

CONTENTS

1. Proportioning of Sections-UL TIMATE Strength Design	1
2. Deflections	44
3. One-and Two-way Slabs	55
4. Joints in Buildings	94
5. Footings	111
6. Properties of Materials for Reinforced Concrete	141
7. Fire Resistance	212
8. Ductility of Structural Elements	229
9. Prestressed Concrete	249
10. Multistory Structures	287
11. Tubular Structures for Tall Buildings	345
12. Earthquake-Resistant Structures	356
13. Large Panel Structures	433
14. Thin Shell Structures	449
15. Reinforced Concrete Chimneys	477
16. Silos and Bunkers	491
17. Concrete Masonry Construction	536
18. Sanitary Structures-Tanks and Reservoirs	572
19. Concrete Pipe	595
20. Marine Structures	615
21. Concrete Dams	631
22. Concrete Pavement Design	640
23. Preparation of Structural Drawings as Related to Detailing of Reinforced Concrete	673
24. Construction Methods and Equipment	693
25. Structural Analysis	719
26. Computer Applications	755
27. Computer Software for Concrete Structures	770
Index	781
