Preface xi

Part I: Health and Pollution

1	Engineering and infectious disease	3
1.1	Introduction	3
1.2	Water-related infections	4
1.3	Excreta-related infections	10
1.4	Refuse-related infections	17
1.5	Housing-related infections	17
1.6	Summary	19
1.7	References and reading	19
2	Health and water chemistry	21
2.1	Introduction	21
2.2	The absence of necessary chemicals	22
2.3	Harmful organics	23
2.4	Harmful inorganics	24
2.5	References and reading	27
3	Water quality and standards	28
3.1	Drinking water quality	28
3.2	Waste water quality	36
3.3	Industrial wastes	39
3.4	Bathing water quality	40
3.5	Irrigation water quality	42
3.6	Water quality and fish	42
3.7	References and reading	43

Part II: Water Supply

4	Water supplies in developing countries	47
4.1	The haves and the have nots	47

4.2	Operation and maintenance	49
4.3	Appropriate technology	51
4.4	Benefits	51
4.5	Rural supplies and self-help	55
4.6	References and reading	57
5	Rural water supply	58
5.1	Breakdowns and technology	58
5.2	Sources of water	60
5.3	Raising water	69
5.4	Storage	75
5.5	Treatment	76
5.6	Water distribution	81
5.7	References and reading	82
6	Urban water supply and water treatment	84
6.1	Introduction	84
6.2	Coagulation and sedimentation	85
6.3	Filtration	87
6.4	Disinfection	89
6.5	Distribution	97
6.6	Water-demand management	101
6.7	References and reading	104
Part III: Excreta and Refuse: Treatment, Disposal, and Re-use		
7	Excreta disposal in developing countries	107
7.1	The haves and the have nots	107
7.2	Rural sanitation	107
7.3	Urban sanitation	110
7.4	References and reading	113
8	Types of excreta disposal system	114
8.1	Introduction	114
8.2	Pit latrines	114
8.3	VIP latrines	117
8.4	Difficulties with pit latrines	121
8.5	Pour-flush toilets	124
8.6	Vault toilets and cartage	127
8.7	Septic tanks	127
8.8	Other systems	129
8.9	Communal latrines	132
8.10	Soil conditions	133
8.11	Soakaway design	135
8.12	Personal hygiene	138
8.13	Sullage disposal	138
8.14	Nightsoil and sludge re-use and disposal	138
8.15	Water availability	141

8.16	References and reading	142
9	Planning a sanitation programme	143
9.1	Programme context and content	143
9.2	Choice of system	146
9.3	Social factors	149
9.4	Costs	152
9.5	Operation and maintenance	155
9.6	Incremental sanitation	155
9.7	References and reading	157
10	Waste water treatment	159
10.1	Introduction	159
10.2	Waste characteristics	159
10.3	Waste-stabilization ponds	160
10.4	Aerated lagoons	169
10.5	Oxidation ditches	169
10.6	Pathogen removal	170
10.7	Sewage workers' health	171
10.8	References and reading	171
11	Refuse collection and disposal	173
11.1	Introduction	173
11.2	Waste characteristics	173
11.3	Hazards of refuse mismanagement	175
11.4	Storage and collection	177
11.5	Treatment and disposal	178
11.6	References and reading	180
12	Composting	181
12.1	Aerobic and anaerobic composting	181
12.2	Techniques	183
12.3	Carbon/nitrogen ratio	186
12.4	Problems of composting	188
12.5	Individual composting toilets	188
12.6	References and reading	189
13	Health hazards of waste re-use	190
13.1	Introduction	190
13.2	Health and agricultural re-use	190
13.3	Health and fish farming	193
13.4	References and reading	195

Part IV: Environmental Modifications and Vector-borne Diseases

14	Engineering control of arthropod vectors	199
14.1	Introduction	199

14.2	Mosquito-borne diseases	199
14.3	Fly-borne diseases	211
14.4	Chagas' disease and bugs	216
14.5	Lice, fleas, ticks, and mites	219
14.6	Conclusions	219
14.7	References and reading	220
15	Dams, irrigation, and health	221
15.1	General considerations	221
15.2	Onchocerciasis	223
15.3	Malaria	225
15.4	Arboviral infections	226
15.5	Bancroftian and Malayan filariasis	226
15.6	Spillways and reservoir release policies	228
15.7	References and reading	230
16	Schistosomiasis	232
16.1	Introduction	232
16.2	Engineering methods in schistosomiasis control	237
16.3	Schistosome removal from water and wastes	247
16.4	References and reading	249
Appendix A:	Biological classification conventions	251
Appendix B:	Glossary	253
Appendix C:	Checklist of water-related and excreta-related diseases	260
Appendix D:	The life cycles of certain helminths infecting man	265
Appendix E:	Units	270
Index		271
