

CONTENTS

1. FOREWORD	9
2. INTRODUCTION	
2.1 The development of blasting technology	10
2.2 Metric measurements used in this book and conversion factors ..	13
2.3 Nomenclature	14
3. EXPLOSIVES	
3.1 The properties of explosives	18
3.2 Explosive products	24
4. FIRING UNITS	
4.1 Firing methods	31
4.2 Firing products – detonator types	36
5. BENCH BLASTING	
5.1 Charge calculations	47
5.2 Fragmentation	66
5.3 Swelling	77
5.4 Throw	81
5.5 Levelling	87
5.6 Choosing drill hole diameter	89
5.7 Boulder blasting	91
5.8 The economics of blasting	95
6. CHARGING	
6.1 Charging methods	103
6.2 Charging with a tamping rod and tamping weight	104
6.3 Using compressed air chargers	107
7. BLASTING PIPELINE TRENCHES	
7.1 Charge calculation methods	110
7.2 The cautious blasting of pipeline trenches	115
8. COVERING	
8.1 Covering material	121
8.2 How covering is to be carried out	125

9. BLASTING TUNNELS	
9.1 Charge calculations	128
9.2 Parallel hole cuts and calculating of charge for “cut spreader“ holes	137
9.3 Plough or V cut – calculating of charges for “cut spreader holes	143
9.4 Fan cut and other cuts	147
9.5 Smooth blasting	152
9.6 Calculating examples with parallel hole cut, 31 mm drill hole diameter	156
9.7 The economics of blasting	170
9.8 Computerized drilling patterns	172
10. SMOOTH BLASTING	
10.1 Conventional smooth blasting	174
10.2 Presplitting	182
10.3 Special smooth blasting	188
11. BLASTING UNDERGROUND CHAMBERS	
11.1 Underground storage facilities	190
11.2 Mine blasting, sub-level benching – examples of mine blasting	199
11.3 Mine blasting, sub-level caving – examples of mine blasting	204
12. RAISES WITH LONG HOLE DRILLING	
12.1 Blasting methods	208
13. CAUTIOUS BLASTING	
13.1 Ground vibrations	217
13.2 Measuring methods for ground vibrations and their association of charging	223
13.3 Cautious bench blasting – different methods	231
13.4 Cautious pipeline trench blasting	244
13.5 Cautious tunnel blasting	252
13.6 Measures to prevent throw	256
13.7 Planning blasting in built-up areas	257
13.8 The financial aspect of cautious blasting	260
13.9 Air shock waves from blasting	264
14. UNDERWATER BLASTING	
14.1 Charge calculations	268
14.2 Underwater blasting methods	274
14.3 Special measures	277

15. THE BLASTING OF BUILDINGS AND INSTALLATIONS	
15.1 The blasting of buildings	283
15.2 The blasting of concrete	286
15.3 The blasting of bridges	291
15.4 Blasting with water pressure	293
16. SPECIAL FORMS OF BLASTING	
16.1 Blasting natural boulders	294
16.2 Blasting metal	296
16.3 Blasting earth	299
16.4 Blasting permafrost	300
16.5 Blasting embankments	303
16.6 Blasting ditches	307
16.7 Blasting ice	309
16.8 Blasting stone blocks in quarries	310
16.9 Blasting stumps	312
17. SAFETY IN BLASTING WORK	314
REFERENCES TO LITERATURE	327
