

CONTENTS

	Preface	xi
	Acknowledgements	xiii
	Introduction	xv
1	Fundamental Properties of Water	1
	1.1 <i>The Three Phases of Water</i>	2
	1.2 <i>Mass, Density, and Specific Weight</i>	4
	1.3 <i>Viscosity of Water</i>	6
	1.4 <i>Surface Tension and Capillarity</i>	8
	1.5 <i>Elasticity of Water</i>	10
2	Water Pressure and Pressure Forces	13
	2.1 <i>Free Surface of Water</i>	13
	2.2 <i>Atmospheric Pressure and Pressure Gages</i>	13
	2.3 <i>Manometers</i>	18
	2.4 <i>Hydrostatic Force on Surfaces</i>	23
	2.5 <i>Buoyancy and Flotation Stability</i>	33

3	Water Flow in Pipes and Pipe Networks	43
3.1	<i>Description of a Pipe Flow</i>	43
3.2	<i>Energy Head and Major Energy Loss</i>	46
3.3	<i>Empirical Formulas for Water Flow in Pipes</i>	58
3.4	<i>Loss of Head Due to Contraction</i>	63
3.5	<i>Loss of Head Due to Enlargement</i>	66
3.6	<i>Loss of Head in Bends</i>	68
3.7	<i>Loss of Head Through Valves</i>	69
3.8	<i>Pipeline Connecting Two Reservoirs</i>	73
3.9	<i>Pipe Branchings</i>	78
3.10	<i>Pipe Networks</i>	86
3.11	<i>Pipeline with Negative Pressure or Pumps</i>	98
3.12	<i>Water Hammer Phenomenon in Pipelines</i>	103
4	Water Pumps	115
4.1	<i>Power and Efficiency of Water Pumps</i>	116
4.2	<i>Centrifugal Pumps</i>	117
4.3	<i>Propeller (Axial-Flow) Pumps</i>	124
4.4	<i>Jet (Mixed-Flow) Pumps</i>	128
4.5	<i>Cavitation in Water Pumps</i>	128
4.6	<i>Selection of a Pump</i>	132
4.7	<i>Pumps in Parallel and in Series</i>	137
4.8	<i>Specific Speed and Pump Similarity</i>	139
5	Water Flow in Open Channels	143
5.1	<i>Classification of Open Channel Flows</i>	145
5.2	<i>Uniform Flow in Open Channels</i>	146
5.3	<i>Hydraulic Efficiency of Open Channel Sections</i>	152
5.4	<i>Energy Principles in Open Channel Flows</i>	155
5.5	<i>Hydraulic Jumps</i>	163
5.6	<i>Gradually Varied Flows</i>	167
5.7	<i>Classification of Gradually Varied Flows</i>	170
5.8	<i>Computation of Water Surface Profiles</i>	173
5.9	<i>Transitional Phenomena in Supercritical Flows</i>	184
5.10	<i>Wave Interference and Design of Supercritical Transitions</i>	190

6	Hydraulics of Wells and Seepage	198
	6.1 <i>Movement of Ground Water</i>	200
	6.2 <i>Radial Flow to a Well</i>	203
	6.3 <i>Field Determination of Permeability Coefficient</i>	206
	6.4 <i>Aquifer Boundaries</i>	213
	6.5 <i>Investigation of Ground Water</i>	217
	6.6 <i>Sea Water Intrusion in Coastal Areas</i>	219
	6.7 <i>Seepage Through Dam Foundations</i>	224
	6.8 <i>Seepage Through an Earth Dam</i>	228
7	Hydraulic Structures	230
	7.1 <i>Functions of Hydraulic Structures</i>	230
	7.2 <i>Stability of Gravity Dams and Arch Dams</i>	231
	7.3 <i>Weirs</i>	239
	7.4 <i>Overflow Spillways</i>	243
	7.5 <i>Side-channel Spillways</i>	246
	7.6 <i>Siphon Spillways</i>	249
	7.7 <i>Culverts</i>	253
	7.8 <i>Stilling Basins</i>	257
	7.9 <i>Standpipes</i>	261
8	Hydraulic Similitude and Model Studies	263
	8.1 <i>Principles of Hydraulic Similitude</i>	264
	8.2 <i>Phenomena Governed by Viscous Force— Reynolds Number Law</i>	271
	8.3 <i>Phenomena Governed by Gravity Force— Froude Number Law</i>	274
	8.4 <i>Phenomena Governed by Surface Tension— Weber Number Law</i>	276
	8.5 <i>Phenomena Governed by Both Gravity and Viscous Forces</i>	277
	8.6 <i>Models for Floating and Submerged Bodies</i>	278
	8.7 <i>Open Channel Models</i>	280

9	Water Measurements	285
9.1	<i>Pitot Tubes and Current Meters— Velocity Measurements</i>	285
9.2	<i>Pressure Measurements</i>	289
9.3	<i>Discharge Measurements in Pipe Flows— Venturi Meters, Nozzle Meters, Orifice Meters, and Beed Meters</i>	291
9.4	<i>Discharge Measurements in Open Channels— Weirs, Gates, and Parshall Flumes</i>	298
10	Elements in Hydrology	
10.1	<i>Precipitation</i>	308
10.2	<i>Runoff</i>	314
10.3	<i>Hydrograph and Unit Hydrograph</i>	316
10.4	<i>Frequency Analysis</i>	322
10.5	<i>Flood Routing in Open Channels</i>	327
	Common Constants and Conversions	
	Appendix	
	Graphical Flow Nets: Electric Analog and Numerical Analysis	
	Symbols	
	Index	355
