PART I THEORY

1 Ground Water in Construction 3

- 1.1 Ground Water in the Hydrologic Cycle 3*
- 1.2 Origins of Dewatering 8*
- 1.3 Development of Modern Dewatering Technology 10*

2 The Geology of Soils 16

- 2.1 Formation of Soils 17*
- 2.2 Mineral Composition of Soils 18*
- 2.3 Rivers 18*
- 2.4 Lakes 21*
- 2.5 Estuaries 22*
- 2.6 Beaches 22*
- 2.7 Wind Deposits 23*
- 2.8 Glaciers—The Pleistocene Epoch 23*
- 2.9 Rock 27*
- 2.10 Limestone and Coral 29*
- 2.11 Tectonic Movements 32*

3 Soils and Water 34

- 3.1 Soil Structure 35*
- 3.2 Gradation of Soils 35*
- 3.3 Porosity and Void Ratio: Water Content 39*
- 3.4 Relative Density, Specific Gravity, and Unit Weight 40*
- 3.5 Permeability 42*
- 3.6 Silts and Clays 49*
- 3.7 Unified Soil Classification System (ASTM D-2487) 51*
- 3.8 Soil Descriptions 55*
- 3.9 Visual and Manual Classification of Soils 57*
- 3.10 Seepage Forces and Soil Stress 61*

3.11	Gravity Drainage of Granular Soils	65
3.12	Drainage of Silts and Clays	66
3.13	Settlement Caused by Dewatering	67
4	Hydrology of the Ideal Aquifer	75
4.1	Definition of the Ideal Aquifer	76
4.2	Transmissibility T	76
4.3	Storage Coefficient C_s	77
4.4	Pumping from a Confined Aquifer	78
4.5	Recovery Calculations	83
4.6	Definition of the Ideal Water Table Aquifer	84
4.7	Specific Capacity	88
5	Characteristics of Natural Aquifers	91
5.1	Anisotropy: Stratified Soils	91
5.2	Horizontal Variability	93
5.3	Recharge Boundaries: Radius of Influence R_0	95
5.4	Barrier Boundaries	97
6	Hydrologic Analysis of Dewatering Systems	98
6.1	Radial Flow to a Well in a Confined Aquifer	99
6.2	Radial Flow to a Well in a Water Table Aquifer	103
6.3	Radial Flow to a Well in a Mixed Aquifer	105
6.4	Flow to a Drainage Trench from a Line Source	105
6.5	The System as a Well: Equivalent Radius r_e	106
6.6	Radius of Influence R_0	108
6.7	Permeability K and Transmissibility T	109
6.8	Initial Head H and Final Head h	110
6.9	Partial Penetration	111
6.10	Storage Depletion	114
6.11	Specific Capacity of the Aquifer	118
6.12	Cumulative Drawdowns	119
6.13	Capacity of the Well Q_w	121
6.14	Flow Net Analysis	125
6.15	Concentric Dewatering Systems	127
7	Piezometers	130
7.1	Soil Conditions	130
7.2	Ordinary Piezometers and True Piezometers	131

- 7.3 *Piezometer Construction* 133
- 7.4 *Proving Piezometers* 135
- 7.5 *Reading Piezometers* 136
- 7.6 *Pore Pressure Piezometers* 137

8 *Pumping Tests* 139

- 8.1 *Planning the Test* 139
- 8.2 *Design of the Pumping Well* 140
- 8.3 *Piezometer Array* 142
- 8.4 *Duration of Pumpdown and Recovery* 144
- 8.5 *Pumping Rate* 144
- 8.6 *Nature and Frequency of Observations* 145
- 8.7 *Analysis of Pump Test Data* 145
- 8.8 *Tidal Corrections* 151
- 8.9 *Well Loss and Well Efficiency* 155
- 8.10 *Step Drawdown Tests* 158

9 *Surface Hydrology* 161

- 9.1 *Lakes and Reservoirs* 161
- 9.2 *Bays and Ocean Beaches* 162
- 9.3 *Rivers* 162
- 9.4 *Precipitation* 167
- 9.5 *Disposal of Dewatering Discharge* 169
- 9.6 *Water from Existing Structures* 172

10 *Geotechnical Investigation of Dewatering Problems* 173

- 10.1 *Preliminary Studies* 174
- 10.2 *Borings* 176
- 10.3 *Piezometers and Observation Wells* 177
- 10.4 *Borehole Testing* 177
- 10.5 *Laboratory Analysis* 178
- 10.6 *Geophysical Methods* 178
- 10.7 *Permanent Effects of Structures on the Ground Water Body* 179
- 10.8 *Investigation of the Potential Effects of Dewatering* 181
- 10.9 *Pumping Tests* 183
- 10.10 *Presentation in the Bidding Documents* 183

- 11 Pump Theory 185**
- 11.1 *Types of Pumps Used in Dewatering* 185
 - 11.2 *Total Dynamic Head* 191
 - 11.3 *Pump Performance Curves* 193
 - 11.4 *Affinity Laws* 195
 - 11.5 *Cavitation and NPSH* 196
 - 11.6 *Engine Power* 199
 - 11.7 *Electric Power* 200
 - 11.8 *Vacuum Pumps* 200
 - 11.9 *Air Lift Pumping* 204
 - 11.10 *Testing of Pumps* 206
- 12 Ground Water Chemistry 207**
- 12.1 *Carbon Dioxide* 207
 - 12.2 *Hydrogen Sulfide* 208
 - 12.3 *Chlorides* 208
 - 12.4 *Miscellaneous Salts* 209
 - 12.5 *Industrial Wastes* 209
 - 12.6 *Iron and Manganese* 209
 - 12.7 *Carbonates and Bicarbonates: Hardness* 211
 - 12.8 *Algae* 211
 - 12.9 *Designing for Corrosive Waters* 212
 - 12.10 *Designing for Encrustation* 212
 - 12.11 *Acidization* 213
 - 12.12 *Chemical Analysis* 217
- 13 Piping Systems 219**
- 13.1 *Dewatering Pipe and Fittings* 219
 - 13.2 *Losses in Discharge Piping* 221
 - 13.3 *Losses in Wellpoint Header Lines* 226
 - 13.4 *Losses in Ejector Headers* 228
 - 13.5 *Water Hammer* 228

PART 2 PRACTICE

- 14 Choosing a Dewatering Method 233**
- 14.1 *Open Pumping versus Predrainage* 235
 - 14.2 *Methods of Predrainage* 235

- 14.3 *Cutoff Methods* 242
- 14.4 *Methods in Combination* 245
- 14.5 *Summary* 246

- 15 *Sumps, Drains, and Open Pumping* 247
 - 15.1 *Soil and Water Conditions* 247
 - 15.2 *Boils and Blows* 248
 - 15.3 *Construction of Sumps* 249
 - 15.4 *Ditches and Drains* 251
 - 15.5 *Gravel Mats* 253
 - 15.6 *Slope Stabilization with Sandbags or Gravel* 253
 - 15.7 *Permanent Effect of Buried Drains* 255

- 16 *Deep Well Systems* 257
 - 16.1 *Testing during Well Construction* 257
 - 16.2 *Well Construction Methods* 258
 - 16.3 *Casing and Wellscreen* 267
 - 16.4 *Filter Packs* 274
 - 16.5 *Development of Wells* 283
 - 16.6 *Well Construction Details* 285
 - 16.7 *Pressure Relief Wells, Vacuum Wells* 289

- 17 *Wellpoint Systems* 290
 - 17.1 *Suction Lifts* 290
 - 17.2 *Single and Multistage Systems* 293
 - 17.3 *Wellpoint Design* 294
 - 17.4 *Wellpoint Spacing* 297
 - 17.5 *Wellpoint Depth* 299
 - 17.6 *Installation of Wellpoints* 300
 - 17.7 *Filter Sands* 304
 - 17.8 *Wellpoint Pumps, Header and Discharge Piping* 306
 - 17.9 *Sealed Vacuum Wellpoints* 308
 - 17.10 *Tuning Wellpoint Systems* 308
 - 17.11 *Air/Water Separation* 310
 - 17.12 *Automatic Mops* 311
 - 17.13 *Vertical Wellpoint Pumps* 311
 - 17.14 *Wellpoint Systems for Trench Work* 316

- 18 Ejector Systems 319**
 - 18.1 Two Pipe and Single Pipe Ejectors 319
 - 18.2 Ejector Pumping Stations 322
 - 18.3 Ejector Efficiency 324
 - 18.4 Design of Nozzles and Venturis 325
 - 18.5 Ejector Risers and Swings 329
 - 18.6 Ejector Headers 330
 - 18.7 Ejector Installation 330
 - 18.8 Ejectors and Ground Water Quality 331
 - 18.9 Ejectors for Soil Stabilization 331

- 19 Cutoff Methods 332**
 - 19.1 Steel Sheet Piling 332
 - 19.2 Diaphragm Walls 339
 - 19.3 Secant Piles 343
 - 19.4 Slurry Trenches 343
 - 19.5 Tremie Seals 347

- 20 Ground Freezing (with Derek Maishman) 349**
 - 20.1 General Principles 349
 - 20.2 Freezing Equipment and Methods 351
 - 20.3 Freezing Applications 353
 - 20.4 Effect of Ground Water Movement 357
 - 20.5 Frost Heave 359

- 21 Grouting 360**
 - 21.1 Purposes of Grouting 360
 - 21.2 Principles of Grouting 361
 - 21.3 Types of Grout 363
 - 21.4 Methods of Grout Injection 363
 - 21.5 Grout Instrumentation and Control 369
 - 21.6 Grouting Equipment 373

- 22 Artificial Recharge 374**
 - 22.1 Recharge to Maintain Water Levels 375
 - 22.2 Recharge to Protect Water Supplies 375
 - 22.3 Hydrological Analysis of Recharge Systems 376
 - 22.4 Recharge Trenches 376

- 22.5 *Recharge Wells* 377
- 22.6 *Recharge Wellpoint Systems* 379
- 22.7 *Problems with Recharge Water* 380
- 22.8 *Sources of Recharge Water* 380
- 22.9 *Treatment of Recharge Water* 381
- 22.10 *Recharge Piping Systems* 382
- 22.11 *Operation of Recharge Systems* 383

23 *Sand Drains* 384

- 23.1 *Drainage of Perched Water* 384
- 23.2 *Sand Drains in Soil Consolidation* 390

24 *Electrical Design for Dewatering Systems* 397

- 24.1 *Electrical Motors* 397
- 24.2 *Motor Controls* 408
- 24.3 *Power Factor* 413
- 24.4 *Electric Generators* 417
- 24.5 *Switchgear and Distribution Systems* 418
- 24.6 *Grounding of Electrical Circuits* 424
- 24.7 *Cost of Electrical Energy* 425

25 *Dewatering Costs* 427

- 25.1 *Format of the Estimate* 428
- 25.2 *Basic Cost Data* 428
- 25.3 *Mobilization* 429
- 25.4 *Installation and Removal* 431
- 25.5 *Operation and Maintenance* 431
- 25.6 *Summary* 434

26 *Dewatering Specifications* 435

- 26.1 *Specified Results* 436
- 26.2 *Owner Designed Dewatering Systems* 437
- 26.3 *Specified Minimum Systems* 438
- 26.4 *Dewatering Submittals* 439
- 26.5 *Third Party Damage Caused by Dewatering* 440
- 26.6 *Changed Conditions Clause* 442
