|--|-----|
| <b>Preface</b>   | xi  |
| <b>1. Measurement of flow—velocity-area methods</b><br><i>J. C. Lambie</i>         |     |
| <b>2. Current meters</b><br><i>F. G. Charlton</i>                                  | 53  |
| <b>3. Flow measuring structures</b><br><i>W. R. White</i>                          | 83  |
| <b>4. Dilution methods</b><br><i>K. E. White</i>                                   | 111 |
| <b>5. Indirect methods</b><br><i>H. H. Barnes, Jr. and J. Davidian</i>             | 149 |
| <b>6. Aspects of unsteady flow and variable backwater</b><br><i>R. J. Mander</i>   |     |
| <b>7. New methods</b><br><i>M. J. Green and R. W. Herschy</i>                      |     |
| <b>8. Flow measuring instruments</b><br><i>G. F. Smoot</i>                         |     |
| <b>9. Weed growth—a factor of channel roughness</b><br><i>K. E. C. Powell</i>      |     |
| <b>10. Accuracy</b><br><i>R. W. Herschy</i>  | 353 |
| <b>11. The acquisition and processing of river flow data</b><br><i>T. J. Marsh</i> | 399 |
| <b>12. The use of satellites in hydrometry</b><br><i>R. A. Halliday</i>            | 427 |
| <b>13. River flow in arid regions</b><br><i>J. Rodier and M. Roche</i>             | 453 |
| <b>14. Aerial methods of measuring river flow</b><br><i>V. V. Kuprianov</i>        | 473 |

|  |     |
|--|-----|
| <b>15. The work of the World Meteorological Organization</b>       | 479 |
| <i>J. Němec</i>  |     |
| <b>16. International standardization in river flow measurement</b> | 495 |
| <i>K. K. Framji</i>  |     |
| <b>Index</b>   | 507 |
