

Table of Contents

Authors' Preface	9
-----------------------------------	----------

Chapter 1 History

1.1 Fundamental Operations.	11
1.2 Ancient Mines and Tunnels	12
1.3 Canals	15
1.4 Brunel's Thames Tunnel	18
1.5 Railways	21
1.6 National Systems.	29
1.7 Shields and Compressed Air.	32
1.8 20th Century Techniques	38
1.9 Future Progress.	50
Bibliography.	51

Chapter 2 Functions and Requirements

2.1 Factors related to Function.	52
2.2 Principal Functions	53
2.3 Situation	54
2.4 Pedestrian and Cycle Subways	55
2.5 Railways	56
2.6 Metro Systems	58
2.7 Highways.	60
2.8 Water Conveyance.	63
2.9 Sewers.	70
2.10 Service Tunnels.	72
2.11 Storage and Other Tunnels	74
Bibliography.	75

Chapter 3 Investigations

3.1	Planning 77
3.2	Topography 78
3.3	Site History 78
3.4	Geology. 80
3.5	Site Investigation. 81
3.6	Methods of Boring 83
3.7	Sampling 86
3.8	In Situ Tests. 87
3.9	Trial Excavations. 90
3.10	Hydrology 91
3.11	Gases 92
3.12	Structures 93
	Bibliography. 93

Chapter 4 Tunnelling in Soft Ground

4.1	Scope 95
4.2	Pattern of Ground Stress. 98
4.3	Excavation in Soft Ground	100
4.4	Timbered Headings	102
4.5	Circular Tunnel Segmental Lining.	107
4.6	Greathead Shield.	108
4.7	Tunnel Jacking	112
4.8	Size of Tunnel	117
4.9	Management of Water.	119
4.10	Art of Tunnelling	123
	Bibliography.	124

Chapter 5 Compressed Air Working

5.1	Uses and Limitations 125
5.2	Physical Aspects 127
5.3	Excavation and Support 130
5.4	Physiological Effects 134
5.5	Decompression Tables 135
5.6	Incidence of Illness 138
5.7	Medical Control 138
5.8	Plant and Equipment 139
5.9	Fire Risks 154
	Bibliographv. 154

Chapter 6 Rock Tunnelling

6.1	General Requirements	157
6.2	Stresses	160
6.3	Rock Characteristics	161
6.4	Drilling Equipment	162
6.5	Explosives	167
6.6	Ventilation.	168
6.7	Drainage and Pumping	169
6.8	Immediate Support	170
6.9	Grouting	172
	Bibliography.	177

Chapter 7 Tunnelling Machines for Soft Ground and Rock

7.1	Historical Development	179
7.2	Soft Ground Tunnelling Machine Types.	182
7.3	The Bentonite Shield	188
7.4	Operation of Machines	190
7.5	Rock Tunnel Machines	194
7.6	Operation in Rock.	201
7.7	Mersey Kingsway Tunnel Mole.	202
7.8	Effects of Mechanization	206
7.9	Current and Future Development of Rock Tunnel Machines	207
	Bibliography.	210

Chapter 8 Permanent Linings

8.1	Need for Linings	212
8.2	Primary Requirements	212
8.3	Principal Materials	215
8.4	In Situ Concrete	216
8.5	Sprayed Concrete and Rock Bolts.	218
8.6	Segmental Linings	218
8.7	Brickwork and Masonry	228
	Bibliography.	232

Chapter 9 Survey and Control

9.1	Survey Networks.	233
9.2	Ground Survey	235
9.3	Photogrammetric Survey and Mapping.	239
9.4	Buried Services and Structures.	243

9.5	Survey Instruments 243
9.6	Setting Out and Control	. 249
	Bibliography. 255
 Chapter 10 The Channel Tunnel and Seikan Tunnel		
10.1	Channel Tunnel. 257
10.2	Seikan Tunnel. 269
10.3	Comparison 275
	Bibliography. 278
