

Contents and Subject Index

SOURCES OF WASTE MATERIALS FOR USE IN CONSTRUCTION	1
Introduction.	1
Solid Wastes in the United States	1
Developments in the Use of Wastes in Construction	2
Scope	2
Mining Wastes.	3
Inventory and Sources	4
Description, Disposal and Uses.	8
Prospects for Increased Use	11
Sulfate Wastes and Wastes from the Phosphate, Aluminum and Cement Industries.	12
Phosphate Ore Processing Wastes	12
Sulfate Wastes.	15
Muds from the Processing of Aluminum Ores	16
Cement Kiln Dust	18
By-Products from Coal Combustion	19
Amounts and Disposal of Combustion Products	21
Use of By-Products	22
Metallurgical and Mineral Slags.	24
Slag Production.	26
Uses of Slags.	26
Municipal Wastes.	28
Incinerator Refuse.	28
Glass.	29
Building and Highway Demolition Waste	30
Sewage Sludge	31
Waste Materials from Emerging Technologies	32
Oil Shale Residues	32
Slags and Ashes from Coal Gasification and Liquefaction Processes.	32

Elemental Sulfur	33
Obstacles to and Incentives for the Increased Use of Waste Materials in Construction	33
References	35
TECHNICAL AND ECONOMIC FEASIBILITY	44
Introduction	44
Evaluation of Materials	45
Reinforcements	45
Fillers	56
Matrix Materials—General	61
Organic Matrices	66
Inorganic Matrices	74
Product Development	85
General Considerations	85
Organic Matrix Products	94
Inorganic Matrix Products	111
Summary	124
References	124
Reinforcements	124
Fillers	126
Matrices	127
PRODUCTION AND EVALUATION OF WASTE-DERIVED BUILDING COMPONENTS	128
Organic Matrix Products	128
Processing Conditions	129
Full Size Panel Production	139
Recommended Processes	151
Economics	152
Conclusions and Recommendations	158
Inorganic Matrix Products	158
Wall System	159
Roof and Ceiling System	180
Floor System	189
Fire Door	192
Demonstration Unit Constructed from Waste Materials	202
Organic Waste Panels	202
Inorganic Waste Panels	203
Doors	204
References	204
UTILIZATION OF FLY ASH AND BLAST FURNACE SLAGS IN BLENDED CEMENTS	205
Advantages	205
General	205
Pozzolanic Materials	207
Blast Furnace Slags	208

Production and Utilization of Blended Cements	208
Abroad	208
In the United States	208
Potential for Blended Cements	209
As a Portland Cement Substitute	209
Geographic Considerations	210
Limitations	211
Blended Cement Work at NBS	214
Summary and Conclusions	214
