

CONTENTS

In this book article headings are listed in the table of contents only in the volume which they occur, but all chapter titles for the three volumes are listed in each volume. A complete index covering all three volumes appears in each volume.

VOLUME I

CHAPTER 1. INVESTIGATION OF DAM SITES		ARTICLE	PAGE
ARTICLE	PAGE	25	17
1	1	Samplers for Silt and Clay	17
2	1	26 Prevention of Failure of Soil During Sampling	18
3	1	27 Clean-Out Augur and Calyx	19
4	3	28 Small-Diameter Sampler (2-In.)	
5	3	29 Thin-Walled Steel Tubing for Large-Diameter Samples	23
6	4	30 Large-Size Piston-Type Sampler	23
7	5	31 Importance of Fast Continuous Pushing of Sampler	25
8	6	32 Application of Samplers Described	
9	6	33 Sampling of Cohesionless Materials	27
10	7	34 Fahlquist Method for Sampling Cohesionless Materials	28
11	7	35 Procedure in Use of Fahlquist Sampler	28
12	7	36 Diamond Drilling	29
13	8	37 The Diamond Drill	
14	9	38 Improved Efficiency of Diamond Bits	32
15	9	39 Size of Core and Holes	33
16	10	40 Importance of Accurate Boring Data	34
17	12	41 Large Drill Holes	
18	12	42 Care of Cores and Samples	34
19	13	43 Keeping of Records	35
20	14	44 Pressure Testing Device	35
21	14	45 Method of Operating Pressure-Testing Device	36
22	15	46 Periscope and Feeler Inspection of Drill Holes	36
23	16	47 Rough Methods of Determining Suitability of Materials	37
24	16	48 Bibliography	38

CHAPTER 2. THE CHOICE OF TYPE OF DAM

ARTICLE	PAGE
1 General Considerations	40
2 Solid Gravity Concrete Dams	41
3 Hollow Gravity Concrete Dams	41
4 Arched Concrete Dams	42
5 Embankments	42
6 Timber Dams	42
7 Steel Dams	43
8 Other Types	43

CHAPTER 3. PREPARATION AND PROTECTION OF THE FOUNDATION

I. GENERAL

1 Scope	44
2 General Considerations	44

II. TREATMENT OF ROCK FOUNDATIONS

3 The Final Surface of Rock Foundations	44
4 Treatment of Rock Foundation Defects	46
5 Leakage Through Rock Foundations	47
6 Grouting Rock Foundations	48
7 Consolidation Grouting	53
8 Drainage of Rock Foundations	53
9 Toe Protection for Rock Foundations	53

III. TREATMENT OF EARTH FOUNDATIONS

10 General Considerations	53
11 Bearing Strength of Earth Foundations	54
12 Bearing Piles	54
13 Sliding on Earth Foundations	54
14 The Flow Net	55
15 Seepage Through Earth Foundations	59
16 Piping	61
17 Uplift	63
18 Line of Creep	65

ARTICLE

PAGE

19 Recommended Design for Earth Foundations	68
20 Upstream Apron	69
21 Cutoffs for Dams on Earth	70
22 Drains for Dams on Earth	71
23 Downstream Apron	72
24 Downstream Cutoff	72
25 Piezometers	73

IV. CONTROL OF EROSION BELOW SPILLWAYS

26 Causes of Erosion	73
27 Spillway Model Tests	74
28 The Hydraulic Jump	75
29 General Requirements of Erosion Control	76
30 Baffle Piers	78
31 Sloping Aprons	79
32 Upturned Bucket	81
33 Arch Dams	82
34 Low Dams	83
35 End Sills	84
36 Cavitation on Baffle Piers	84
37 Jet Deflectors and Stilling Pools	86
38 Uplift Under Apron	87
39 Retrogression	89

V. BIBLIOGRAPHY

40 Arrangement	90
--------------------------	----

CHAPTER 4. HYDRAULIC MODEL STUDIES

1 Introduction	91
2 Essential Considerations of Similarity	92
3 Criteria for Similarity	92
4 Types of Fluid Flow	93
5 Significance of the Froude Number	93
6 Significance of the Reynolds Number	94
7 Coefficient of Roughness in Model Tests	94
8 Examples in Hydraulic Similarity	95
9 Bibliography	98

CHAPTER 5. FLOOD FLOWS

I. FLOOD PEAKS		ARTICLE	PAGE
ARTICLE	PAGE		
1	99	26	Snyder's Synthetic Unit-Hydrograph Relations
2	99	27	Unit-Hydrograph Peak Discharges Versus Drainage Area
3	100	28	Concentration of Runoff near Peak
4	128	29	S-Curve Hydrographs
5	131	30	Summary of Synthetic Unit-Hydrograph Computations
6	135	31	Unit-Hydrograph Adjustments
7	136	32	Comparison of Unit Hydrographs Derived from Major and Minor Flood Hydrographs
8	137	33	Selection of Unit Hydrographs for Design-Flood Computations
9	139	34	Reservoir Inflow Unit Hydrograph
10	139		
II. FLOOD HYDROGRAPHS			
A. BASIC HYDROLOGIC ANALYSIS			
11	140		
B. RAINFALL ANALYSIS			
12	141	35	General
13	143	36	Approximate Design-Storm Estimates for Seasons Without Snow
C. INFILTRATION			
14	143	37	Method 1. Maximum Rainfall Depth-Duration Data, and Rainfall-Excess
15	145	38	Method 2. Transposition of Record Storm: Rainfall-Excess Estimates
16	145	39	Method 3. Modified Storm Transpositions: Rainfall-Excess Estimates
D. REGIMEN OF RUNOFF			
17	155	40	Flood-Flow Contributions from Melting Snow
18	155	41	Ground Conditions
19	156	42	Water Equivalent of Snow Cover
20	157	43	Free Water in Snow Cover
21	157	44	Rate of Release by Melting—General
E. UNIT HYDROGRAPHS			
22	158	45	Heat Transfers from Air
23	160	46	Melting by Rainfall
24	162	47	Snow-Melt Estimates by Heat-Transfer Formulae
25	162		

CONTENTS

ARTICLE	P	ARTICLE	PAGE
48		58	Freeboard 201
		59	Margin of Safety—General 201
49		60	Relation of Surcharge Storage to Spillway Discharge 202
		61	Freeboard Allowances 203
		62	Accuracy of Spillway Design— Flood Estimates 203
		63	Margin of Safety—Summary 204
		64	Selection of Spillway Design— Flood Hydrograph 204
G. REQUIRED SPILLWAY CAPACITY			
50			Hypothetical Hydrographs
51			Outline of Hydrograph Com- putations
52			Reservoir Flood-Routing Computations 105
53			Reservoir Stage at Beginning of Floods 105
54			Discharge Through Regulat- ing Outlets 106
55			Reservoir Flood-Routing Method 106
56			Sample Flood-Routing Com- putations 108
57			Graphical Presentation of Flood-Routing Results 200
III. BIBLIOGRAPHY			
		65	General 205
CHAPTER 6 SPILLWAYS			
		1	Chute Spillways 208
		2	Side-Channel Spillways 216
		3	Shaft Spillways 227
		4	Emergency Spillways 243

VOLUME II

CHAPTER	PAGE
7 FORCES ACTING ON DAMS	247
8 REQUIREMENTS FOR STABILITY OF GRAVITY DAMS	293
9 GENERAL PROCEDURE FOR THE DESIGN OF GRAVITY DAMS	306
10 THE DESIGN OF SOLID NONOVERFLOW GRAVITY DAMS	313
11 THE DESIGN OF SOLID SPILLWAY GRAVITY DAMS	357
12 INTERNAL STRESSES AND STRESS CONCENTRATIONS IN GRAVITY DAMS	401
13 ARCH DAMS	425
14 BUTTRESSED CONCRETE DAMS	558
15 CONCRETE FOR CONCRETE DAMS	604

VOLUME III

16 SOIL TESTS AND THEIR UTILIZATION	619
17 EARTH DAMS—GENERAL PRINCIPLES OF DESIGN	655
18 STABILITY OF EARTH DAMS	715
19 DETAILS OF EARTH DAMS	749
20 ROCK-FILL DAMS	806
21 STEEL DAMS	834
22 TIMBER DAMS	843
23 DETAILS AND ACCESSORIES	848
24 HEADWATER CONTROL	870
