>Chapter 6</i>	
<b>DESIGN PRINCIPLES FOR MHD AND MHS SEPARATORS AND THEIR STRUCTURAL AND TECHNOLOGICAL COMPONENTS</b>	
1. Design of MHD and MHS Separators	159
2. Separator Design	167

**CONTENTS**

*Chapter 7*

**TECHNOLOGICAL INVESTIGATION OF MHD AND  
MHS SEPARATION**

76

MHD Separation of Minerals

176

MHS Separation of Minerals

189

Industrial Prospects of MHD and MHS Separation

198

*Appendix*
