

CONTENTS

	Page
Foreword	v
General Data	1
1.1 Introduction	1
1.2 Quantity and Origin of Organic Water Pollutants	2
1.3 Summary of Biological Treatment Methods for Residential and Industrial Waste Water	7
1.4 Chemical and Physical Treatment methods of Industrial Waste Effluents	12
General Methods	19
2.1 Objectives and Purposes of Organic Water analysis	19
2.2 Choice of Analytical Method	21
Preliminary Steps	26
3.1 Water Sampling	26
3.2 Enrichment of Organic Water Pollutants for Analysis	28
Subjective Tests	33
4.1 Odor Test	33
4.2 Color Determination	36
Quantitative Evaluation of Organic Compounds	38
5.1 Summary	38
5.2 Determination of the Ignition Loss	42
5.3 Organic Carbon Determination	43
5.4 Methods of Volumetric Analysis	52
5.5 Determination of the Chemical Oxygen Demand (COD Value) with $K_2Cr_2O_7$	56
5.6 COD Determination with Potassium Persulfate by Gas Volumetry	67
5.7 Automatic Dry Methods for COD Determination	70
5.8 Evaluation of Water Samples on the Basis of the COD Value	71
5.9 Determination of the Chlorine Value According to Froboese	73
5.10 Organic Nitrogen Determination	74
5.11 Determination of the Biochemical Oxygen Demand (BOD ₅)	75
5.12 Physical Methods for Total Water Pollutant Indication	85
Chromatographic Methods	87
6.1 Summary	87
6.2 Thin-layer Chromatography	88
6.3 High-Efficiency Column coated Chromatography with Continuous Flow Analysis	93
6.4 Gas Chromatographic Methods in water Analysis	93
Volatile Fatty Acids	101
Cyanides	102
8.1 Introduction	102
8.2 Sample Preparation	103
8.3 CN-Determination with selective Membrane Electrodes	105
8.4 Titration methods	105
8.5 Colorimetric Methods	107
8.6 Total Cyanide Determination According to Bucksteeg and Dietz	109
8.7 Partial Cyanide Determination	110
8.8 Determination of Free Hydrocyanic Acid by Extraction with Methylchloroform	112

Phenols	114
9.1 Summary	114
9.2 Determination of Total Phenols by Bromination According to DEV (Phenol content Higher than 100 mg/l)	116
9.3 Colorimetric Methods	117
9.4 Phenol Determination by Bromination and IR-Spectroscopy	120
9.5 Phenol Determination by Measurement of the UV-Difference in Acid and Alkaline solution	121
9.6 Thin-layer chromatography (TLC)	122
9.7 Gas Chromatography (GC)	124
9.8 Phenol Determination by Higher-Efficiency Liquid-Liquid Chromatography	127
Detergents (Surfactants)	128
10.1 Summary	128
10.2 Anionic Detergents	129
10.3 Determination of Cationic Detergents with Bromphenol Blue (DEV, H 23)	134
10.4 Nonionic Surfactants (Nonionics)	135
10.5 Determination of Detergent Biodegradability	139
Nitrilotriacetic Acid	142
Hydrocarbon Determination	144
12.1 Introduction	144
12.2 DEV Gravimetric Method, H 17/18 (Old Edition)	147
12.3 Extraction Methods and Density Determination of the Solution	150
12.4 Determination According to lawrenz with Gas Test Tubes	152
12.5 Determination of Volatile Hydrocarbons by Displacement and Turbidity Measurement (According to Sherrat)	152
12.6 Detection of Mineral Oil Traces by Fluorescence	153
12.7 Thin-Layer Chromatography Determination by "Channel TLC"	154
12.8 GC with Direct Injection	156
12.9 Hydrocarbon Determination by IR-Analysis	157
Determination of Volatile Chlorinated Hydrocarbons	160
Pesticides	161
14.1 Introduction : Harmful Effect; Toxicity	161
14.2 Sampling, Enrichment, Isolation	164
14.3 Separation and Identification	165
14.4 Determination of Chlorinated Hydrocarbons on the Basis of the chlorine Content ; Chlorine Cleavage with Metallic Sodium	166
14.5 Colorimetric Methods of Determination	167
14.6 Analysis of Halogenated Hydrocarbon Insecticides by IR-Spectrophotometry	167
14.7 Application of High-Efficiency Liquid-Liquid Chromatography	168
14.8 Thin-Layer Chromatographic Separating methods	169
14.9 Gas-Chromatographic methods of Pesticide Analysis	172
14.10 Polychlorinated Biphenyls	175
14.11 Gas-chromatographic Determination of Dichloropropionic Acid	177
14.12 Group Identification on the Basis of Chlorinesterase Inhibition	178
Urea	180
Uric Acid	182
Coprosterols	183
Urochromes	185
Humic Acids	188
Lignin and Lignosulfonic Acids from Pulp Waste Effluents	191
3,4-Benzopyrene	194
Appendices	196
References	201
Index	211
