Introduction	page 7
----------------------	--------

I. GENERAL AND ENGINEERING DATA

Length	10
Weight	10
Volume and Capacity	10
Density	10
Area	10
Flow Rate	11
Flow Velocity	11
Specific Flow Rate	11
Sieve Apertures	12
Inches, as Decimals of a Foot, and Centimetres	12
Fractions of an Inch, as Decimals, and Millimetres	12
Temperature Conversion	12
Temperature and Specific Volume of Saturated Steam	14
Pressure, Head at 15°C, and Vacuum Units	16
Heat or Energy per Unit Time, and Power	16
Heat Content	16
Horse-power, Water Horse-power and Kilowatts	16
Steam Required for Power Generation	16
Circumferences and Areas of Circles	17
Cylindrical Tanks	18
Wall thickness of open top tanks	19
Weights of Cylindrical Tanks, Full and Empty	20
Pressure Loss in Pipe Fittings	20
Flow through Filters at Different Velocities	21
Discharge of Water over Vee Notches	21
Flow through Pipes at Different Velocities	22
Pressure loss in Pipes	22
Pressure Loss in Ion Exchange Beds	23

II. PROPERTIES OF SOLUTIONS

Strength of Solutions, Capacity and Regeneration Level	26
Conversion for Dissolved Oxygen	26
Density of Solutions, Solubilities	27
Freezing Point of Solutions of Sulphuric Acid and Caustic Soda	27
Alkalinity, pH, and Free CO ₂	28
Calculation of Coagulation Doses	28
Langelier Saturation Index Chart	29
Solubilities of Calcium Salts	29
pH and Conductivity of Dilute Solutions	30
Conductivity of Salt Solutions	31
Solubility, Conductivity and pH of CO ₂ in Water at Different Partial Pressures at 25°C.	32
Partial Pressure of Dissolved Oxygen and CO ₂ , and Vapour Pressure of Water	32

III. CHEMICAL AND PROCESS DATA

Chemical Analyses Required for the Design of Water Treatment Processes ..	34
Interpretation of Alkalinity Titration	34
Determination of Organic Matter by KMnO_4 Consumption	34
Hypothetical Combinations	35
Formulae and Equivalent Weights	36
Typical Processes used in Water Treatment, and their Chemical Equations ..	38
Calculation of Lime and Lime Soda Dosages	41
Some Proprietary Ion Exchange Resins	42
Performance of Ion Exchange Resins	43
Design of Units Limited by Specific Flow Rate	44
Rinse and Service Water; Linked Trains of Units	44
Design of Packed Degasser Towers for CO_2 Removal	45
Permissible Limits of Boiler Drum Contents	46
Standard Materials of Construction	47

IV. COSTS

General	50
Coagulation, Cold Lime and Cold Lime Soda Plants: Capital Costs	50
Costs of Ion Exchange Resins	50
Capital Cost of Ion Exchange Units	50
Cost of Chemicals, 1964	51
Cost of Pumping	52
Chemical Costs of Coagulation	52
Chemical Costs of Water Treatment Processes	52
Three Typical Water Analyses	53
Flow sheets and Chemical Costs of Process (in Increasing Order of Capital Costs)	54
Notes on Running Costs	56
Running Costs of Electrodialysis and the 'Powdex' Process	56
Abbreviations and Symbols	57
Index	59

NOTE

Except where specifically stated, all units are English,
i.e. Imperial Gallons, Long Tons, etc.
