

CONTENTS

	Page
Section I : Chemistry of Pollutants	1
1. The Foundations of Organic Pollutant Analysis	3
2. The Chemistry of Some Potential Polyhalogenated Water Pollutants	15
3. Photodecomposition of Halogenated Aromatic compounds	35
4. Chemical Carcinogens in the Environment	49
Section II : Techniques and Methods of Analysis	73
5. Glass Capillary Gas Chromatography in Water Analysis : How to Initiate Use of the Method	75
6. GC/MS Determination of Volatiles for the National Organics Reconnaissance survey (NORS) of Drinking Water	87
7. A Convenient Liquid-Liquid Extraction Method for the Determination of Halomethanes in water at the Parts-Per-Billion Level	105
8. Separation of Trace Organic Compounds from Water	113
9. Resin Sorption Methods for Monitoring Selected contaminants in Water	135
10. Development of Methods for Organic Analyses for Routine Application in Environmental Monitoring Laboratories	155
11. Development of Computerized GC/MS Techniques within the U.S. EPA	177
12. The Use of GC/MS in the Analysis of Unusual Environmental Chemicals	185
13. On the Origin of Polycyclic Aromatic Hydrocarbons in the Aqueous Environment	205
14. Separation and analysis of Refractory Pollutants in Water by High-Resolution Liquid Chromatography	215
15. Determination of Chlorination Effects on Organic Constituents in Natural and Process Waters Using High-Pressure Liquid Chromatography	233
16. Analysis of New Chlorinated Organic Compounds in Municipal Wastewaters After Terminal Chlorination	247
17. N-Nitroso Compounds in Water	255
18. Determination and Monitoring of Some Organic Explosives in Natural and Effluent Water by Single-Sweep Polarography	265
19. Organic Fractionization and Selected Trace Metal Content of Sludges	281
20. Detection and Isolation of Bioaccumuable Chemicals in Complex Effluents	297
Section III : Identification of Organic Pollutants	303
21. The Occurrence of Volatile Organics in Five Drinking Water Supplies Using Gas Chromatography/Mass Spectrometry	305
22. Identification of Organic Compounds in Drinking Water from Thirteen U.S. Cities	329
23. GC/MS Identification of Trace Organic Compounds in Philadelphia Waters	375
24. Analysis of Drinking Water for Organic Compounds	399
25. Possible Factors in the Drinking Water of Laboratory Animals Causing Reproductive Failure	417
26. Analyses of Organic Constituents in Water by High-Resolution Gas Chromatography in Combination with Specific Detection and Computer-Assisted Mass Spectrometry	433
27. Isolation and Identification of Organic Contaminants in Ground Water	453
28. Chloroform-Extractable Organic Compounds in the International Great Lakes	479
29. Uses of Wastewater Discharge Compliance Monitoring Data	499
30. GC/MS Analysis of Organic Compounds in Domestic Wastewaters	517
31. The Molecular Nature and Extreme Complexity of Trace Organic Constituents in Southern California Minicipal Wastewater Effluents	557
32. The Characterization of Trace Organic Constituents in Petroleum Refinery Wastewater by Capillary Gas Chromatography/Real-Time High-Resolution mass Spectrometry – A Preliminary Report	587
33. Identification of Two Chlorinated Guaiacols in Kraft Bleaching Wastewaters	625

34.	Fate of Selected Organic Compounds in the Discharge of Kraft Paper Mills into Lake Superior	641
35.	Persistent organic Compounds from a Pulp Mill in a Near-Shore Freshwater Environment	661
36.	GC/MS Analyses of Organic Compounds in Treated Kraft Paper Mill wastewaters	671
	Index	709
