

CONTENTS

Introduction1

**STATE-OF-THE-ART PAPERS**

State of the Art: Consolidation Testing	7
Discussion	68
State of the Art: Evaluation and Interpretation of Soil Consolidation Tests	71

**GENERAL REPORTS**

Report on Laboratory Tests for Consolidation Behavior	107
Report on Theory and Laboratory Testing Requirements: Comparisons	115
Report on New Experimental Methods and Techniques	122
Report on Consolidation Behavior	129

**TECHNICAL PAPERS**

General Theory of Consolidation for Clays	137
Unsaturated Soil Consolidation Theory and Laboratory Experimental Data	154
Discussion	168
Improved Techniques for the Constant-Rate-of-Strain Consolidation Test	170
Compressibility and Settlement of Compacted Fills	184
An Experimental Assessment of the Restricted Flow Consolidation Test	203
Desktop Computer Application for Consolidation Testing and Analysis	217
Constant-Rate-of-Loading (CRL) Consolidation Test	236
Consolidation in the Intergranular Viscosity of Highly Compressible Soils	257
Oedometric Testing in the Laboratoires des Ponts et Chaussees, France	282
Automatic Continuous Consolidation Testing in Sweden	299
Oedometer Testing at the Norwegian Geotechnical Institute	329
Influence of a Critical gradient on the Consolidation of Clays	354
Consolidation of Natural Clays and Laboratory Testing	378
A New Consolidation Testing Procedure and Technique for Very Soft Soils	405
Controlled-Strain, Controlled-Gradient, and Standard Consolidation Testing of Sensitive Clays	433
Conventional Consolidation Tests on Two Soils	451
A Biaxial Consolidation Test for Anisotropic Soils	465
Side Friction in Consolidation Tests on Fibrous Peat	485
Determination of Clay Suspension Concentration Profile in a Settling Column	
Using the Fall-Drop Technique	490
Large-Scale Self-Weight Consolidation Testing	500
Lateral Strain Measurement by an Ultrasonic Method	516

Determination of Coefficient of Consolidation ( $c_v$ ) for Large Strain and Variable $c_v$ Values	526
Determination of Consolidation Parameters by Selfweight Consolidation Test in Centrifuge	548
Centrifugal Evaluation of a Time-Dependent Numerical Model for Soft Clay Deformations	567
Centrifuge Consolidation Study for Purposes of Plasticity Theory Validation	593
Brittle Behavior of a Varved Clay During Laboratory Consolidation Tests	610
Consolidation of Sand-Clay Mixtures	627
A Comparative Laboratory Evaluation of Band-Shaped Prefabricated Drains	642
Discussion	660
Effectiveness of Prefabricated Drains on Laboratory Consolidation of Remolded Soils	663
Discussion	681
A Case History: Settlement of Fill Over Soft Ground	684
Consolidation Testing – A Comparative Study	694
<b>SUMMARY AND EVALUATION</b>	
Consolidation Testing and Evaluation: Problems and Issues	713
General Discussion on Consolidation Theory and Testing	719
Author Index	725
Subject Index	727
